2. Reasons for revision

Regarding the consolidated financial result forecasts for the fiscal year ending March 31, 2026, net sales are expected to fall short of the previous forecasts due to changes in the market environment and a slower-than-anticipated recovery of demand in Europe and North America. In terms of profits, operating profit and ordinary profit are also expected to be lower than the previous forecasts reflecting the decline in net sales, an increase in fixed costs, and a greater-than-expected impact of the hyperinflation in Turkey.

The above forecasts are based on information available as of the date this announcement was released. Actual results may differ from the forecasted figures due to various factors arising in the future.
