# Orders Results by Business Segment in Q3/Q1-Q3 FY2025

## Q3 FY2025

- ✓ **DSS** : Orders in Japan remained solid in the Front Business, supported by projects focused on DX/modernization. Overseas orders in the Services & Platforms decreased due to the disciplined deal governance in the storage business
- ✓ **Energy** : Orders in the Power Grids business remained strong, driven by robust demand for transmission upgrades and the award of data center-related projects
- ✓ **Mobility** : Although Railway Signaling Systems projects remained steady, orders in the Railway business declined, reflecting a high base effect from large-scale Railway Vehicle projects in the previous year
- ✓ **CI** : Increased orders in Measurement & Analysis Systems for clinical chemistry and immunoassay analyzers and others, in addition to large-scale orders in the robotics SI business in Industrial Digital

## Q3 FY2025

Sector total	Revenue and profit increased in DSS overall. Solid momentum in the Front and IT Services business. : Profitability in the Services & Platforms improved due to mainly GM improvement and cost reductions in the storage business, despite restrained customer investments
Front Business	Revenue and profit increased, driven by the solid performance of DX/modernization business in Japan
IT Services	Revenue and profit increased, driven by the expansion of the Lumada business, such as cloud, security-related services, and managed services
Services & Platforms	Profit increased despite revenue decrease in the storage business, as improved GM and cost reductions driven by disciplined deal governance focused on profitability, while project delays continued due to customer's ongoing investment restraint in Europe and U.S. GlobalLogic's revenue increased, driven mainly by co-creation projects that create synergies with other sectors, despite continued restrained customer investments in Europe and U.S. (Stand-alone YoY+2% on a USD basis)

Sector total	Adj. EBITA for Services & Platforms is revised downward by 10.0 billion yen due to impacts such as restrained investment by customers in Europe and U.S., however, the overall forecast for DSS remains unchanged, driven by the strong performance of the Front and IT Services business
Front Business	Revenue and profit are expected to increase, driven by the solid execution of large-scale Japanese DX/modernization projects and the expansion of the Lumada business
IT Services	Revenue and profit are expected to increase, driven by the expansion of the Lumada business, such as cloud, security-related services, and managed services
Services & Platforms	Profit is expected to increase despite revenue decrease in the storage business, driven by disciplined deal governance and fundamental structural reform, while project delays will continue due to customer's investment restraint in Europe and U.S. GlobalLogic's revenue is expected to keep growing, driven by co-creation projects that create synergies with other sectors and accelerated AI-related service deployment (Stand-alone YoY LSD <sup>(*)</sup> on a USD basis)

# Lumada Business Expansion: Strengthening HMAX Rollout<sup>(\*)</sup>

Strengthening HMAX rollout across sectors to establish a continuous and stable earnings base

## HMAX Digital Services leveraging data collected from Digitalized Assets and AI enhanced by domain knowledge

### Energy

Utilizing digital technology for power grid operation and management

Provided monitoring solutions to the Italian renewable energy operator ERG

**35% reduction in on-site inspection time**

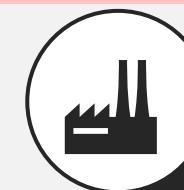

### Mobility

Promoting optimal transport systems, autonomous driving, and IoT integration

Deployed in 2,000+ trains, including Copenhagen Metro

Up to **15% reduction in maintenance costs**  
Up to **15% reduction in energy consumption**

### CI

Contributing to frontline innovation and improved well-being

Implemented a pilot operation of factory equipment failure diagnosis AI agent with Daikin

AI agent confirmed to provide failure causes and countermeasures within **10 seconds with 90%+ accuracy**

## Lumada Business Expansion: Expanding the AI Ecosystem / Promoting HMAX Development

### Expansion of the AI Ecosystem through Partner Collaboration

#### Accelerating Collaboration with Microsoft

- Progress in strategic alliance with Microsoft
- Hitachi reinvents Ellipse Enterprise Asset Management (EAM) solution with Microsoft's AI-enabled technology to improve critical infrastructure resilience

[January 28, 2026: Hitachi reinvents Ellipse Enterprise Asset Management \(EAM\) solution with Microsoft's AI-enabled technology to improve critical infrastructure resilience](#)

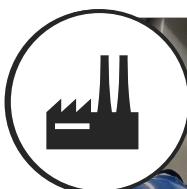

#### Accelerating Collaboration with Google Cloud

Integrating the below to accelerate railway DX

- Hitachi : Railway domain knowledge / HMAX
- GlobalLogic : Advanced digital engineering / AI capabilities
- Google Cloud : Cybersecurity / AI technologies

[December 2, 2025: Hitachi Rail to accelerate rail digital transformation with Google Cloud](#)

### HMAX Development by Customer Zero

#### Commencing On-site Application of AI Safety Solutions for Field Technicians

- Real-time video analysis delivers guidance and alerts
- Early deployment at building systems construction sites
- The solution is also being considered for application at industrial power supply equipment inspection sites and manufacturing facilities

[November 14, 2025: Hitachi Commences the On-Site Application of an AI-Based Safety Solution for Engineers in the Field - Dangerous Location Notification](#)

### HMAX Development by Customer Collaboration

#### Commencing Co-creation with Mitsubishi Chemical

- Conducting verification of troubleshooting assistance using AI agents at chemical plants

