## 1. Operating Results

### (1) Explanation of Operating Results

Despite a moderate recovery, the global economy remained uncertain throughout the consolidated fiscal year due to persistent high prices, the lingering sluggish economy in China, geopolitical risks in multiple regions, and trade policies under the new U.S. administration. The economy remained strong in the U.S. due to increased consumer spending. However, capital investment was sluggish. In China, the economy made a brief rebound but remained sluggish as the real estate market, consumer spending, and other indicators failed to recover. Despite rising costs in Japan, the economy demonstrated a moderate recovery with improving employment and income conditions, strong inbound demand, and firm corporate earnings. In light of changes in the business environment surrounding the Fujitec Group, we announced a new five-year medium-term management plan, Move On 5, in May 2024, which we began executing this fiscal year. This plan encompasses the fundamental corporate changes we will pursue to achieve our underlying value. Under Move On 5, we plan to improve net sales to 325 billion yen, operating income to 44 billion yen, and operating income margin to 13.5% by fiscal 2028, achieving cross-organizational growth and efficiencies in every region and every business. We established three pillars as a company-wide strategy to achieve these growth targets. The first pillar is *selection and consolidation of regions and business mix*. Under this pillar, we aim to improve profitability through clear strategic positioning in each region, defining the direction of efforts in each region and business. To accelerate the supervision and execution of each regional strategy, we established a specific implementation structure led by a regional director for each regional segment. In China, where the real estate recession continues, we are addressing major issues by restructuring our agency network through a review of contracts and reducing personnel, mainly in direct factory departments. The second pillar is *high quality and high profitability*. Here, we aim to improve margins through the collective efforts of the Fujitec Group while also enhancing quality, which is one of our strengths. As part of these measures, we pursue preventive maintenance systems using remote monitoring in each region. In Singapore, we became the first Japanese manufacturer to obtain the standard certification for elevator maintenance using remote monitoring, which is an initiative of the Singaporean government. These standards are the first of their kind, established in Singapore for the remote monitoring of maintenance in the countless high-rise buildings located the country to enhance elevator sustainability. In addition, we launched sales of the new Ele Glance standard elevator for the Japanese market in April. As the successor to the current flagship model, XIOR, this new elevator features enhanced design elements, ease of maintenance, and disaster countermeasures. We have made the main equipment more compact and lighter, contributing to greater installation efficiency and resource conservation during production. Furthermore, completed construction of Wisdom Square, a quality evaluation facility for elevators and escalators, in March 2025 and began phased operations in April. Wisdom Square is a quality-focused testing and verification facility designed to provide the highest quality products and services both in Japan and across global markets. Fujitec will strengthen our group-wide quality control system and sharpen our focus on quality—one of our core strengths. We are committed to delivering products and services that allow customers in Japan and worldwide to experience the high quality only a specialized manufacturer can provide. The third pillar is a strong business foundation, the SDGs, and other initiatives indispensable for pursuing these pillars. To strengthen our implementation framework for Move On 5, we established a group management system centered around the Management Committee while also clarifying roles and responsibilities. In addition, we set a target to reduce greenhouse gas emissions by 46% by fiscal 2030 (vs. fiscal 2019) to reduce our environmental footprint. One of our efforts in this area was our move to switch from diesel oil to biodiesel fuel for the four-ton trucks owned by Big Step, our R&D and production base for escalators. In recognition of these efforts, the Japan Management Association awarded Big Step with the GOOD FACTORY Award in 2025 (13th annual awards). We established 21 subcommittees to monitor our progress in these three pillars. Each subcommittee reports progress at monthly management meetings, where issues are identified and response measures formulated.

