## 1. Overview of the operating results, etc.

### (1) Overview of business performance for the current quarter

Regarding the business environment for the in vitro diagnostic medical device industry during the first quarter period (July 1, 2025 to September 30, 2025), although the 13th wave of COVID-19 peaked in the first half of August 2025, its scale remained low compared to the 11th wave during the same period last year. Consequently, demand for antigen test kits decreased compared to the same period last year. Furthermore, the phase of reducing the market inventory of antigen test kits secured by wholesalers during the previous epidemic period continued from the fourth quarter of the previous fiscal year until around the end of this first quarter, which also contributed to the decline in sales for this first quarter.

As a result, for the first quarter cumulative period, net sales were ¥2,368 million (63.1% decrease compared to the first quarter of the previous year), operating income was ¥547 million (85.4% decrease in the same), ordinary income was ¥505 million (86.5% decrease in the same), and net income was ¥357 million (86.7% decrease in the same).

<Net sales trend> (Unit: millions of yen)

	1st Quarter	2nd Quarter	3rd Quarter	4th Quarter	Total
FY2024	6,943	4,673	4,754	2,063	18,434
FY2025	6,419	5,561	5,626	1,020	18,627
FY2026	2,368	—	—	—	—

Regarding quarterly sales trends, while first quarter sales were at a high level in previous years, However, for the current period, sales in the first quarter decreased compared to previous years. This was due to the lower prevalence of major respiratory infectious diseases compared to previous years, as well as the fact that the phase of reducing the market inventory of antigen test kits secured by wholesalers in the third quarter of the previous year continued from the fourth quarter of the previous year until around the end of the first quarter of the current year.

<1st Quarter P/L Comparison> (Unit: millions of yen)

	FY2024 1Q	FY2025 1Q	FY2026 1Q	Increase/(decrease)
Net sales	6,943	6,419	2,368	(63.1%)
Gross profit	4,802	4,810	1,630	(66.1%)
Gross profit ratio (%)	69.2%	74.9%	68.8%	(6.1%)
Operating income	3,746	3,745	547	(85.4%)
Operating income ratio (%)	53.9%	58.3%	23.1%	(35.2%)
Ordinary income	3,741	3,753	505	(86.5%)
Ordinary income ratio (%)	53.9%	58.5%	21.3%	(37.1%)
Net income	2,685	2,696	357	(86.7%)
Net income ratio (%)	38.7%	42.0%	15.1%	(26.9%)

For the first quarter, operating income, ordinary income, and quarterly net income all decreased due to a decline in net sales.

<Sales by main product in the first quarter> (Unit: millions of yen)

Sales by main product	FY2024 1st Quarter (a)	FY2025 1st Quarter (b)	FY2026 1st Quarter (c)	(c) / (b)
COVID-19 single-use test kits	2,374	3,284	1,229	(62.6%)
Influenza/COVID-19 combo test kits	2,479	2,013	374	(81.4%)
Influenza test kits	1,286	400	179	(55.2%)
Others	803	720	584	(18.9%)
Total	6,943	6,419	2,368	(63.1%)

Sales by main product category fell below the same period last year across the board. This was due to the fact that, while the 13th wave of COVID-19 occurred during the first quarter of the current year, the overall prevalence of respiratory infections remained low. Furthermore, the phase of reducing market inventories continued. This contrasted with the first quarter of the previous year, when demand for COVID-19 single-use test kits surged due to the arrival of the 11th wave of COVID-19 infections.

### (2) Overview of financial position for the current quarter

Total assets at the end of the first quarter of the current year increased by ¥2,568 million compared to the end of the previous year, reaching ¥39,084 million. This was primarily due to a significant increase in accounts receivable and construction in progress related to the new factory construction, despite a decrease in cash and deposits.

Total liabilities increased by ¥4,468 million compared to the end of the previous year, reaching ¥23,565 million. This was

primarily due to an increase in long-term borrowings related to the construction of a new factory, despite a decrease in income taxes payable associated with the payment of tax expenses.

Total net assets decreased by ¥1,899 million compared to the end of the previous year, reaching ¥15,518 million. This was primarily due to a decrease in retained earnings resulting from the payment of dividends.

(3) Explanation on financial forecast

Regarding the full-year earnings forecast for the fiscal year ending June 2026, although sales for the first quarter fell below the same period last year, the phase of reducing market inventory for antigen test kits has ended. Furthermore, influenza entered its epidemic season earlier than usual, starting in late September. Consequently, demand for antigen test kits is currently increasing. Based on these factors, we are maintaining the earnings forecast announced on August 13, 2025.
