

Financial Results Explanatory Materials for the  
Fiscal Year Ended December 2025

Sun Asterisk Inc. | Securities code : 4053

Feb 13, 2026

## Summary of financial results for FY2025 and FY2026

### FY2025 Results

- Net sales were 14.83 billion yen (+9.3% YoY), gross profit was 7.18 billion yen (+3.2% YoY), operating profit was 1.05 billion yen (–27.1% YoY), and EBITDA was 1.26 billion yen (+0.5% YoY).
- Achievement rates against the revised full-year forecast were: net sales 98.6%, gross profit 99.6%, operating profit 104.0%, and EBITDA 98.0%.
- The specific unprofitable project was completed in the 3rd quarter, and the full-year gross profit margin for FY2025 was 48.5% (–2.8% YoY).
- SG&A expenses were 6.13 billion yen (+11.1% YoY), and results came in below the revised forecast level due to unutilized expenses and cost reductions.

### Progress of Growth Investments

- Growth investments and business activities in the AI domain progressed steadily.
- AI-powered development tools are being deployed internally, and proactive proposals to clients have led to an increase in the number of projects won.
- Growth investments and various initiatives are also being executed in the Incubation domain and the Sales/Marketing domain.

### Full-Year Earnings Forecast for FY2026

- IFRS (International Financial Reporting Standards) will be adopted from FY2026. The impact of the major items associated with the change in accounting standards is approximately +0.24 billion yen at the operating profit level compared with JGAAP.
- Under IFRS, net sales are 18.20 billion yen, gross profit 9.11 billion yen, operating profit 1.71 billion yen, and EBITDA 1.84 billion yen.
- Under JGAAP, net sales are 18.20 billion yen (+22.7% YoY), gross profit 9.11 billion yen (+26.8% YoY), operating profit 1.46 billion yen (+39.6% YoY), and EBITDA 1.84 billion yen (+46.5% YoY).
- Revenue growth is planned across each service line: C&E, TPF, and INC.

## What is a Digital Creative Studio?

# Digital Creative Studio

By integrating digital technologies, including AI, with creativity, we support the evolution of clients' businesses and organizations with optimal teams. Through DX and product development across a wide range of industries, we co-create value that updates society.

Supporting from business creation to service growth.

Sales composition ratio is based on FY2025 year-end results

## Functions of the Digital Creative Studio

A team of B, T, C professionals with multinational and diverse backgrounds

Co-creating businesses with clients by utilizing value-creating methods and know-how

A large number of professionals from diverse backgrounds

Professional

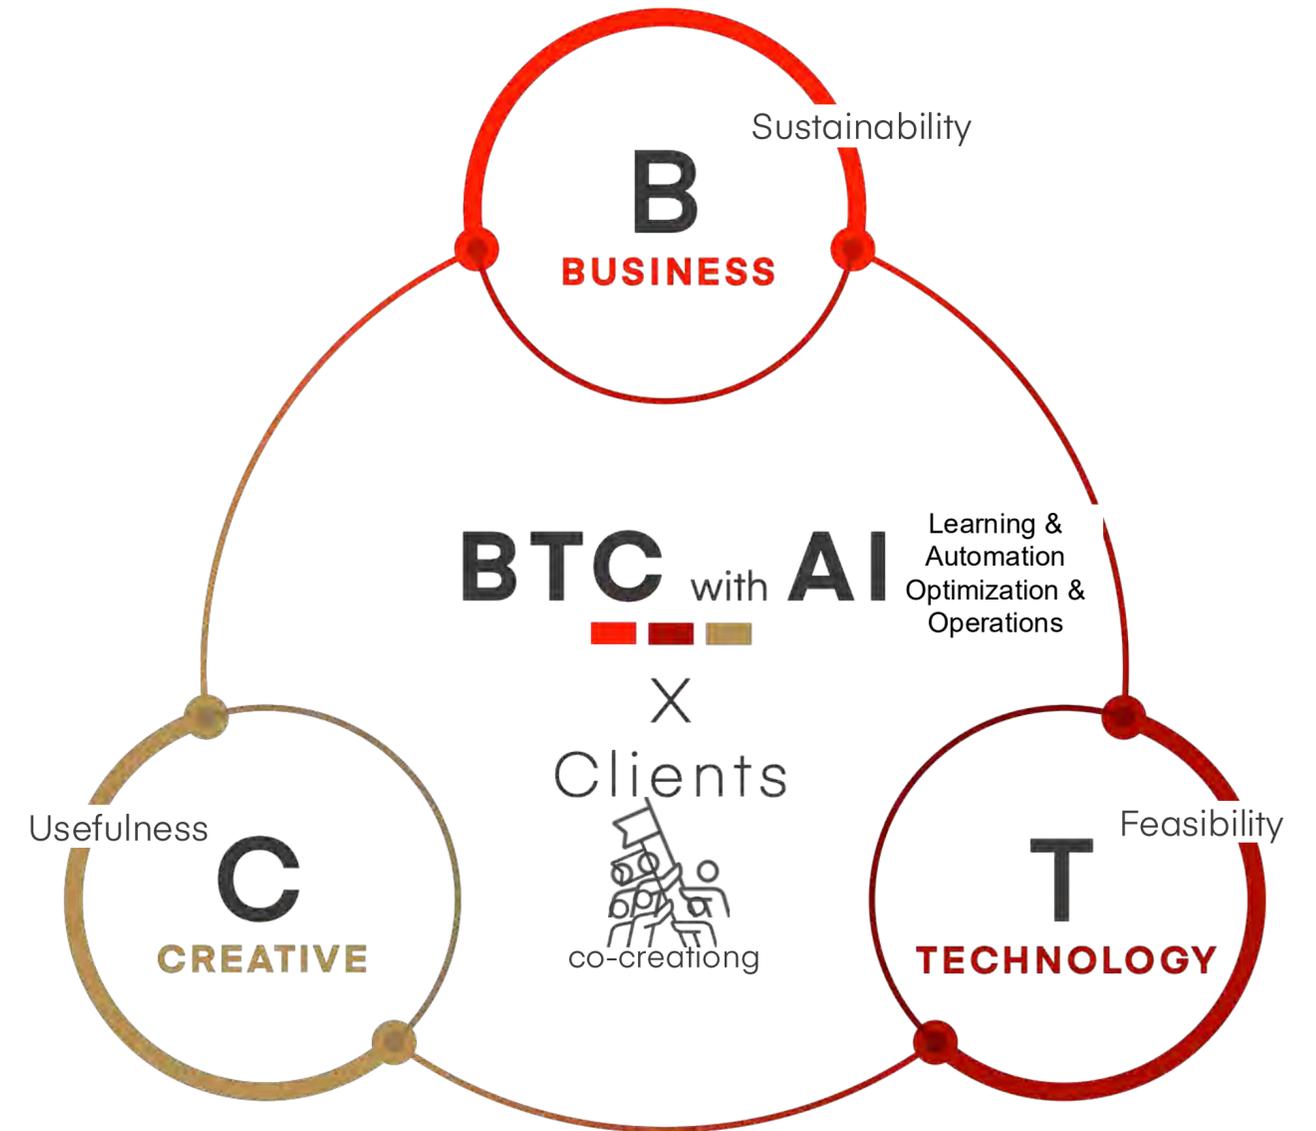

Business Consultant	PM (PdM)	Business Designer
Cloud / Architecture	Full-stack / Backend	AI / Data Design (including RAG)
Service Design	UX/UI Design	Content / Branding

Methods and know-how accumulated from our extensive experience

Methods Know-How

Design Thinking	Lean Startup	User-Centered Design
Agile	DevOps (CI/CD / Operations)	SRE / Observability
Generative AI (RAG / Agents)	AI Evaluation (Quality Testing)	Web3 (Blockchain / NFT)

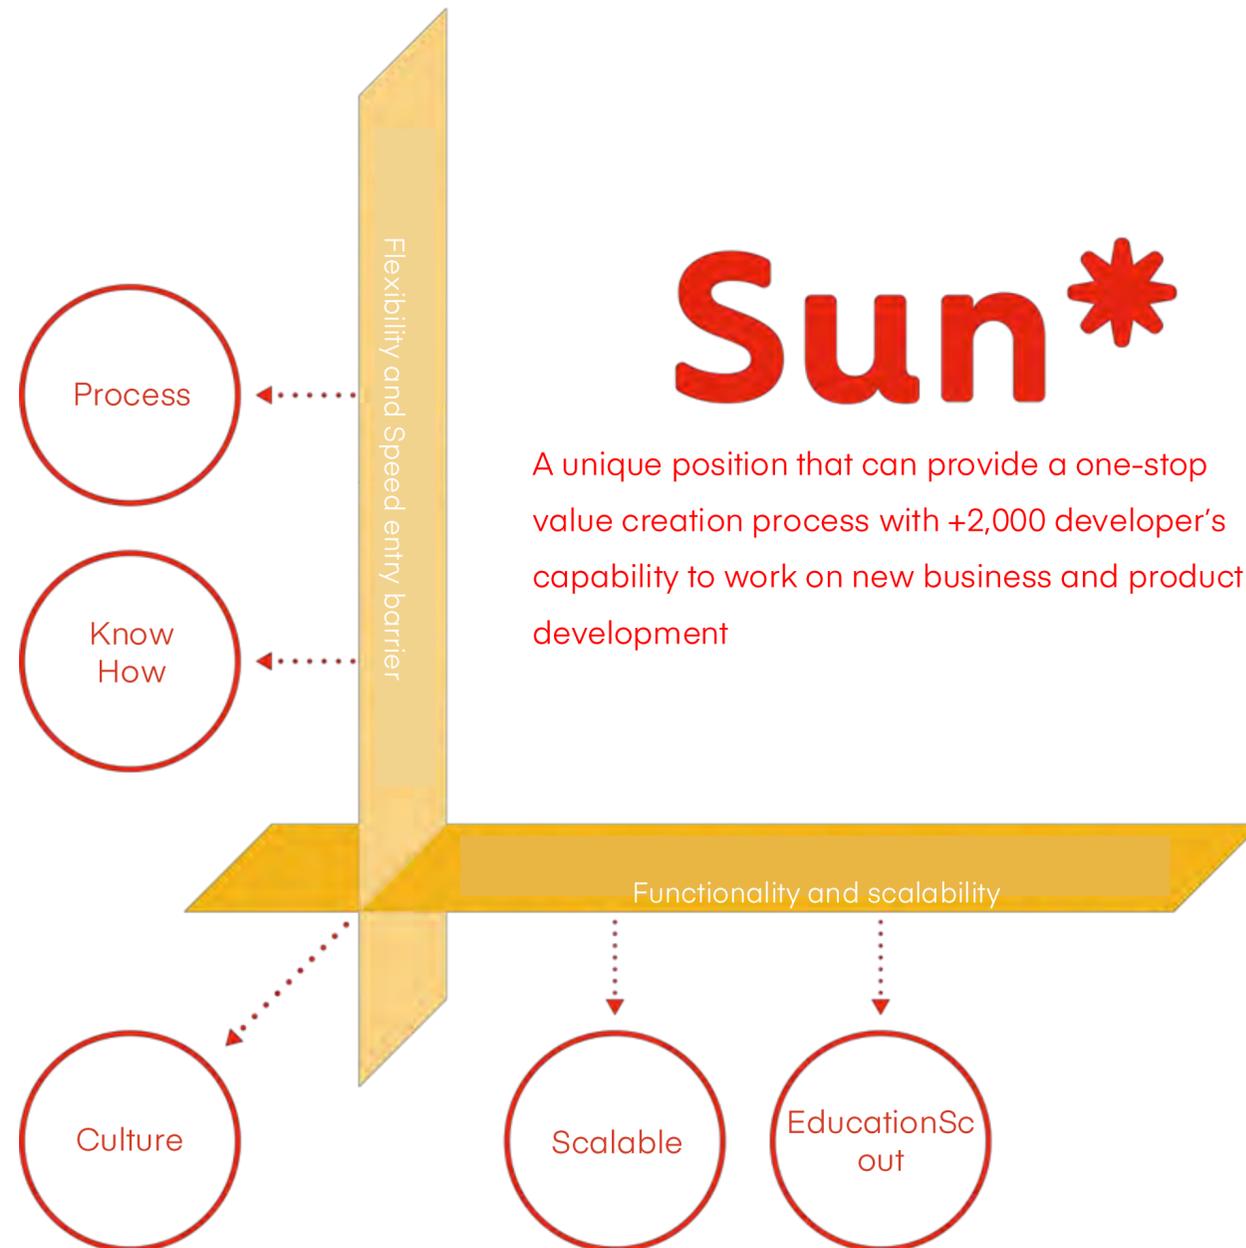

# Overview of the Digital Transformation Market Addressed by Sun\*

Comprehensive support for the two types of digital transformation

Classification	<b>Digitization</b>	<b>Digitalization</b>
Target	<p><b>Digitize the business process</b></p> <p>Improve business efficiency Operational efficiency improvements, automation, and standardization (automation and standardization using AI)</p>	<p><b>Digitalize the business</b></p> <p>Revenue Growth and Business Transformation (Leveraging AI and Data) New Value Creation and Growth through AI / Product Growth</p>
Requirement	<b>Stability and Quality</b>	<b>Flexibility and Speed</b>
Method	<p><b>Problem solving</b></p> <p>Identify problems, organize business flow, design a system of requirement definition, apply a system of Waterfall development, and maintain, measure, improve effectiveness</p>	<p><b>Digitalization</b></p> <p>Use design thinking to create new ideas. Lean startup, MVP development, Agile development. High speed DevOps system and Operation</p>
Key Company in the Sun* Group	  	   