So far this fiscal year, we delivered a total of 102 elevators and escalators to Shibuya Sakura Stage, a large-scale complex facility in Shibuya, Tokyo. We also delivered a total of 92 elevators and escalators to TAKANAWA GATEWAY CITY, a redevelopment complex directly connected to JR Takanawa Gateway Station. The elevators link to security, cleaning, and delivery robots deployed throughout the city, enabling autonomous floor-to-floor movement. Furthermore, we delivered a total of 47 elevators and escalators to Grand Green Osaka for the second phase of the Umekita redevelopment zone north of

JR Osaka Station. In Hong Kong, we delivered 44 units of renovated elevators for Three Garden Road, two high-rise office buildings in the financial district. This delivery represented the largest number of elevators from the Fujitec Group used in an office renovation project. In terms of major orders this fiscal year, we received an order for 160 escalators for the Taipei Twins skyscraper under construction in Taipei City, Taiwan. In India, we received an order for 239 elevators for the Chennai Metro project (lines 3 and 5) planned in Chennai, located in the southern India.

As a result of the matters discussed above, the Fujitec Group recorded business performance for the consolidated fiscal year ended March 31, 2025, as described below.

(Amounts less than one million yen are rounded down)

The average order unit price for domestic orders in the New Installation Business rose year on year as we engaged in selective order-taking. Even though the number of units ordered decreased, orders increased in terms of monetary volume. Our Aftermarket Business saw year-on-year growth in both the number of modernization projects received and their total value. Repair work and maintenance for elevators and escalators also rose due to an increase in the number of contracts and contract price revisions.

In terms of overseas orders, in East Asia, the New Installation Business saw a decrease in orders in Hong Kong. Orders increased in Taiwan and South Korea while the Aftermarket Business saw an increase in modernization projects in Hong Kong. In South Asia, orders in the New Installation Business increased mainly in India, while the Aftermarket Business saw increases in all regions. In the Americas and Europe, New Installation Business orders decreased in the U.S. and U.K. and Aftermarket Business orders increased in the U.K. and Canada.

Sales and profits increased year on year, as strong performance in other regions offset the decline in East Asia. Ordinary income increased as higher operating income offset a decline in foreign exchange gains. Profit before income taxes decreased due to the absence of the gain on sales of non-current assets of a consolidated subsidiary recorded in the previous period. This absence offset an increase in gain on sales of investment securities from the sale of cross-shareholdings.

As a result, profit attributable to owners of parent decreased year on year.

#### Japan

Both sales and profits increased year on year. Net sales increased in the New Installation Business and the Aftermarket Business. Operating income increased due to improved profitability in the New Installation and Aftermarket businesses, despite higher labor and material costs.

#### East Asia

Both sales and profits decreased year on year. Net sales decreased, despite increased sales in the Hong Kong Aftermarket Business. This decrease was mainly due to the impact of significantly fewer New Installation Business projects on hand and lower sales unit prices stemming from the prolonged real estate recession in China. Operating income decreased despite support from a reduction in provision for losses on construction contracts in Taiwan and South Korea, as well as higher Aftermarket Business sales in Hong Kong. This overall decline was due to lower New Installation Business sales in China and the impact of one-time expenses.

#### South Asia

Both sales and profits increased year on year. Net sales increased due to the performance of the New Installation Business in Singapore and India, as well as an increase in the Aftermarket Business in Singapore. Operating income increased due to higher New Installation sales in India, despite a slight decline in profitability, mainly in the Aftermarket Business, due to higher material costs and labor costs in Singapore.

#### The Americas and Europe

Both sales and profits increased year on year. Net sales increased, driven by progress on large-scale New Installation projects in the U.S. and growth in the Aftermarket Business across all regions. Operating income increased, supported by sales volume growth in the Aftermarket Business, despite lower profitability on certain New Installation projects in the U.S.

## **(2) Explanation of Financial Position**

Total assets as of the end of the consolidated fiscal year under review amounted to 262,257 million yen, an increase of 5,855 million yen compared with the end of the previous consolidated fiscal year. This result was mainly due to increases in cash and deposits; notes and accounts receivable-trade, and contract assets; and property, plant and equipment, which offset a decrease in investments securities.

Total liabilities amounted to 91,622 million yen, an increase of 396 million yen compared with the end of the previous consolidated fiscal year. This result was mainly due to an increase in notes and accounts payable-trade and advances from customers, which were offset in part by decreases net defined benefit liability.

