3. Reason

As part of our fundamental policy, we aim to provide long-term and stable dividends in response to the continued support of our shareholders. At the same time, we seek to strengthen our financial foundation by securing a certain level of internal reserves to prepare for future capital investments, such as new store openings, and unforeseen business risks.

Based on the above-mentioned policy and the recent performance trends, the Company has decided to increase the interim dividend by ¥1 per share from the previous forecast, resulting in a dividend of ¥23 per share. Similarly, the year-end dividend is also expected to be increased by ¥1 per share to ¥23. As a result, the annual dividend per share, including the interim dividend, is projected to be ¥46.