## Sun\* Uniqueness in DX Market

Unique position to provide one-stop new business/product development

### Process • Know-how

Value creation processes that have been repeatedly refined through development using design thinking, Lean Startup, and agile approaches, and reproducibility through a data platform that has accumulated know-how from more than 1,000 development projects, mainly for new businesses and products

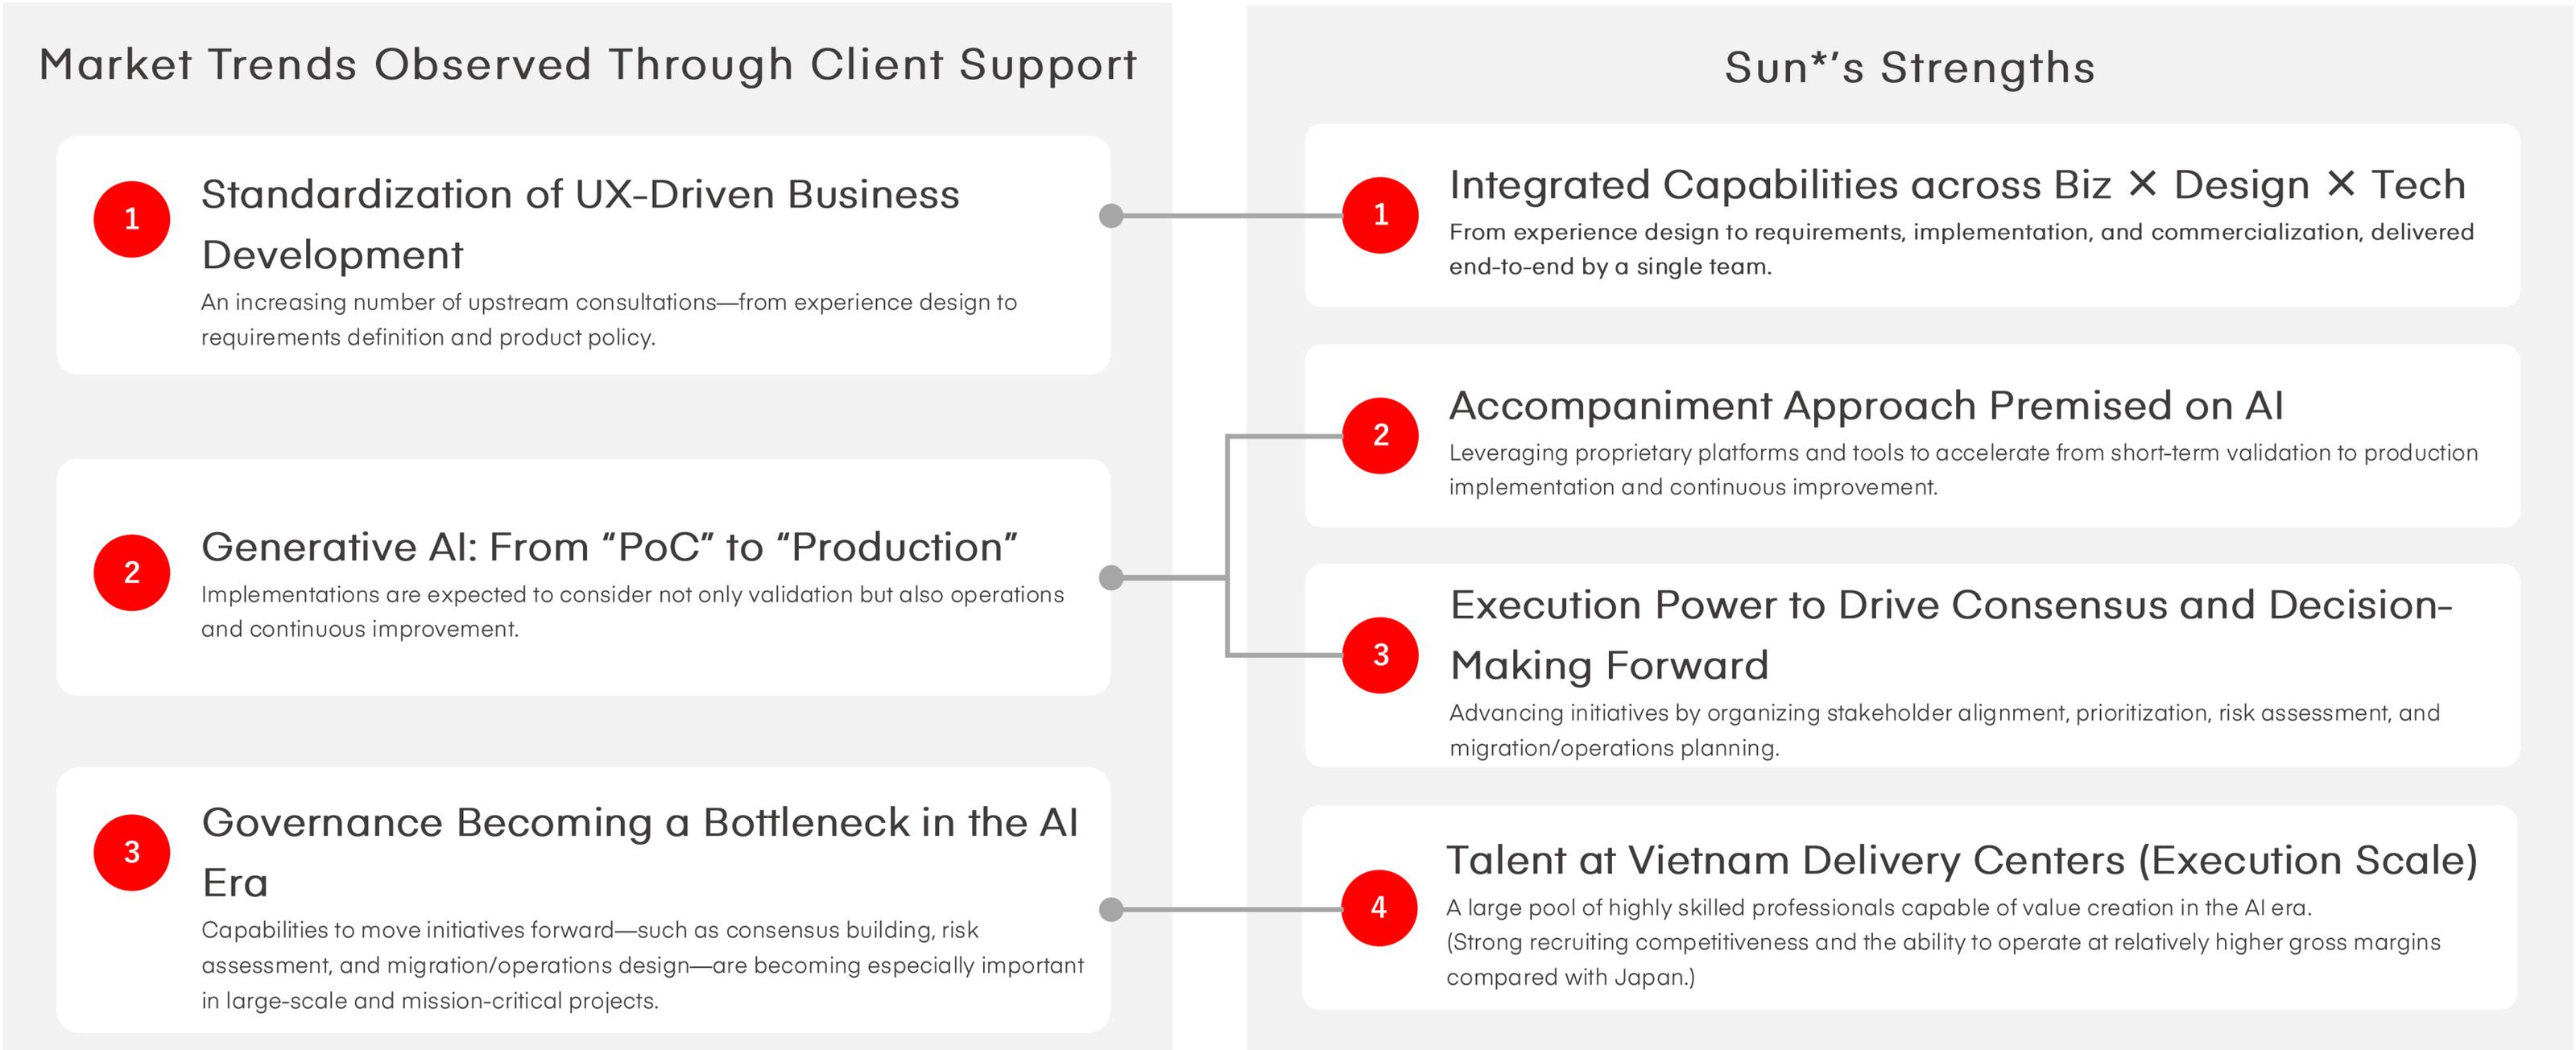

### Culture

Accelerate collaboration with people, products, and things that seriously tackle social issues, and create an open and strong culture where people can immerse themselves in value creation.

### Scalability

More than 1,500 B, T, and C professionals in our organization. Ability to identify and develop human resources by leveraging value creation processes and know-how, and building training ecosystems in collaboration with educational institutions.

## Market Trends Observed Through Client Support and Sun\*'s Strengths

In response to market trends, we will continuously support clients' value creation by building on our traditional strength of integrated Biz × Design × Tech support and Vietnam-based large-scale development resources, while enabling the utilization and development of talent capable of leveraging AI tools and AI.

# DX Promotion and New Business Development Support Case: TRUSTDOCK Inc.

Provided end-to-end support from requirements organization to design and implementation for the launch of a new business.

## “Careefy,” a job-matching service ensuring reliability through eKYC technology and AI utilization

TRUSTDOCK, which has offered Japan’s first identity verification API “TRUSTDOCK” and developed digital ID wallet applications compliant with public personal authentication and eKYC, as well as KYC infrastructure compliant with regulations, launched “Careefy” as a new business applying its core technologies to the recruitment market.

The service provides a highly transparent matching platform in which job seekers present verified profiles based on official documents, and companies conduct hiring activities using reliable information. Sun\* participated in this advanced initiative as a development partner, providing consistent support from the business planning stage through requirements definition, screen design, development assistance, and validation of generative AI utilization, accompanying the project through its official release in October 2025 while realizing both reliability and an excellent user experience.

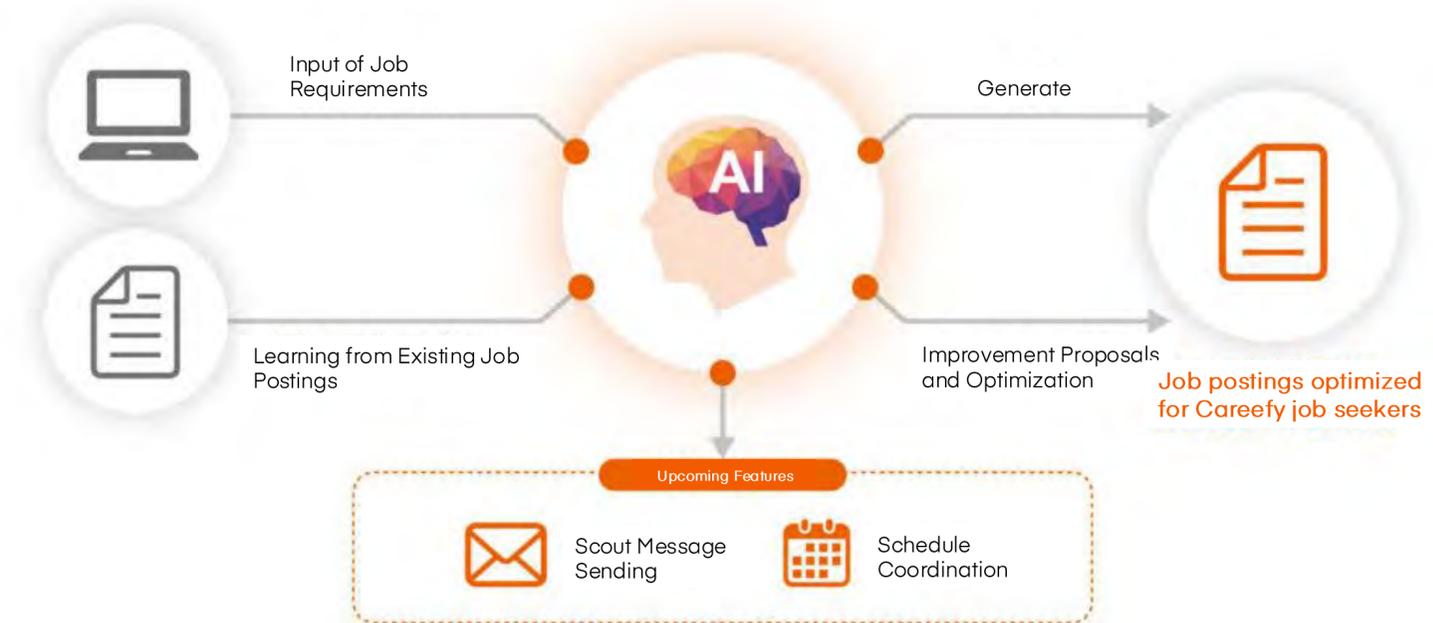

### ISSUE

It was necessary to proceed with development without clearly defined levels of detail or structural rules for screen design documentation, which posed risks of reduced review efficiency and rework. In addition, for generative AI utilization, it was necessary to define and establish evaluation criteria and a quality assurance framework to ensure practical accuracy. Within a limited budget and schedule, flexible project management was required to rapidly build consensus on functional priorities and specification adjustments while visualizing development progress.