Net assets amounted to 170,635 million yen, an increase of 5,458 million yen compared with the end of the previous consolidated fiscal year. This result was mainly due to profit attributable to owners of parent of 14,514 million yen and an increase of 9,170 million yen in foreign currency translation adjustments. These increases were offset in part by dividend payments of 15,216 million yen and a decrease in valuation difference on available-for-sale securities of 2,339 million yen. Our shareholders' equity ratio as of the end of the consolidated fiscal year under review was 59.3%, up 1.4 points compared to the end of the previous consolidated fiscal year. Net assets per share amounted to 1,994.06 yen, up 92.78 yen compared with the end of the previous consolidated fiscal year.

## **(3) Consolidated Cash Flows**

Cash and equivalents as of the end of the consolidated fiscal year under review amounted to 54,738 million yen, an increase of 15,750 million yen compared with the end of the previous consolidated fiscal year.

The following describes cash flows from each source and change factors for consolidated fiscal year ended March 31, 2025.

#### Cash Flows From Operating Activities

Net cash provided by operating activities amounted to 15,402 million yen, a decreased of 2,095 million yen compared with the year-ago period. This result was mainly due to profit before income taxes of 19,975 million yen and depreciation and amortization of 4,706 million yen. These amounts were offset in part by 6,647 million yen in income taxes paid and interest and dividend income of 2,780 million yen.

#### Cash Flows From Investing Activities

Net cash provided by investing activities amounted to 16,514 million yen, an increase of 16,081 million yen compared to the year-ago period. This result was mainly due to a net decrease in time deposits of 16,604 million yen, interest and dividends received of 3,233 million yen, proceeds from sales of investment securities of 3,016 million yen, and other factors, against purchases of property, plant and equipment of 6,165 million yen.

#### Cash Flows From Financing Activities

Net cash used in financing activities amounted to 19,270 million yen, an increase of 7,165 million yen compared with the

previous consolidated fiscal year. This result was mainly due to a net decrease in short-term borrowings of 1,810 million yen, cash dividends paid, and other factors.

1. All indicators were calculated using consolidated financial data.
2. Market capitalization is calculated by multiplying the closing stock price at the end of the fiscal year by the number of shares outstanding at the end of the fiscal year (after deducting treasury stock).
3. Cash flows are based on cash flows from operating activities shown in the consolidated statements of cash flows. Interest-bearing debt is based on all debt shown on the consolidated balance sheets for which interest is paid. Interest payments are based on the amount of interest paid in the consolidated statements of cash flows.

##### Outlook for the Next Fiscal Year

In the next fiscal year, the speed of recovery is likely to slow due to continued uncertainty about the future, including tariff increase under the new U.S. administration, the real estate recession in China, and concerns about the global situation.

The Fujitec Group remains committed to placing the highest priority on the safety and security of our employees and other affiliated persons. While we understand the concerns about the supply chain impacts of rising raw materials prices, tariff increase in the U.S. and concerns of the global situation on our businesses, we will endeavor to improve profitability through sales strategies tailored to market characteristics and cost reforms, reduced SG&A expenses, and other measures based on production and operations strategies.

While it is difficult to make a highly accurate forecast for the next fiscal year at this time, as a result of the above, and based on the assumption that trends in economic recoveries continue, we forecast net sales of 244,000 million yen (up 1.1% increase compared with the current fiscal year), operating income of 22,900 million yen (up 41.6%), ordinary income of 23,800 million yen (up 26.1%), and net income of 17,000 million yen (up 17.1%).

##### Assumptions Used in Outlook for the Next Fiscal Year

The earnings forecasts above are based on information currently available to the Company and certain assumptions that the Company deems to be reasonable at the time this report was prepared. These forecasts are not a guarantee of performance. Actual results may differ significantly from forecasts due to a variety of factors. Major factors include economic conditions in our major markets (Japan, Asia, the Americas, and Europe), fluctuations in product supply and demand, raw material price trends, and exchange rate fluctuations. We have assumed a US\$1 to 140 yen average exchange rate for our full-year forecasts.

## **(5) Basic Policy on Appropriation of Profits and Dividends for the Current and Next Fiscal Years**

In line with the capital policy we defined in our new medium-term management plan Move On 5, our approach to profit distribution considers improved capital efficiency and enhancing shareholder returns to be our most important management priorities. At the same time, we endeavor to maintain distributions targeting an 80% consolidated payout ratio balanced with a healthy financial foundation in support of business growth.

