The cumulative shipment forecast is 438.0 billion yen for the fiscal year ending on March 31, 2026 (April 1, 2025 - March 31, 2026).

Note: The above forecast of financial results is based on the information available to the Company at the time of announcement, and actual results may differ from this forecast due to various factors.

### Reason:

Along with the announcement of forecasts for the fiscal year, the dividend forecast calculated based on the dividend policy is shown above. In addition, the actual dividends may differ significantly from the forecast following careful examination of business performance fluctuations, projected funding requirements, etc.

### Dividend policy:

To clarify the Company's stance on prioritizing shareholder returns, the target dividend payout ratio has been set at 25% of the consolidated half-yearly net income under a performance-linked dividend policy. Irrespective of the level of income, the Company will maintain a stable dividend of 10 yen per half year (minimum 20 yen yearly dividend).

Except when there is a loss, if the year-end balance of cash and deposits after payment of dividends and income taxes is greater than projected funding requirements (such as for the acquisition of technological resources, facility expansion, retirement of interest-bearing debt, etc.), a target of one-third of that surplus will be added to dividends. The 20 yen payout stipulated in the stable dividend policy may be revised if consolidated net losses are observed for three consecutive years.