### SOLUTION

Beyond simple development support, Sun\* participated from the business planning stage and led the organization of functional and UX requirements, supporting designs that align user experience with identity verification processes. In screen design using Figma, a review framework was established with unified documentation granularity and description rules to streamline coordination with the development process. Furthermore, validation of design support using generative AI was conducted, assisting in the development of evaluation criteria and quality check frameworks for deliverables. Through daily meetings and visualization of progress, Sun\* continuously supported specification adjustments and prioritization.

# DX Promotion and New Business Development Support Case: FLEET PITLOCK Inc.

Supporting the foundation building for DX and BPO—from cross-industry consensus building to the construction of standardized APIs.

## Development Support for the Automotive Maintenance Platform "FLEET PITLOCK"

The shared platform "FLEET PITLOCK (FPL)," joined by major companies in the corporate automotive leasing industry, connects operational data—such as vehicle and contract information, maintenance reservations, and billing—between leasing companies and repair shops, aiming to reduce on-site workload and improve productivity across the industry. Because differing business workflows and system specifications among participating companies needed to be translated into an "industry standard," the project required both consensus building and architectural implementation, making it a highly complex initiative. Sun\* took over from a major development vendor, rebuilt the project structure, and implemented approximately 300 functions, including core system integration and centralized billing. From both business and technical perspectives, Sun\* supported the establishment of a foundation enabling the back-office operation (BPO) of repair shops.

UI/UX Design   Requirements Definition   Specification Development   Architecture Design   Development Implementation   Enterprise

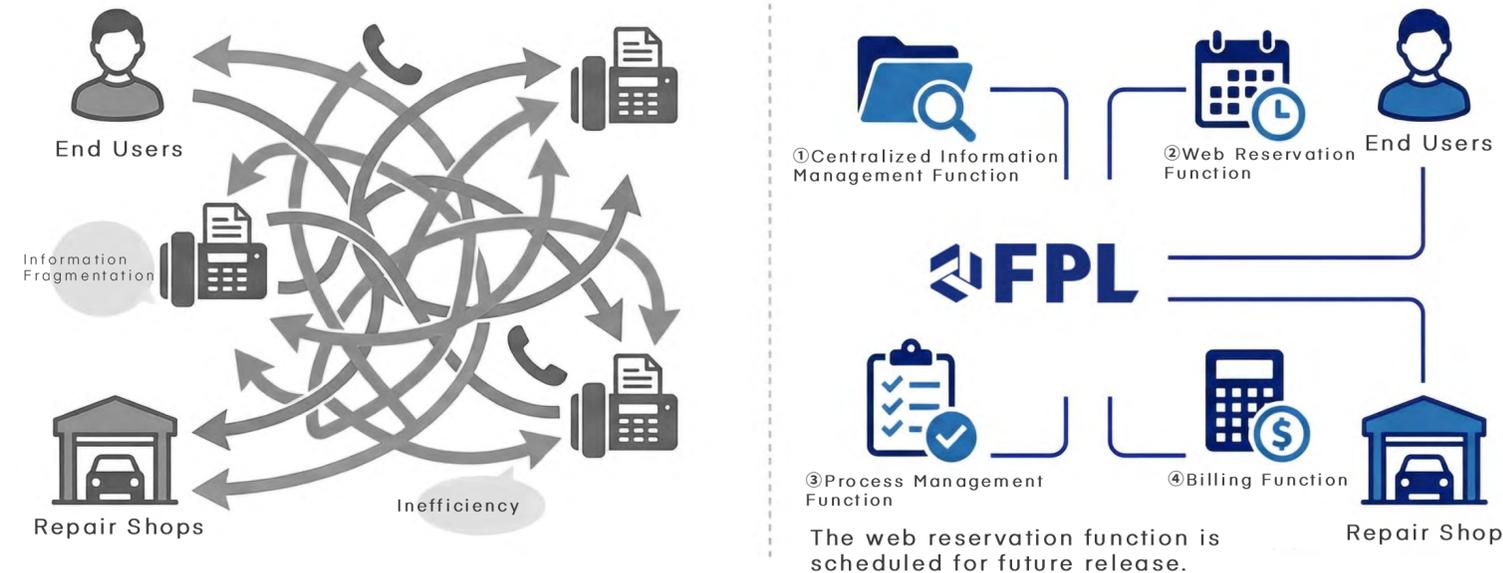

### ISSUE

As a cross-industry collaborative platform, it was necessary to first reach agreement on what should be standardized among the differing systems, data structures, and operational workflows of each participating company, and then implement it in a scalable manner that would not break as participation increased. Large data volumes and unexpected cases caused batch import errors and display inconsistencies. Additionally, amid labor shortages at repair sites, resolving phone/FAX coordination and duplicate data entry across multiple systems became urgent, with administrative workload approaching its limit.

### SOLUTION

Sun\* advanced the organization of decision-making criteria and a review of the existing architecture in parallel, with the goal of translating "what to standardize" into implementation. By establishing a common framework capable of absorbing differences among participating companies and conducting ongoing meetings and workshop-style sessions, Sun\* supported consensus building. Through loose coupling and clear API boundary definitions, introduction of a BRMS to localize the impact of changes, security infrastructure enhancement and penetration testing, and the establishment of post-handover review, testing, and release procedures, Sun\* helped build a development structure capable of continuous operation.

### Conventional Management: Fragmented and Complex Connections   With FPL: Unified and Streamlined Workflows

**Results for the Fiscal Year Ended December 2025**

## Summary of Full-Year Results for FY2025

### Net Sales

- Net sales were 14.83 billion yen (+9.3% YoY), with an achievement rate of 98.6% against the revised full-year forecast.
- Compared with the previous fiscal year, C&E recorded an increase in order value, TPF saw higher unit prices and utilization headcount for Sun Terras (SES), and Incubation recognized revenue from Global Gear, which newly joined the Group from the 3rd quarter.
- The number of unique C&E clients increased by 13 year on year to 285, and ARPU remained at a similar level at 5.06 million yen.

### Gross Profit

- Gross profit was 7.18 billion yen (+3.2% YoY), with an achievement rate of 99.6% against the revised full-year forecast.
- The impact on cost of sales from the use of external partners in a specific project ended in the 3rd quarter.
- The gross profit margin recovered in the 3rd and 4th quarters, reaching 48.5% for the full year.

### Operating Profit

- Operating profit was 1.05 billion yen (-27.1% YoY), with an achievement rate of 104.0% against the revised full-year forecast.
- EBITDA was 1.26 billion yen (+0.5% YoY), with an achievement rate of 98.0% against the revised full-year forecast.
- SG&A expenses came in at 6.13 billion yen, below the revised full-year forecast due to cost reductions and unutilized budget.

### Ordinary Profit

- Ordinary profit was 0.99 billion yen (-31.4% YoY), with an achievement rate of 92.1% against the revised full-year forecast.
- The yen appreciated during the period, and the average exchange rate for the fiscal year was 0.00570 yen, a decrease of 0.0003 yen year on year and +0.0001 yen versus the revised forecast.

## FY2025 Full-Year Results: Net Sales and Profit by Stage

Net sales came in at 14.83 billion yen (98.6% of the revised full-year forecast), as TPF and INC fell short of the revised projections.

Gross profit was 7.18 billion yen (achievement rate 99.6%), and operating profit was 1.05 billion yen (achievement rate 104.0%) due to SG&A expenses coming in below the revised forecast.

Net income attributable to owners of parent was 0.47 billion yen (achievement rate 56.2%), reflecting a decrease in ordinary profit due to foreign exchange losses and the reversal of deferred tax assets.

Unit : Million Yen	FY2024	FY2025	Rate of Change	Revised Financial Forecast	Achievement rate
Net Sales	13,568	14,835	+9.3%	15,053	98.6%
Gross profit	6,965	7,189	+3.2%	7,216	99.6%
Gross profit margin	51.3%	48.5%	—	47.9%	—
EBITDA <sup>(1)</sup>	1,255	1,262	+0.5%	1,288	98.0%
Operating income	1,444	1,052	(27.1%)	1,012	104.0%
Operating margin	10.6%	7.1%	—	6.7%	—
Ordinary income	1,454	998	(31.4%)	1,084	92.1%

(1)EBITDA : Operating income + Depreciation and amortization + Amortization of goodwill