In addition to internal reserves, we use borrowings based on capital procurement policy to invest actively in growth areas, engage in M&A, etc., to enhance corporate value, and we will continue to consider share buybacks as a means of returning profits to shareholders.

We revised our earnings forecast downward on February 6, 2025, from the projection announced on May 14, 2024. The revision mainly reflects one-time expenses. However, as net sales, operating income, and ordinary income all reached record highs for the fiscal year under review, we will maintain year-end dividend of 90 yen per share as announced on May 14, 2024. As a result, the annual dividend will be 165 yen per share, including an interim dividend of 75 yen per share. As a result, our consolidated dividend payout ratio amounted to 88.7%.

We plan to pay a 80 yen per share interim dividend and a 95 yen per share year-end dividend for the next fiscal year, resulting in a 175 yen per share annual dividend.

## **2. Basic Approach to Selection of Accounting Standards**

The Fujitec Group prepares consolidated financial statements in accordance with Japanese GAAP to ensure comparability of our consolidated financial statements from period to period and from company to company.

Our policy regarding the adoption of international financial accounting standards is to respond in an appropriate manner, taking into consideration various circumstances in Japan and overseas.

## **(5) Notes to the Consolidated Financial Statements**

### **(Notes Regarding Assumptions of Going Concern)**

Not applicable.

### **(Changes in Accounting Policies)**

(Adoption of Accounting Standard for Current Income Taxes)

The Company adopted *Accounting Standard for Current Income Taxes* (ASBJ Statement No. 27, October 28, 2022; "Revised Accounting Standard 2022," below) as of the beginning of the current consolidated fiscal year.

The revised classifications for income taxes (taxes on other comprehensive income) follows the transitional treatment detailed in the provision of paragraph 20-3 of Revised Accounting Standard 2022 and the transitional treatment detailed in the provision of paragraph 65-2(2) of Guidance on Accounting for Tax Effect Accounting (ASBJ Guidance No. 28, October 28, 2022; "Revised Guidance 2022," below). The adoption of this accounting standard did not have any impact on the consolidated financial statements and per-share information of the Company.

Further, the Company has adopted Revised Guidance 2022 as of the beginning of the current consolidated fiscal year for the revised treatment of consolidated financial statements when gains or losses arising from the sale of shares, etc., in subsidiaries between consolidated companies is deferred for tax purposes. The Company applied this change in accounting policy retrospectively, and we have prepared the consolidated financial statements for the previous consolidated fiscal year on this retrospective basis. The adoption of this change in policy had no impact on the consolidated financial statements for the previous consolidated fiscal year.

### **(Segment and Other Information)**

(Segment Information)

#### 1. Overview of reportable segments

The Fujitec Group's reportable segments are units of the group whose financial information is available separately and are reviewed regularly by the Fujitec Co., Ltd. board of directors for determining the distribution of management resources and the evaluation of business performance.

The Fujitec Group is engaged mainly in the production, sales, installation, and maintenance of elevators, escalators, and other products. Fujitec Co., Ltd. is in charge of businesses in Japan, while independent local subsidiaries are in charge of overseas businesses in East Asia (China, Hong Kong, Taiwan, and South Korea), South Asia (mainly Singapore and India), and The Americas and Europe (the United States, Canada, Argentina, Mexico, and the United Kingdom).

Accordingly, the Fujitec Group consists of regional segments based on an integrated system of production, sales, installation, and maintenance, representing four reportable segments: (1) Japan, (2) East Asia, (3) South Asia, and (4) The Americas and Europe.

#### 2. Method of calculating net sales, profit (loss), assets, liabilities, and other items of each reportable segment

The accounting treatment for each reportable segment is essentially the same as that used in the preparation of the consolidated financial statements. Profit for each reportable segment reflects figures based on operating income.

Intersegment internal revenues and transfers are based on prevailing market prices.

3. Information on net sales, profit (loss), assets, liabilities, and other items of each reportable segment