Synergies represent revenue recorded in each sector

## Synergies Creation Case Study

### Energy (Nuclear Energy)

Developed the "Metaverse Platform for Nuclear Power Plants" in collaboration with the Nuclear Energy Business Unit. Leveraging AI and digital twins to enhance efficiency in construction and maintenance and support data-driven management

### Mobility

Strengthening HMAX deployment, driven by acquisition of Omnicom and synergies with GlobalLogic

### CI (Building Systems)

GlobalLogic is leveraging the extensive global experience and insights in agile development, supporting the transformation of HMAX for Buildings: BuilMirai into an 'as-a-Service' offering

# Topics (U.S. Reciprocal Tariff Impacts)

## 1. Q3 FY2025 (Actual)

- ✓ Direct and indirect impact amounts (after offsetting effects of countermeasures):  
Adj. EBITA (5.0) bn yen, Net Income (5.0) bn yen
- ✓ Hitachi Energy implemented efforts to mitigate the direct impact on performance through countermeasures such as price pass-through
- ✓ Direct impacts showed an improving trend compared to Q2.  
Indirect impacts continued due to restrained investment by some customers in DSS

## 2. FY2025 (Forecast)

- ✓ Direct and indirect impact amounts (after offsetting effects of countermeasures):  
Adj. EBITA (23.5) bn yen, Net Income (17.0) bn yen

# Cautionary Statement

Certain statements found in this document may constitute "forward-looking statements" as defined in the U.S. Private Securities Litigation Reform Act of 1995. Such "forward-looking statements" reflect management's current views with respect to certain future events and financial performance and include any statement that does not directly relate to any historical or current fact. Words such as "anticipate," "believe," "expect," "estimate," "forecast," "intend," "plan," "project" and similar expressions which indicate future events and trends may identify "forward-looking statements." Such statements are based on currently available information and are subject to various risks and uncertainties that could cause actual results to differ materially from those projected or implied in the "forward-looking statements" and from historical trends. Certain "forward-looking statements" are based upon current assumptions of future events which may not prove to be accurate. Undue reliance should not be placed on "forward-looking statements," as such statements speak only as of the date of this report.

Factors that could cause actual results to differ materially from those projected or implied in any "forward-looking statement" and from historical trends include, but are not limited to:

- economic conditions, including consumer spending and plant and equipment investment in Hitachi's major markets, as well as levels of demand in the major industrial sectors Hitachi serves;
- exchange rate fluctuations of the yen against other currencies in which Hitachi makes significant sales or in which Hitachi's assets and liabilities are denominated;
- uncertainty as to Hitachi's ability to access, or access on favorable terms, liquidity or long-term financing;
- uncertainty as to general market price levels for equity securities, declines in which may require Hitachi to write down equity securities that it holds;
- fluctuations in the price of raw materials including, without limitation, petroleum and other materials, such as copper, steel, aluminum, synthetic resins, rare metals and rare-earth minerals, or shortages of materials, parts and components;
- credit conditions of Hitachi's customers and suppliers;
- general socioeconomic and political conditions and the regulatory and trade environment of countries where Hitachi conducts business, particularly Japan, Asia, the United States and Europe, including, without limitation, direct or indirect restrictions by other nations on imports and differences in commercial and business customs including, without limitation, contract terms and conditions and labor relations;
- uncertainty as to Hitachi's ability to respond to tightening of regulations to prevent climate change;
- uncertainty as to Hitachi's ability to maintain the integrity of its information systems, as well as Hitachi's ability to protect its confidential information or that of its customers;
- uncertainty as to Hitachi's ability to attract and retain skilled personnel;
- uncertainty as to Hitachi's ability to continue to develop and market products that incorporate new technologies on a timely and cost-effective basis and to achieve market acceptance for such products;
- the possibility of disruption of Hitachi's operations by natural disasters such as earthquakes and tsunamis, the spread of infectious diseases, and geopolitical and social instability such as terrorism and conflict;
- estimates, fluctuations in cost and cancellation of long-term projects for which Hitachi uses the percentage-of-completion method to recognize revenue from sales;
- increased commoditization of and intensifying price competition for products;
- fluctuations in demand of products, etc. and industry capacity;
- uncertainty as to Hitachi's ability to implement measures to reduce the potential negative impact of fluctuations in demand of products, etc., exchange rates and/or price of raw materials or shortages of materials, parts and components;
- uncertainty as to the success of cost structure overhaul;
- uncertainty as to Hitachi's ability to achieve the anticipated benefits of its strategy to strengthen its Social Innovation Business;
- uncertainty as to the success of acquisitions of other companies, joint ventures and strategic alliances and the possibility of incurring related expenses;
- uncertainty as to the success of restructuring efforts to improve management efficiency by divesting or otherwise exiting underperforming businesses and to strengthen competitiveness;
- the potential for significant losses on Hitachi's investments in equity-method associates and joint ventures;
- uncertainty as to the outcome of litigation, regulatory investigations and other legal proceedings of which the Company, its subsidiaries or its equity-method associates and joint ventures have become or may become parties;
- the possibility of incurring expenses resulting from any defects in products or services of Hitachi;
- uncertainty as to Hitachi's access to, or ability to protect, certain intellectual property; and
- uncertainty as to the accuracy of key assumptions Hitachi uses to evaluate its employee benefit-related costs.

The factors listed above are not all-inclusive and are in addition to other factors contained elsewhere in this report and in other materials published by Hitachi.