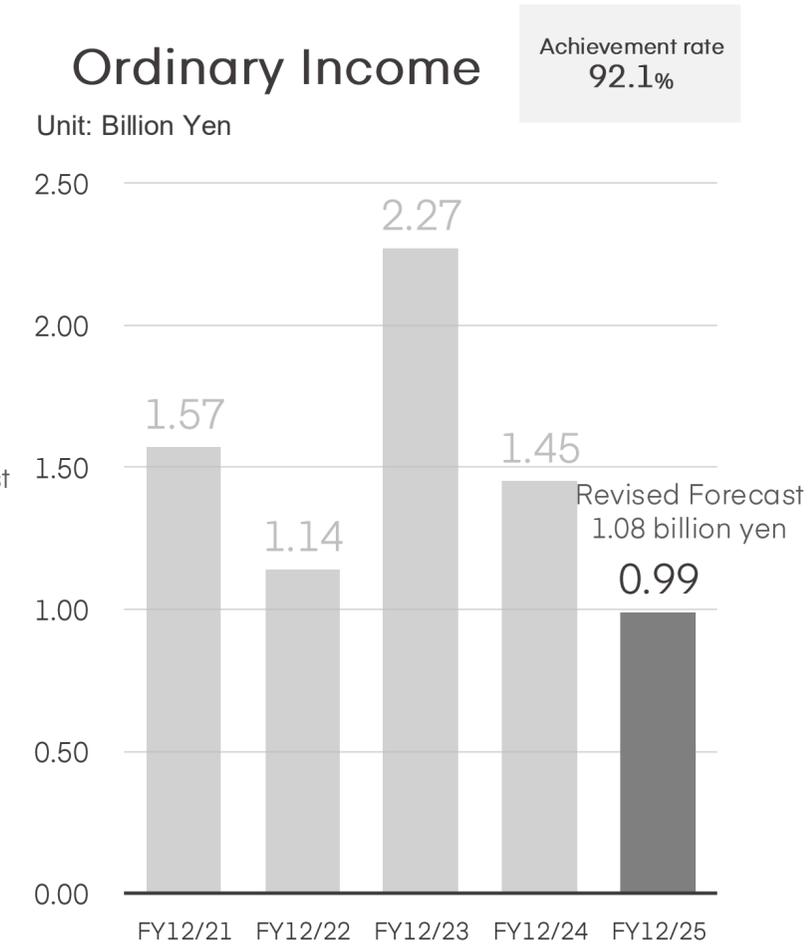

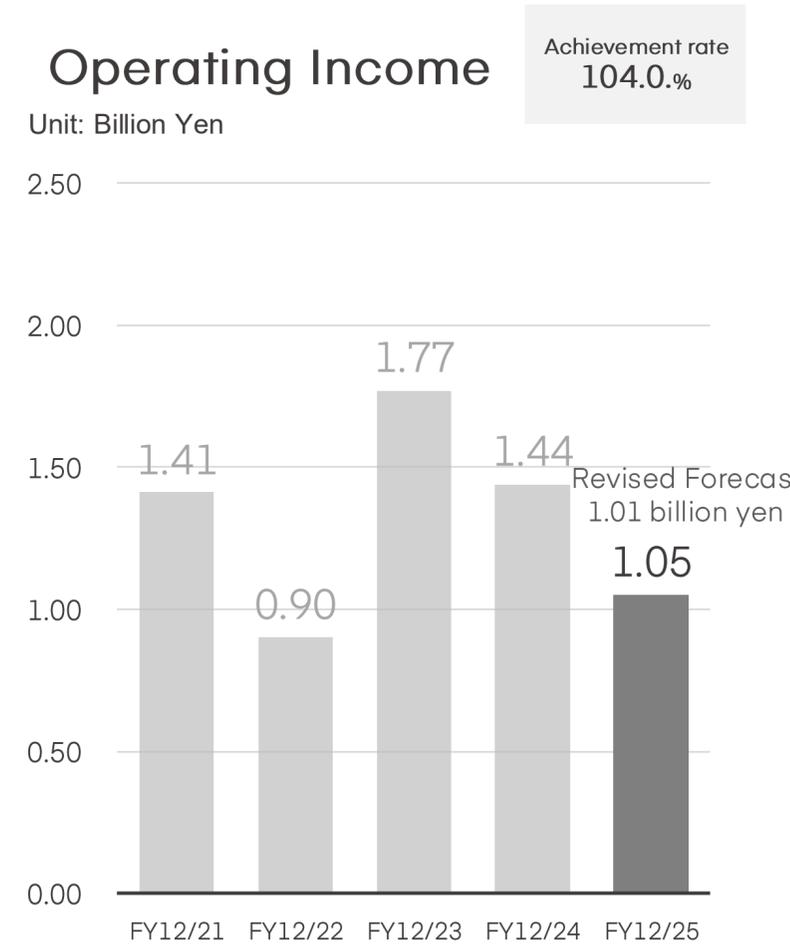

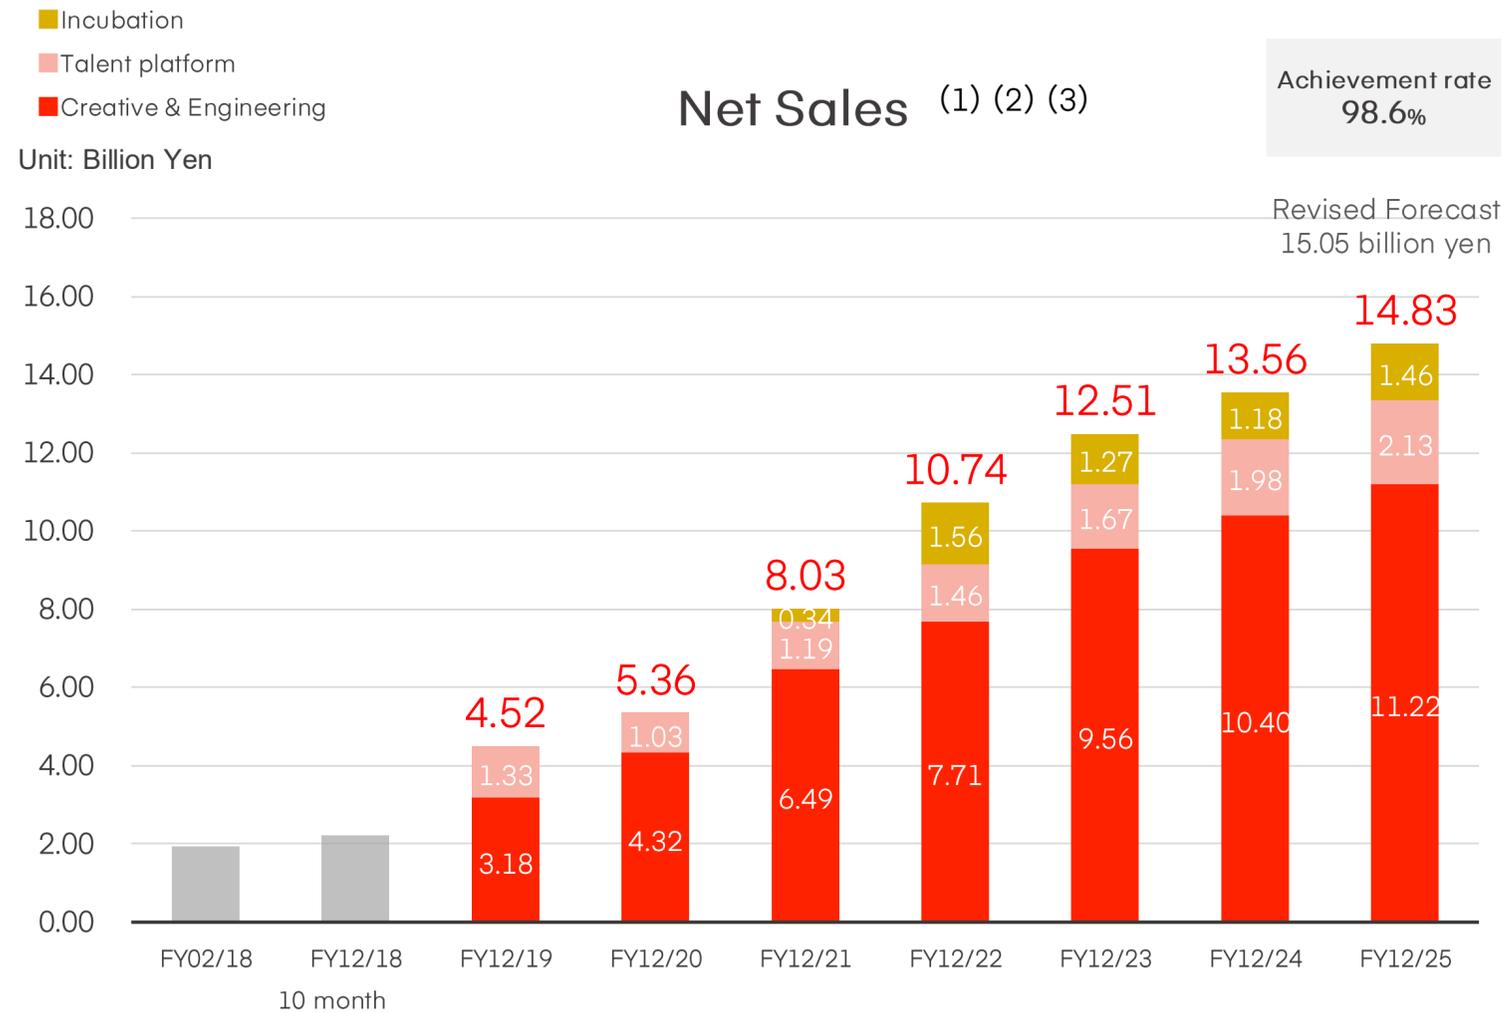

## FY2025 Full-Year Results: SG&A Expenses

SG&A expenses totaled 6.13 billion yen (+11.1% YoY) and remained below the revised forecast level. Compared with the previous fiscal year, outsourcing expenses increased due to sales support and professional fees, selling expenses increased mainly from advertising and promotion costs, and other SG&A expenses increased primarily due to goodwill amortization.

Breakdown of SG&A Expenses	FY2024		FY2025		YoY Change	Point
	Result	Composition ratio	Result	Composition ratio		
Unit : Million Yen						
Personnel expense	4,003	72.5%	4,303	70.1%	+7.5%	Increase in headcount and employee stock-based compensation expenses
Recruiting expenses	269	4.9%	272	4.4%	+1.1%	Focused hiring of particularly necessary talent
Outsourcing expenses	255	4.6%	408	6.7%	+59.9%	Increase due to external sales support and use of professional services
Sales activity expenses (excluding recruiting expenses)	195	3.5%	279	4.6%	+43.0%	Increase in advertising and promotion expenses
Facility expenses	590	10.7%	638	10.4%	+8.2%	Increase in system-related expenses
Other SG&A	207	3.8%	234	3.8%	+12.7%	Increase in goodwill amortization
<b>Total</b>	<b>5,521</b>	<b>100.0%</b>	<b>6,136</b>	<b>100.0%</b>	<b>+11.1%</b>	

## Trends in Net Sales, Operating Income, and Ordinary Income

Achievement rates against the revised full-year forecast were 98.6% for net sales, 104.0% for operating income, and 92.1% for ordinary income. Although net sales continued to grow and increased year on year, operating income and ordinary income declined due to the impact of a specific unprofitable project and other factors.

(1) FY 12/2018 is 10 month fiscal year period due to change in accounting period

(2) Net sales history presents non-consolidated before FY2/2018

(3) Merged GROOVE GEAR Inc in 2018/12, it reflects FY12/2019, before internal transaction, GROOVE GEAR revenue is 1.144 billion yen and net income is 60 million yen

\* The figures before the fiscal year ending February 2018 have not been audited by an audit corporation.

## Net Sales (quarterly trends)

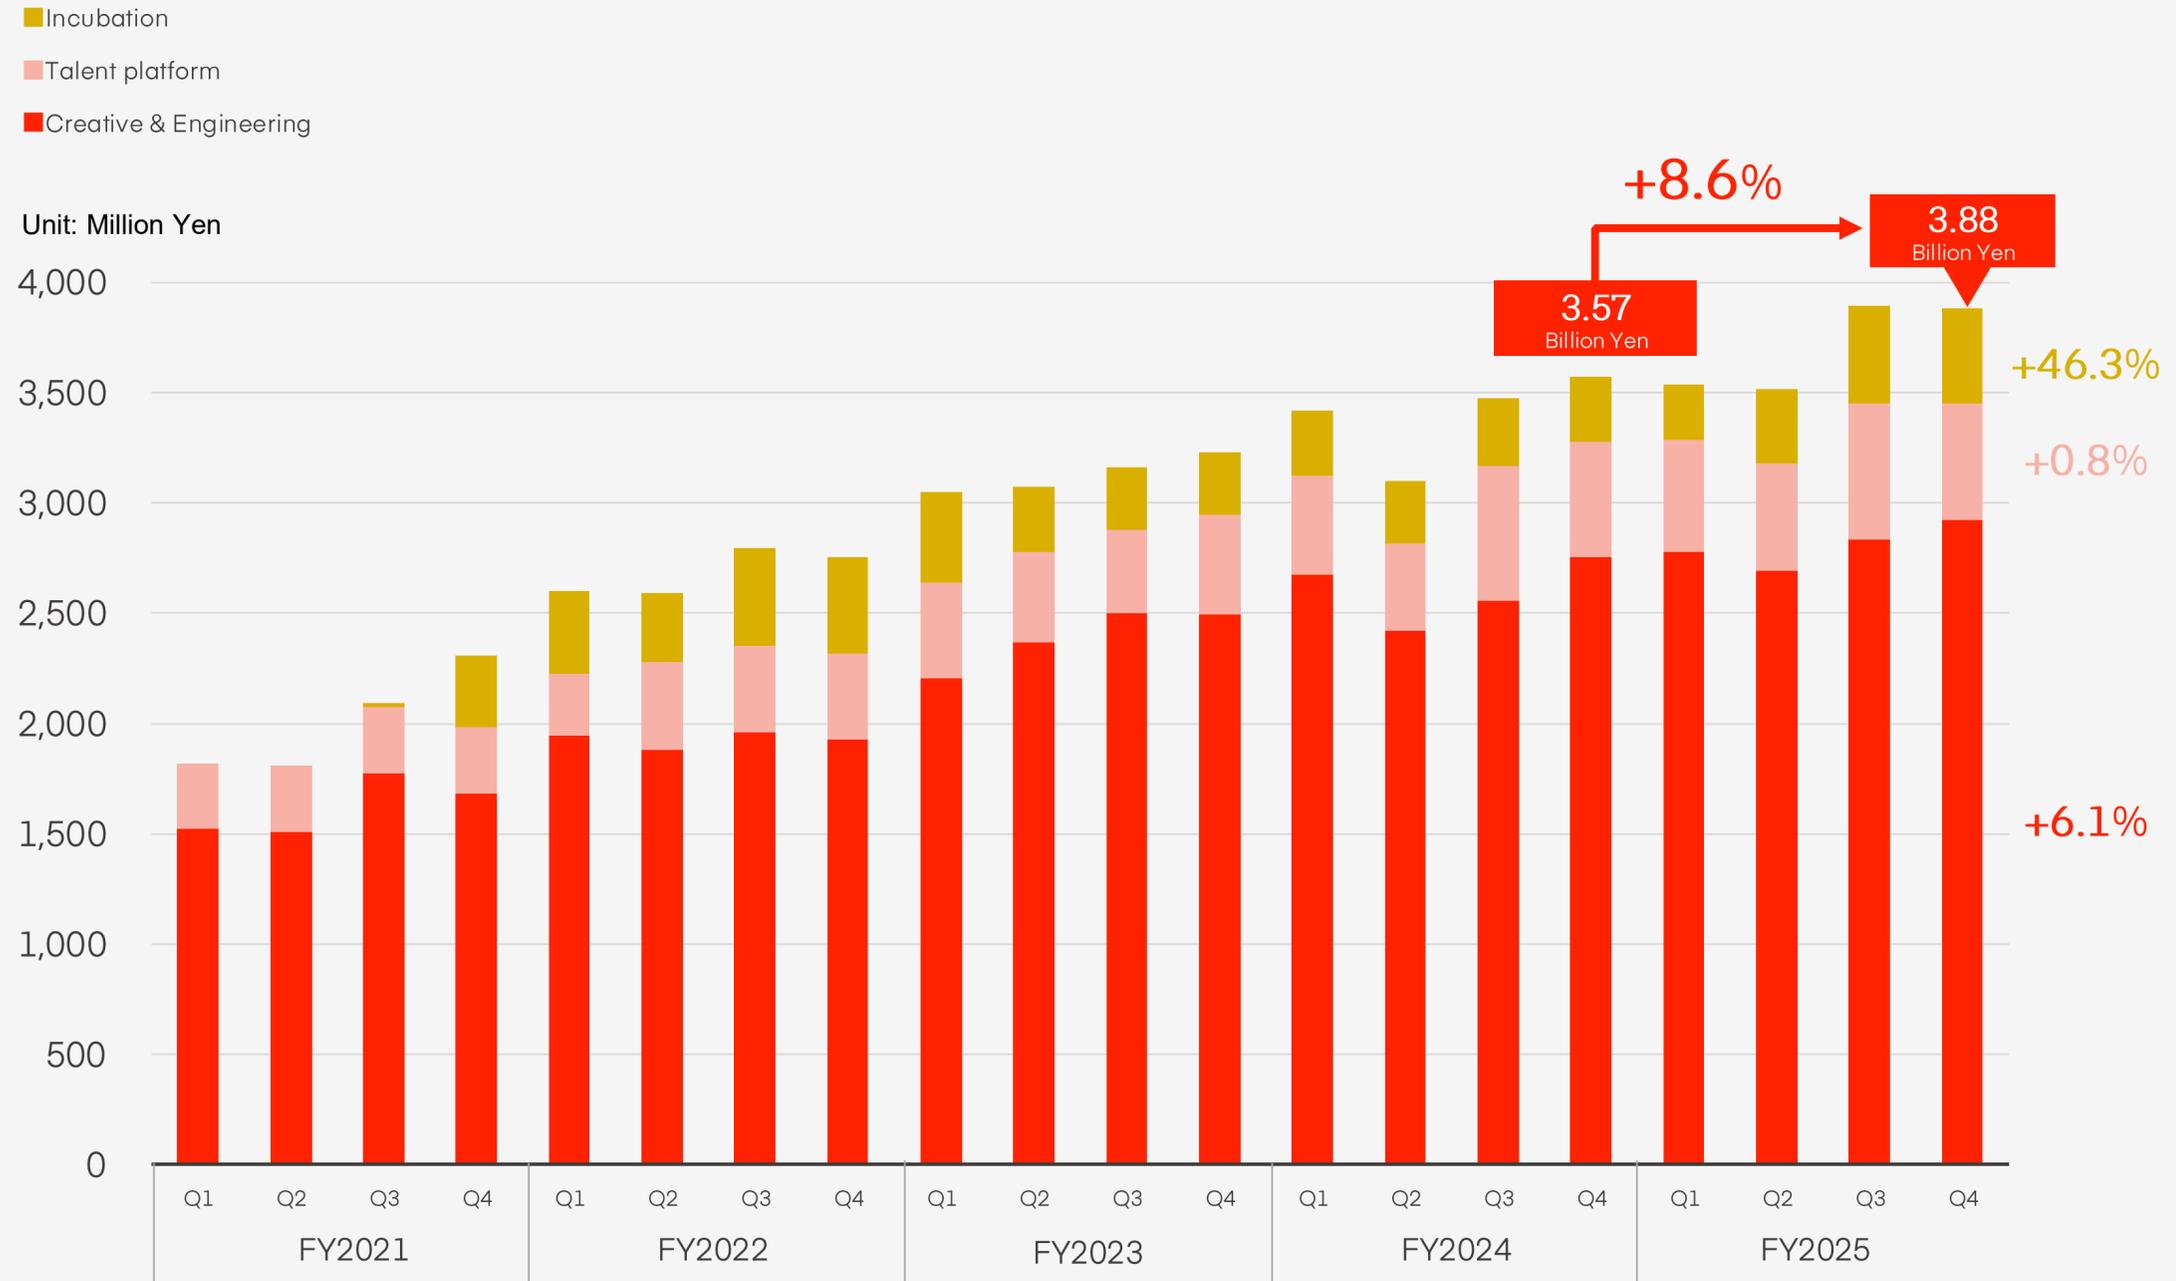

Sales in FY25-Q4

**3.88 Billion Yen**  
 (+8.6% YoY)

Creative & Engineering  
 +6.1% YoY  
 Increase in order value

Talent Platform  
 +0.8% YoY  
 SES business remained solid; however, revenue decreased quarter on quarter due to seasonality in the Vietnam HR placement business.

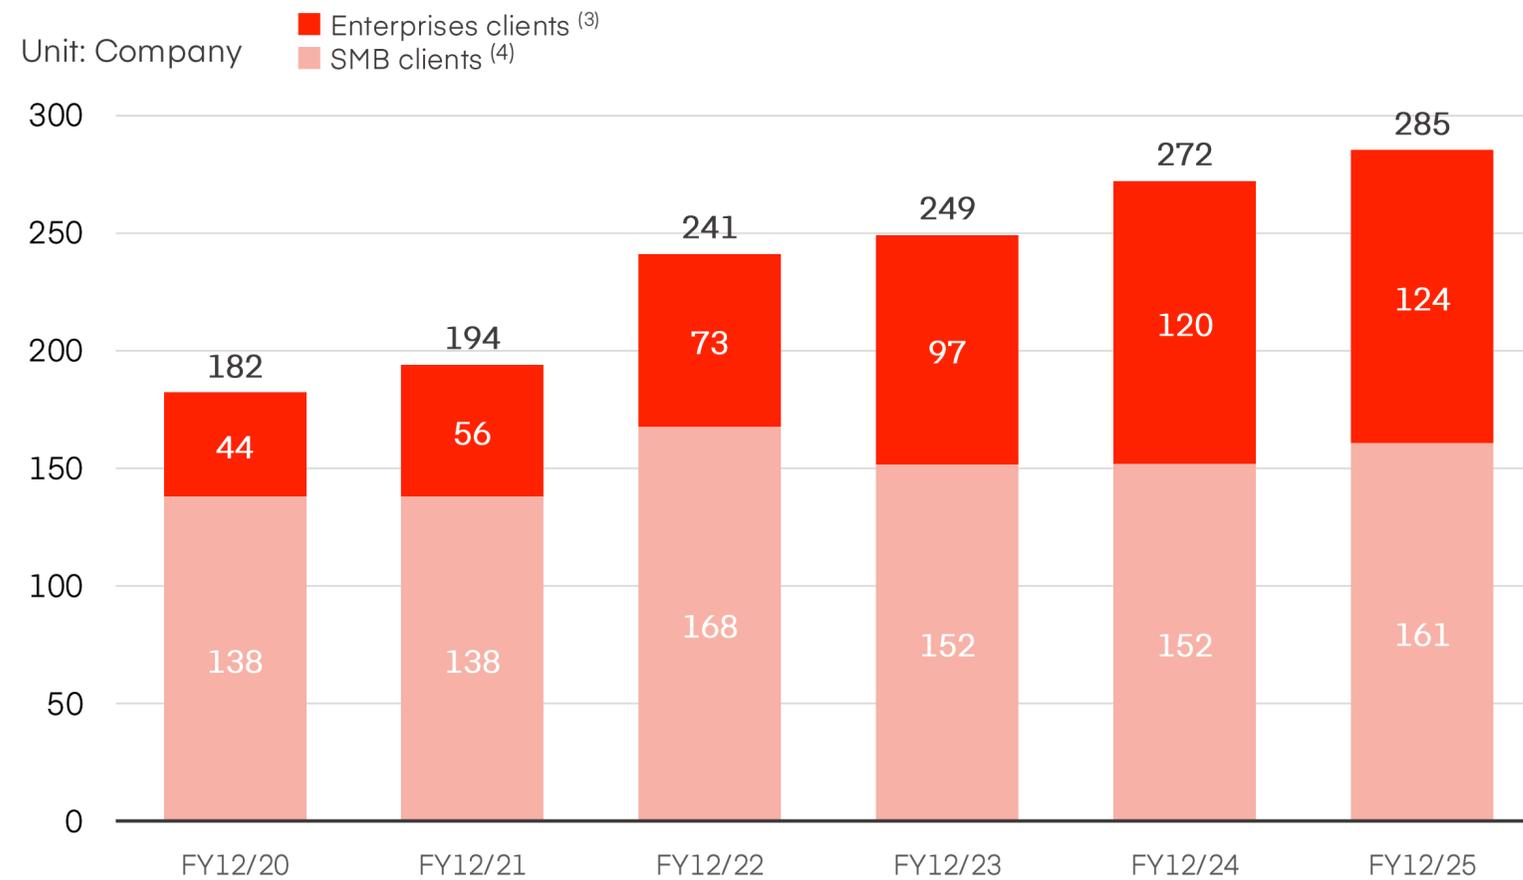

Incubation  
 +46.3% YoY  
 Revenue from Global Gear, which newly joined the Group, has been recognized since the 3rd quarter.

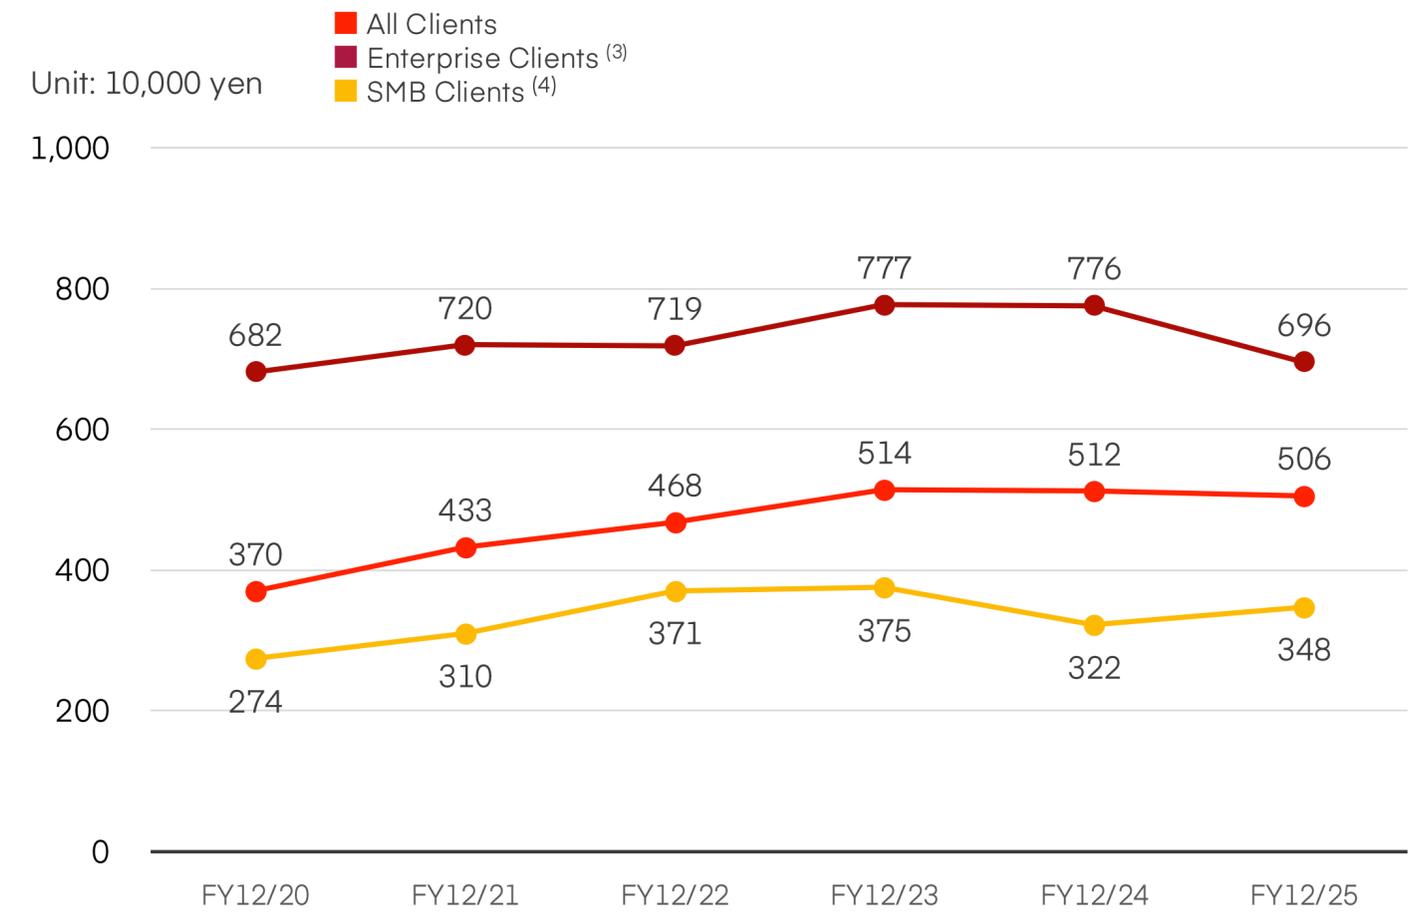

## Trends in Key KPIs (Full Year)

The number of unique clients increased by 13 year on year to 285. ARPU remained at a similar level year on year at 5.06 million yen.

### Trends in the Number of Unique clients <sup>(1)</sup>

### Monthly ARPU Trends <sup>(2)</sup>

(1) The actual number of clients that conducted transactions during the period

(2) Total net sales for the period ÷ cumulative number of transacting clients during the same period

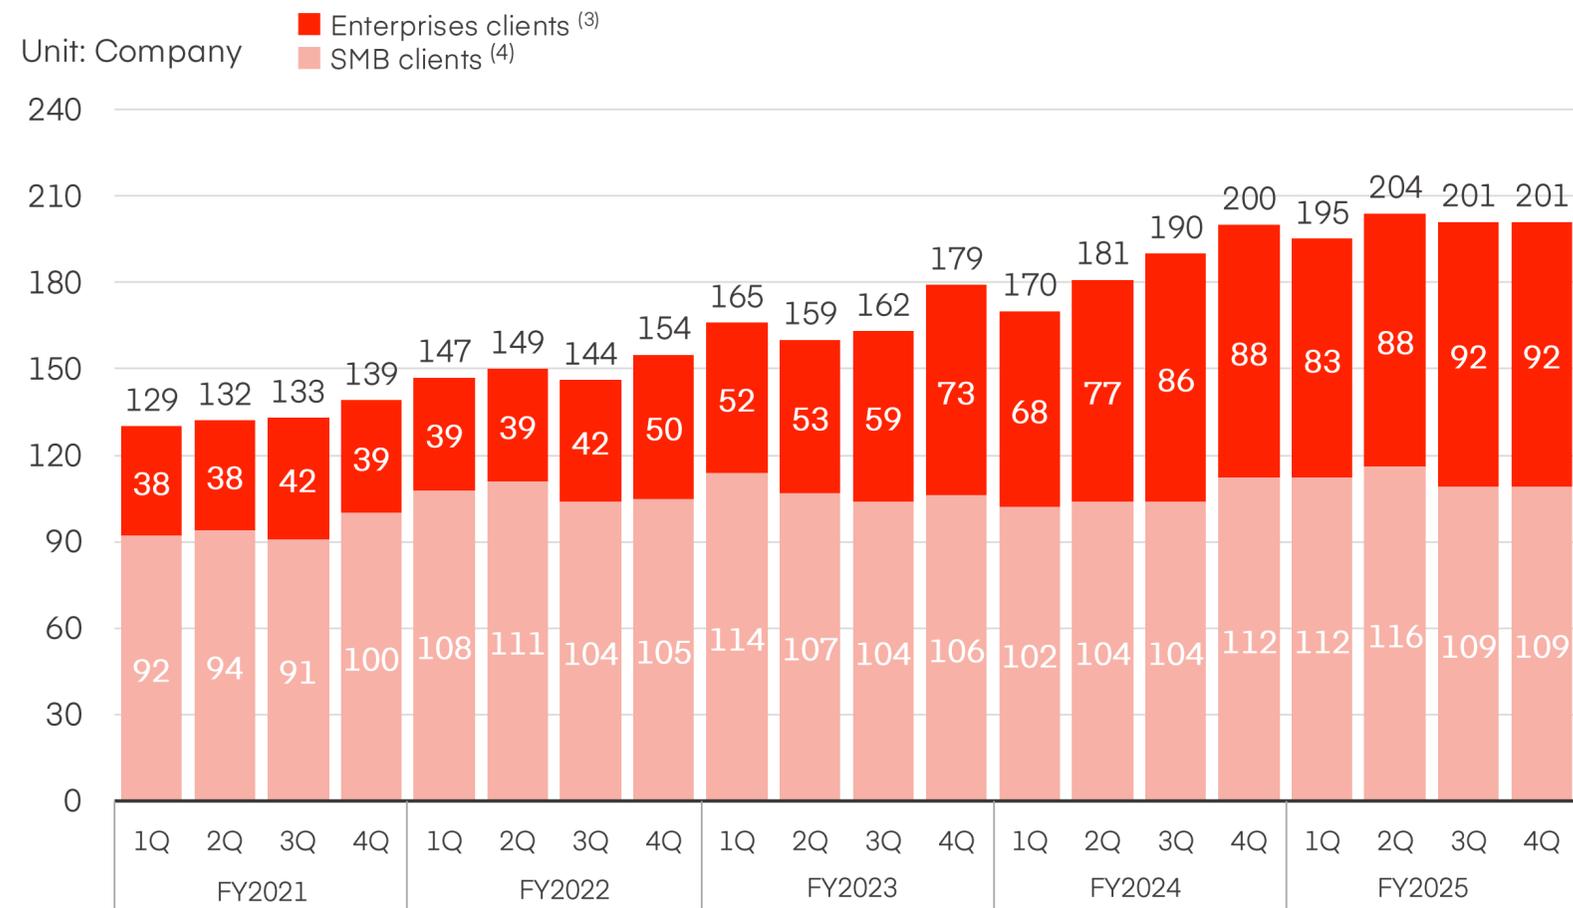

(3) Enterprise: Listed companies included in the Nikkei 225, Nikkei 400, or Nikkei 500 indices, as well as their group companies, or companies of comparable market capitalization, revenue scale, or employee size

(4) SMB: Abbreviation for Small and Medium-sized Business; all companies other than those defined as Enterprise by the Company

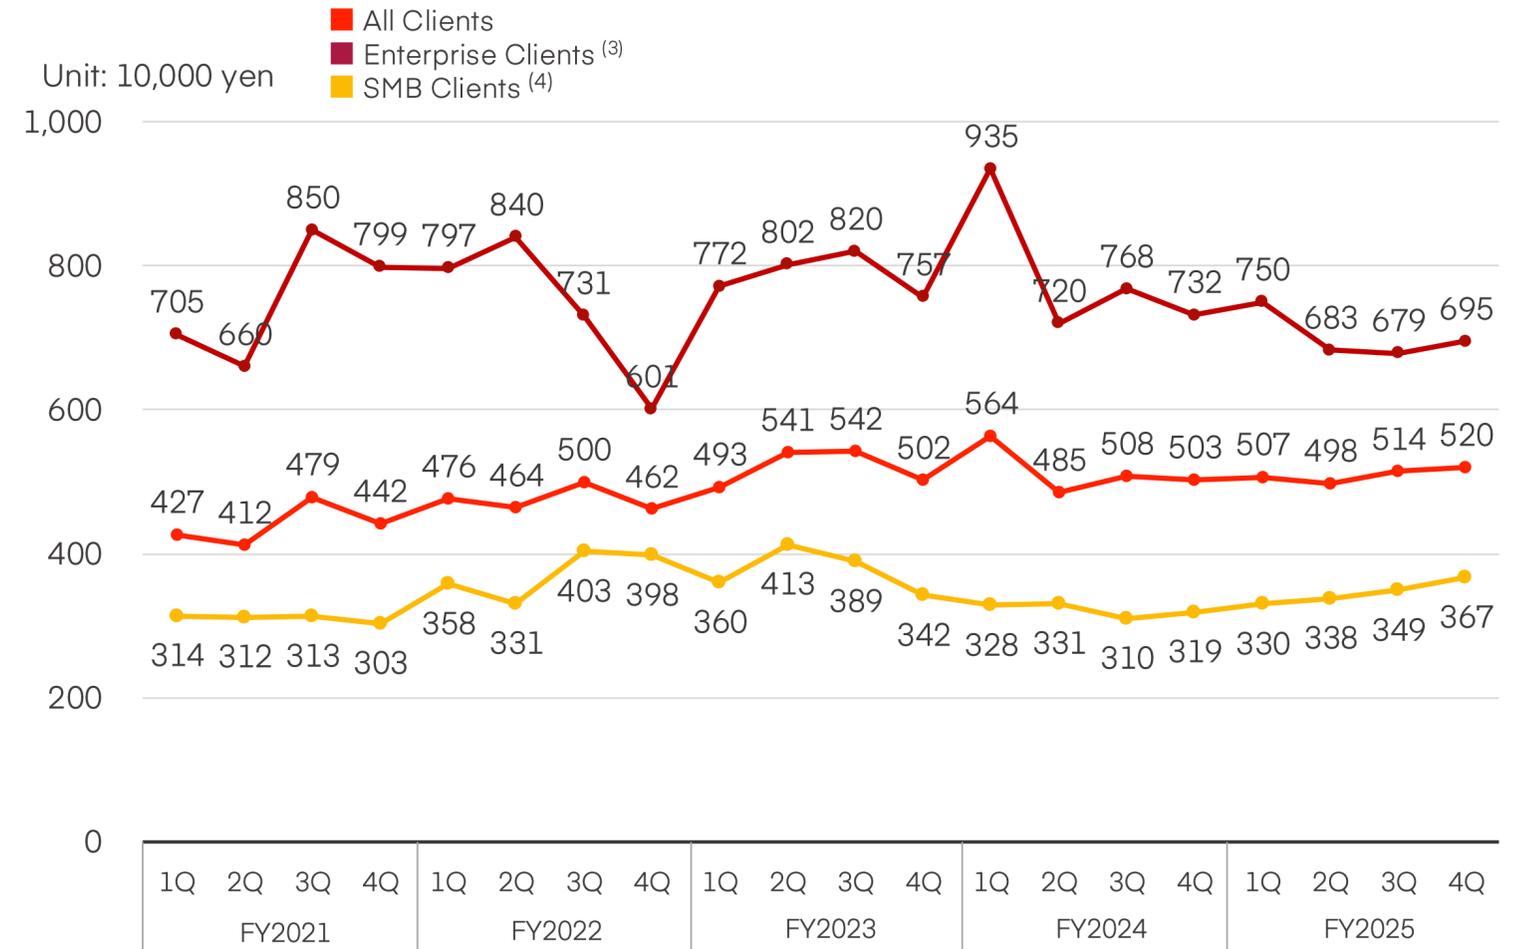

## Trends in Key KPIs (Quarterly)

The number of unique clients continued to increase.  
ARPU has remained at a similar level since FY2024 Q3.

### Trends in the Number of stock-type clients (1)

### Monthly ARPU Trends (2)

(1) The actual number of clients that conducted transactions during the period (quarter)

(2) Total net sales for the period (quarter) ÷ cumulative number of transacting clients during the same period

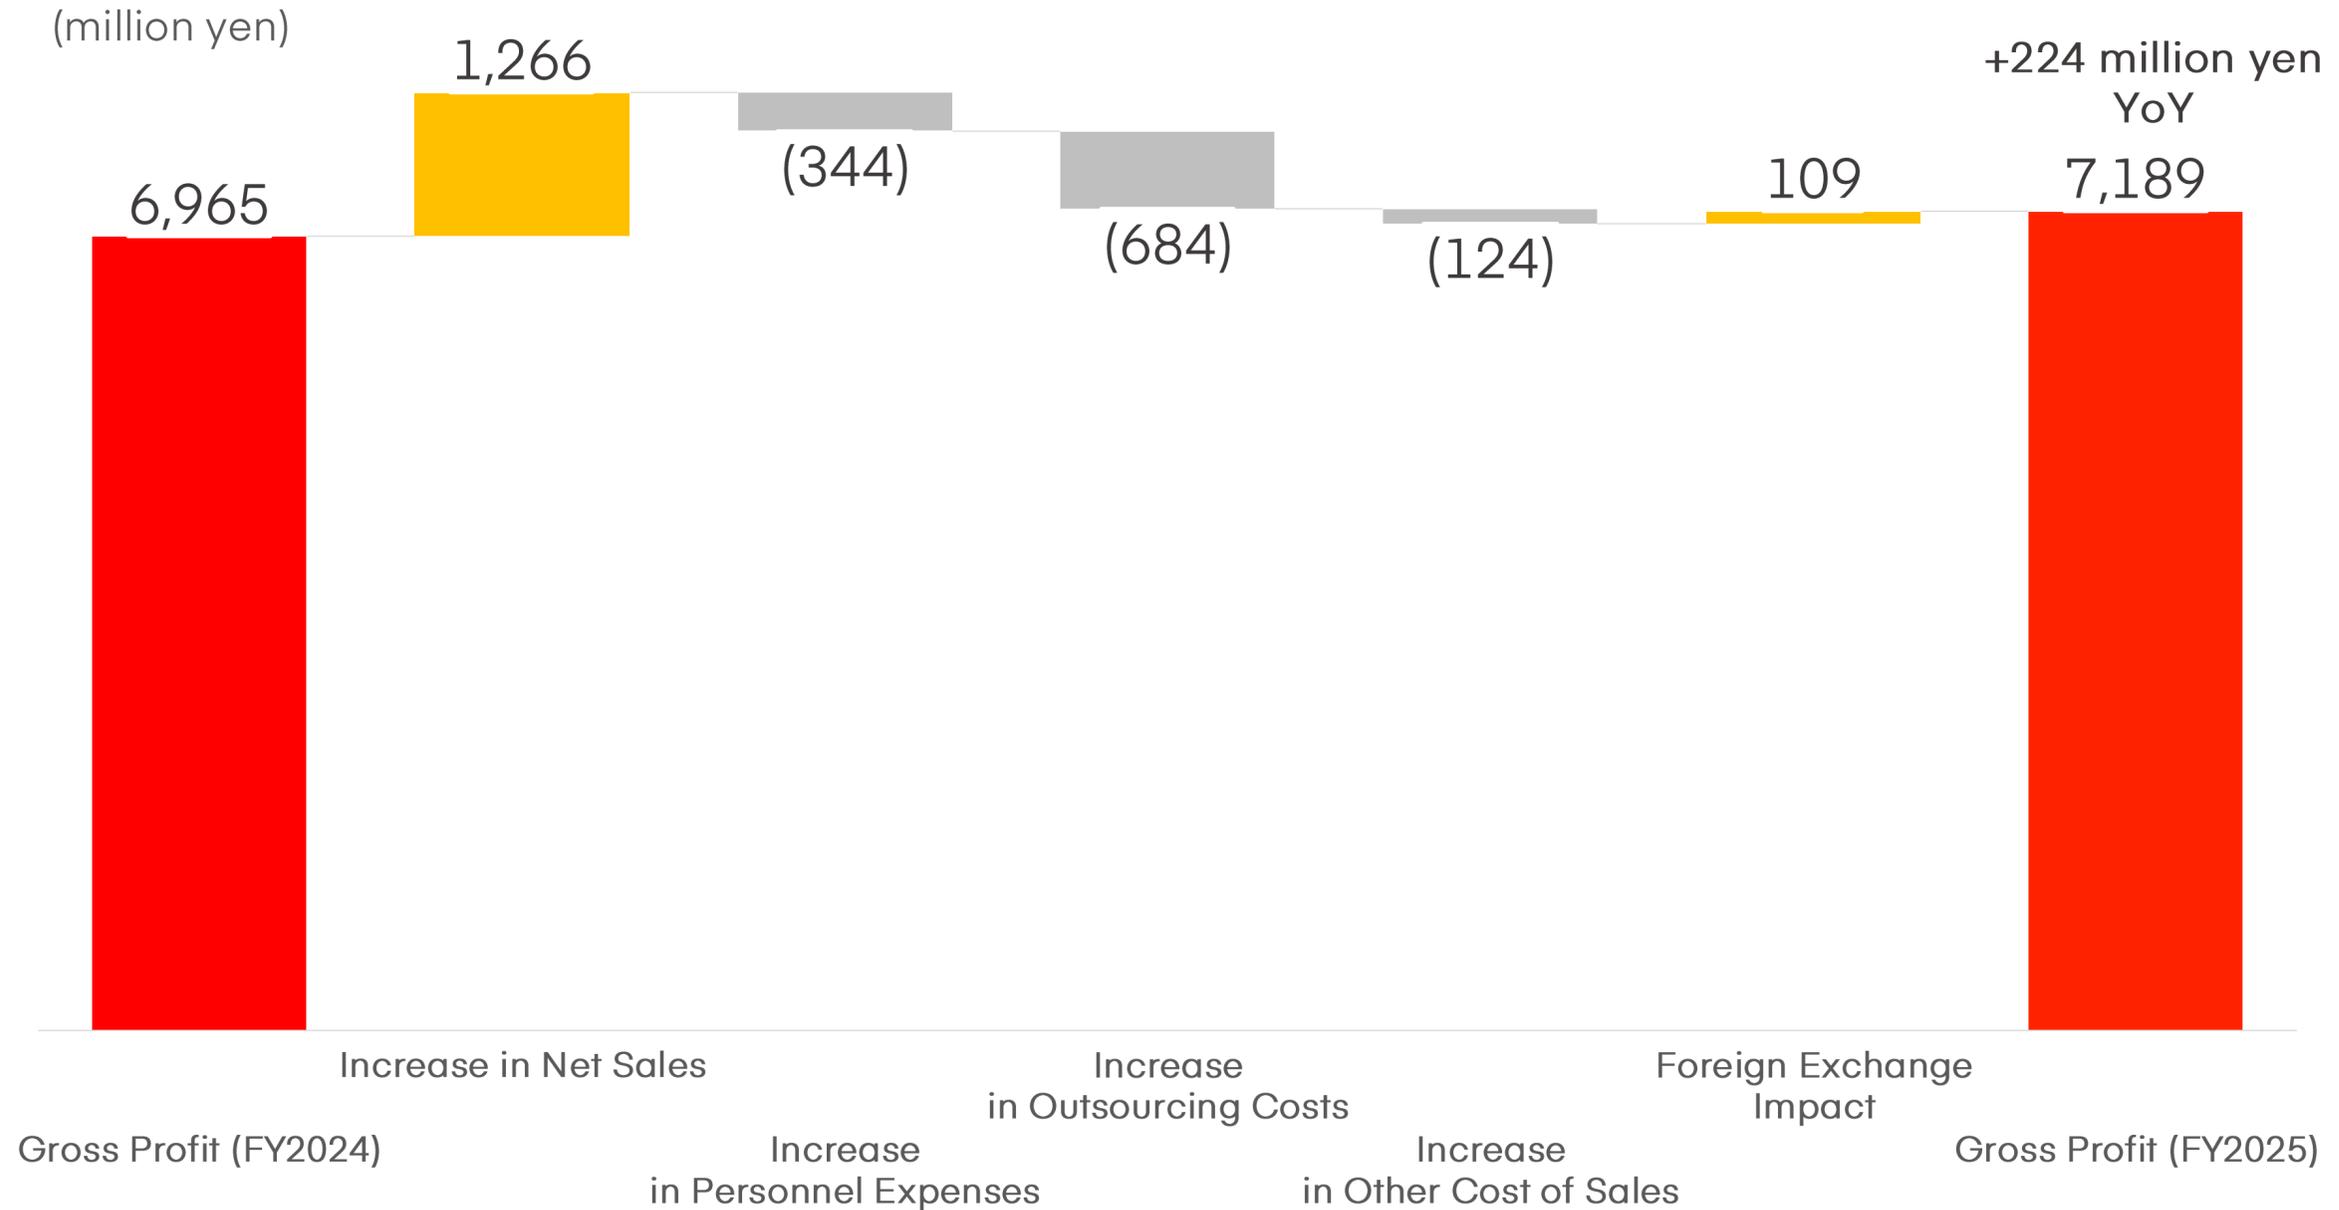

(3) Enterprise: Listed companies included in the Nikkei 225, Nikkei 400, or Nikkei 500 indices, as well as their group companies, or companies of comparable market capitalization, revenue scale, or employee size

(4) SMB: Abbreviation for Small and Medium-sized Business; all companies other than those defined as Enterprise by the Company

## Factors Behind Changes in Gross Profit (YoY)

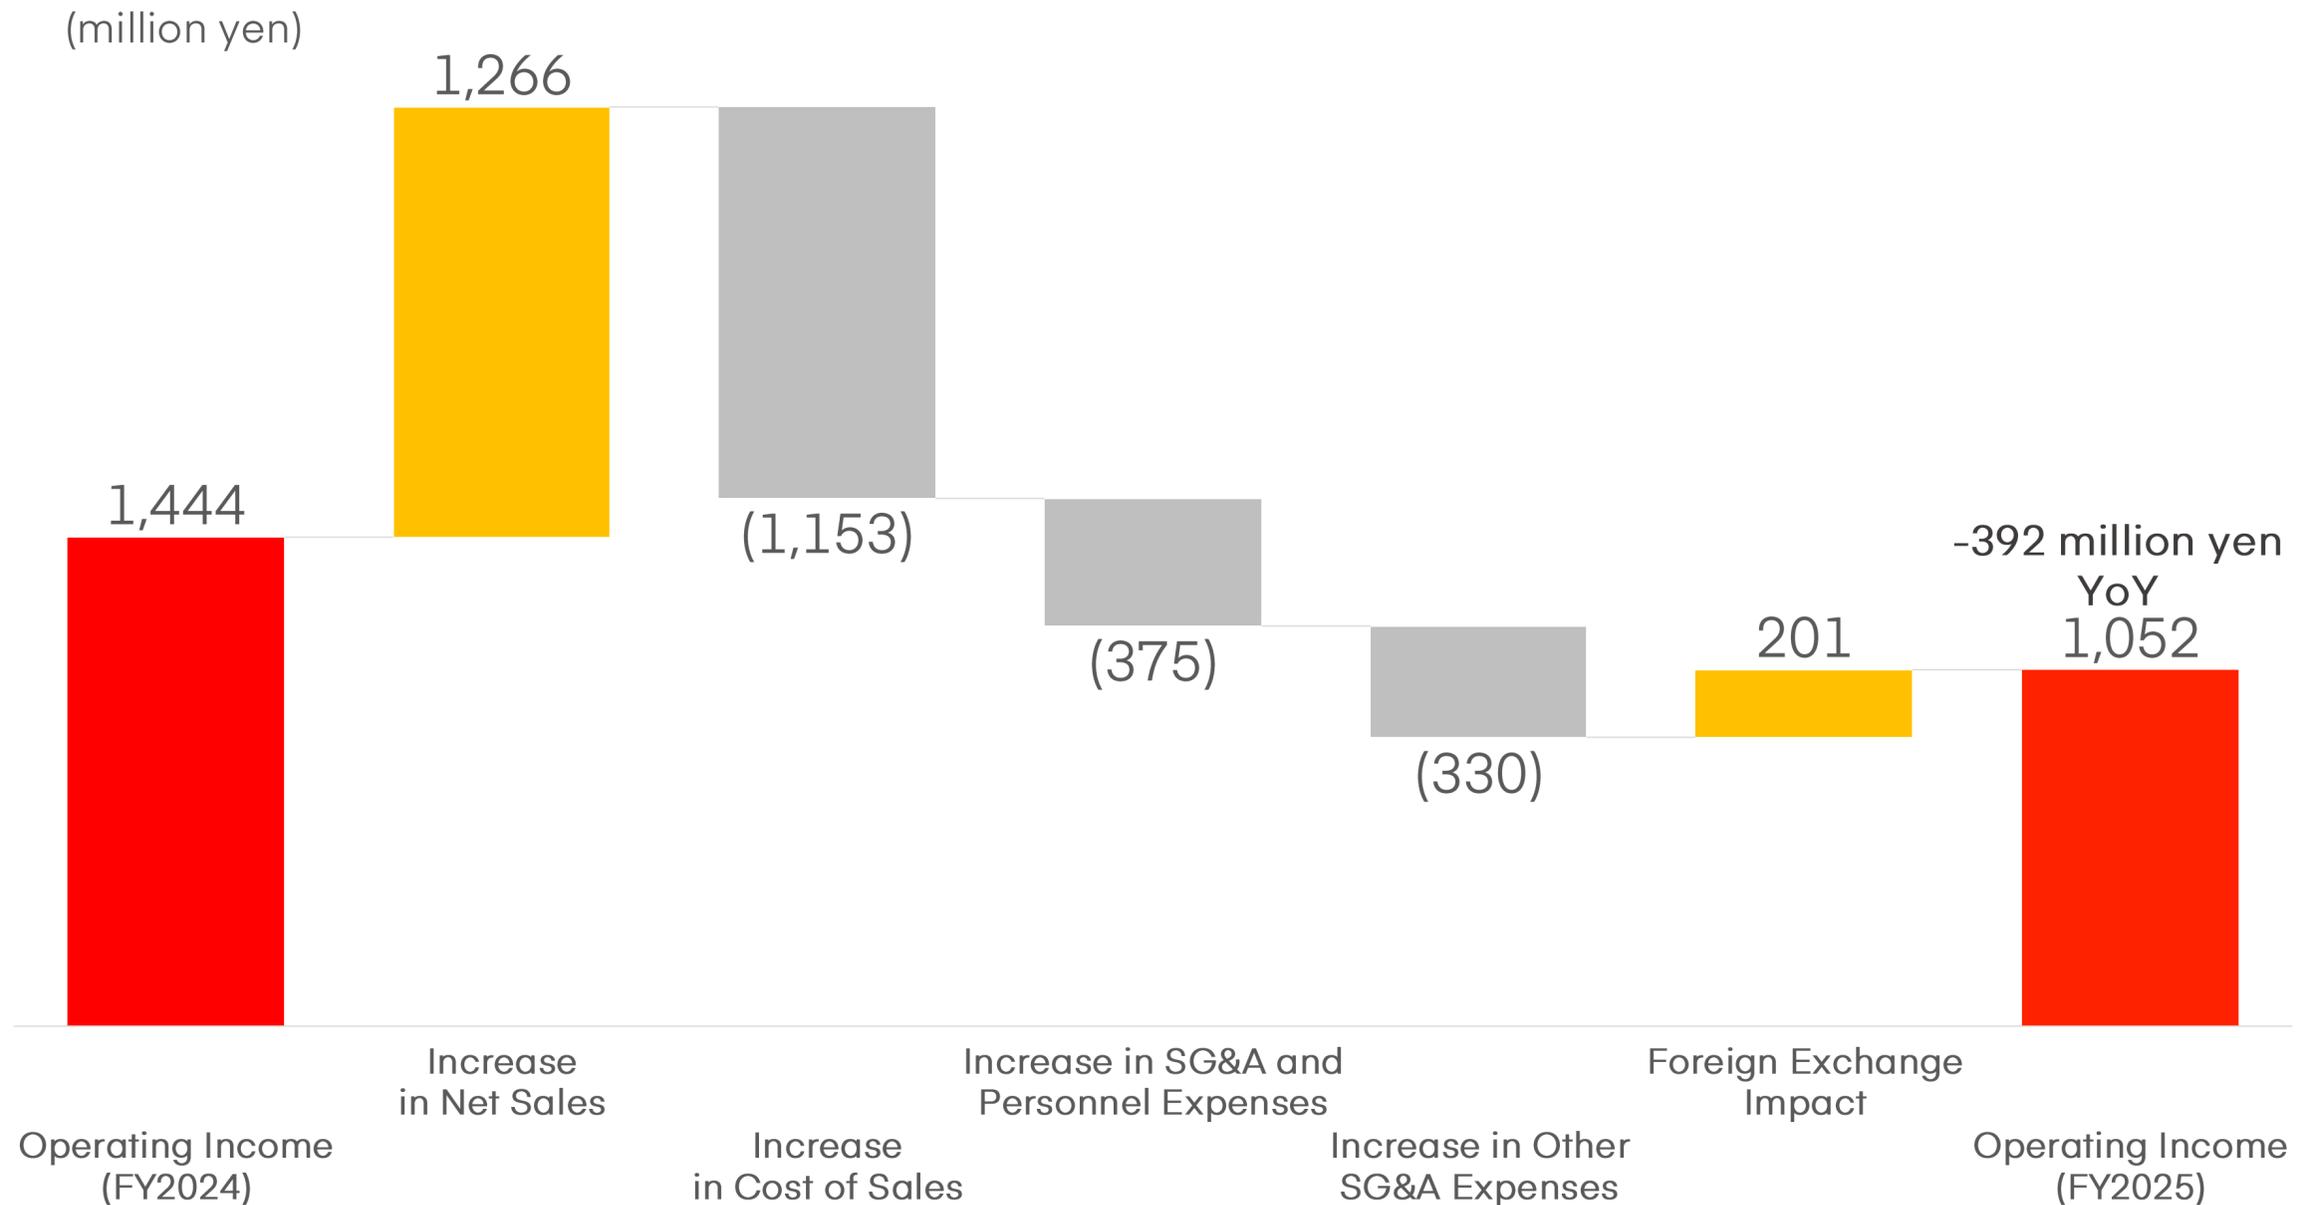

Outsourcing costs increased by 684 million yen due to the use of external partners in a specific project.

The increase in gross profit resulting from higher sales exceeded the rise in cost of sales, and gross profit reached 7.18 billion yen, up 224 million yen year on year.

## Factors Behind Changes in Operating Income (YoY)

Due to an increase in cost of sales from a specific project and higher SG&A expenses, operating income was 1.05 billion yen, down 392 million yen year on year.

## FY2025 Growth Investment

Although the earnings forecast has been revised, growth investments has been executed as initially planned. Details on progress are provided in the following slides.

Area	Investment Amount	Service Line	Key Initiatives
AI & etc.	<b>220</b> Million yen	Sun*	<ul style="list-style-type: none"> <li>Incorporation of AI into the digital creative studio's service development process, significantly improving productivity and quality and delivering operational transformation</li> <li>Expansion of revenue opportunities through support for clients' business expansion, including AI agents and new business idea creation support</li> </ul>
Incubation	<b>200</b> Million yen		<ul style="list-style-type: none"> <li>Resource expansion and system investment in ALLLY (fan community system) toward the release of new artist applications</li> <li>Investment in personnel and outsourcing costs for new game development</li> <li>Reskilling of existing engineers in preparation for entry into the cloud ERP market</li> </ul>
Sales & Marketing	<b>170</b> Million yen	Creative & Engineering	<ul style="list-style-type: none"> <li>Hiring of approximately 10 sales personnel during the year</li> <li>Expansion and strengthening of sales channels through enhanced web marketing, event exhibitions, and referrals</li> </ul>

## AI & etc.

Investment: **220** million yen

PLAN → RESULT

Centralized project data for 600+ clients  
Enabling an AI-ready data foundation

### 3 AI-Ready Data\*Ops

#### AI-ready data infrastructure

Standardized and reusable data structures with a shared data platform that enhances cross-department collaboration and supports faster, AI-driven decision-making.

### Expansion of the Sales-to-Delivery Data Platform for Resource and Estimation Management

Centered on "Croll," the data management platform covering the entire process from sales to delivery, mechanisms were established and expanded to improve resource management and estimation accuracy and to ensure alignment between Japan and Vietnam. Functional enhancements directly linked to evaluation logic and operations are being promoted to enable project profitability assessment in line with changes in the C&E business. This shift enables automatic aggregation based on proposal data, reducing input workload and improving data consistency.

### Visualization of recruiting analysis and workforce status

Built a data platform integrating internal workforce data and recruiting data, enabling centralized visibility of information necessary for decision-making.

Custom AI agents  
tailored for each enterprise

### 4 AI\*Agent Base

#### AI Agent Development

Implemented AI agents for clients to help drive revenue growth, while also deploying them internally to improve efficiency and productivity. Released in December 2024 and currently being proposed to major enterprises.

### Expanded Value Creation through AI Agents for Internal Efficiency and Client Proposals

#### Full-scale deployment of agents for internal operations

Transitioned internal agent utilization from PoC to full-scale deployment. Receipt checking and internal inquiry response agents achieved approximately 50% reductions in time and workload. Further expansion to other departments is expected to generate an additional 50–100 hours of efficiency gains, with ongoing improvements to core platform functions.

#### Expansion of client operational efficiency projects

Based on AI\*Agent Base, efficiency initiatives were promoted through an understanding of client operations. Approximately 30–50% reductions in work effort are expected, and the number of proposals increased in response to growing demand from companies seeking secure use of generative AI. Continued accumulation and horizontal expansion of projects are expected to enable further scaling.

# Incubation

Investment: **200** million yen

PLAN → RESULT

Japan's Cloud ERP Market  
Market expanding as companies shift from packaged ERP to cloud-based solutions

## New Entry into the Cloud ERP Market

5

### Reskilling of Existing Engineers

Advancing cloud ERP talent development to pursue large-scale project wins

## Continuing to build the cloud ERP organization while strengthening sales to drive project acquisition

### 2027 Issue

With the end of support for SAP ERP in 2027, companies face potential risks—including system shutdowns, security vulnerabilities, and operational disruptions—driving an urgent need for migration and countermeasures.

Migration Required by 2027

### ① Migration

- Data processing for transitioning from ECC to S/4HANA
- Analysis of add-on programs and migration to the new system

### ② Cloud & AI Utilization

Enables immediate use of the latest AI capabilities and smooth API integration with SaaS products. Accelerates data utilization by applying AI to core system data consolidated within the ERP.

### ③ Side-by-Side Development with BTP

(BTP: SAP's cloud application development platform) Builds custom requirements outside the ERP system when Fit-to-Standard alone is insufficient.

FY2025 Growth Investments | Q4 Progress Report

# Incubation

Investment: **200** million yen

PLAN → RESULT

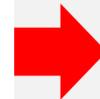

Not dependent on third-party licenses

**High revenue potential**

**Creation of Proprietary IP**

A Wholly Owned Content Platform Subsidiary

**Two web-comics continue to generate stable revenue**

Recoupment has been achieved with two titles, and stable revenue is now generated through a revenue-share model. By expanding the reader base across domestic and international platforms, content value continues to be maximized. This approach has proven to be a model case for an ideal revenue structure in digital comics, with plans to expand the model across multiple titles. An integrated structure covering planning, production, and distribution will be further refined to establish a scheme capable of continuously producing hit titles.

Rapid revenue growth in recent years

**Sustained high growth trajectory**

**Release of new artists**

A dedicated fan community system for professional artists

**Business Growth Continues Driven by On-Site Fan Club Initiatives and New App Expansion**

Amid the high season for live events of each artist, solid results were secured through new customer acquisition initiatives, including fan club campaigns and the introduction of postpaid payment options. Toward the 4th quarter, the official fan club app for the next-generation global artist "ONE OR EIGHT" is scheduled for release, and update projects for existing titles in preparation for FY2026 are progressing steadily.

FY2025 Growth Investments | Q4 Progress Report

# Sales & Marketing

Investment: **170** million yen

PLAN → RESULT

## Creative & Engineering

Hiring around 10 sales personnel annually

Strengthening web marketing

Participating in events

Expanding and enhancing sales channels through referrals and other initiatives

## Recruiting and sales progressed favorably, strengthening the growth foundation for the next fiscal year

Recruiting progressed smoothly toward FY2026, securing necessary talent. In sales, multiple large-scale projects were won, and the number of projects expected to contribute to next year's revenue increased. Marketing activities led to a higher number of business meetings. In addition, passing technical reviews (FTR) such as AWS and obtaining certifications improved service quality and reliability. The pipeline remains solid, supporting continued growth in the next fiscal year.

## Supporting sales activities through increased SEO traffic and seminar-driven lead acquisition

Online initiatives were refined with SEO and in-house seminars at the core, resulting in a +34.3% YoY increase in SEO traffic and a +50.3% YoY increase in seminar-originated lead acquisition. Both lead volume and the number of proposals achieved targets, with online initiatives contributing significantly to securing sales activity levels. Going forward, improvement cycles by channel will be further strengthened to deepen lead utilization and increase both the number and conversion rate of leads into proposals.

## Talent Platform

Strengthening marketing activities to highlight the appeal of Vietnam's IT talent

Enhancing the quality of Vietnam-based events for client companies

## Expanding value provided through post-hire support for top IT talent in the Global South

### Enhancing the appeal of Global South talent

Ongoing distribution of xseeds event reports to all clients and partner universities demonstrated strong engagement using videos, photos, and evaluation data. Expansion has begun beyond Vietnam to Indonesia and Brazil.

### Improving the quality of client-facing events

Large-scale events concluded successfully throughout the year, with increased visits by professors and interaction with senior management, sustaining positive expectations. Approximately 220 job offers were made during the year—the highest on record—and hires per client company increased from 2.5 in FY2024 to 4.4 in FY2025.

### New initiativesな取り組み

A dedicated onboarding unit was newly established, and post-hire support content was launched. One-on-one sessions conducted in Vietnamese along with Japanese-language reports received positive feedback from clients, leading to additional orders. Cross-cultural understanding courses generated inquiries not only from companies but also from local governments. Japanese-language training progressed alongside the equity-method application of the Babel Method entity at year-end, strengthening coordination between academically grounded proficiency assessment and training. Retention support initiatives were also featured in The Nikkei. A service site renewal and digital marketing initiatives are planned for FY2026.

## Balance Sheet Comparison

Although non-current assets and long-term borrowings increased due to the M&A of Global Gear and MIXSENSE, the equity ratio remained at a high level of 66.1%.

Unit: million yen	As of December 31, 2024	As of December 31, 2025	Change	Main factors
Current assets	12,235	13,150	+915	
of which cash and deposits	9,794	10,560	+765	Increase in operating cash flow
Non-current assets	1,741	2,958	+1,217	Recognition of goodwill from the acquisition of Global Gear and MIXSENSE shares, and an increase in investment securities due to the underwriting of corporate bonds
Total assets	13,976	16,109	+2,132	
Current liabilities	3,268	3,154	(113)	
Non-current liabilities	414	2,291	+1,877	Part of the funds for the acquisition of Global Gear and MIXSENSE shares was financed through borrowings
Net assets	10,294	10,662	+368	
Total liabilities and net assets	13,976	16,109	+2,132	
Equity ratio	73.6%	66.1%	—

**Full-Year Earnings Forecast  
for the Fiscal Year Ending December 2026**

## Summary of Full-Year Earnings Forecast for FY2026

### Adoption of IFRS

- To enhance international comparability of financial indicators, IFRS (International Financial Reporting Standards) will be voluntarily adopted from FY2026.
- The main items affected by the change in accounting standards are goodwill amortization and stock-based compensation expenses, with an impact of 0.24 billion yen.
- Results under IFRS will be disclosed starting from the financial results for the 1st quarter of FY2026.

### Net Sales

- Net sales are projected at 18.20 billion yen (+22.7% YoY).
- Revenue growth is planned across all service lines.
- Full-year contributions from Global Gear (joined the Group in FY2025) and MIXENSE (joined in FY2026) are incorporated into the forecast.

### Gross Profit

- Gross profit is projected at 9.11 billion yen (+26.8% YoY), with a gross profit margin of 50.1% (+1.6 percentage points YoY).
- Although the gross profit margin declined in FY2025 due to the impact of a specific unprofitable project, recurrence will be prevented through improved estimation accuracy, stricter pre-order reviews, and enhanced monitoring.

### Operating Income

- Under IFRS, operating income is projected at 1.71 billion yen and EBITDA at 1.84 billion yen.
- Under JGAAP, operating income is projected at 1.46 billion yen (+39.6% YoY) and EBITDA at 1.84 billion yen (+46.5% YoY).
- SG&A expenses under JGAAP are expected to increase by 24.9% YoY to 7.64 billion yen due to higher hiring, headcount, and advertising expenses.

### Profit Before Tax

- The average exchange rate during the fiscal year is expected to be 0.00590 yen.

## Voluntary Adoption of IFRS (International Financial Reporting Standards)

### Purpose of Adoption

Enhance the international comparability of financial information in the capital markets.

### Major Changes

Item	JGAAP	IFRS	Changes	Impact (FY2026: IFRS vs. JGAAP)
Goodwill amortization	<ul style="list-style-type: none"> <li>Amortized within 15 years</li> </ul>	<ul style="list-style-type: none"> <li>Not amortized; annual impairment testing</li> </ul>	<ul style="list-style-type: none"> <li>The goodwill carrying amount at the transition date will be carried forward and no longer amortized thereafter</li> </ul>	<ul style="list-style-type: none"> <li>SG&amp;A: -145 million yen</li> <li>Operating income: +145 million yen</li> </ul>
Paid stock option expenses	<ul style="list-style-type: none"> <li>Certain expenses recognized</li> </ul>	<ul style="list-style-type: none"> <li>No expense recognized depending on grant conditions</li> </ul>	<ul style="list-style-type: none"> <li>Based on the grant conditions of the Company's paid stock options, no expense is expected to be recognized</li> </ul>	<ul style="list-style-type: none"> <li>SG&amp;A: -100 million yen</li> <li>Operating income: +100 million yen</li> </ul>

### Disclosure Schedule for Voluntary Adoption of IFRS (Planned)

Fiscal Period	Timing	Disclosure Documents	Accounting Standards
FY2025 (year ended December 2025)	Year-end	Earnings report (tanshin), Securities report (Yuka shoken hokokusho), Consolidated financial statements	JGAAP
FY2026 (year ended December 2026)	1st-3rd quarters	Quarterly earnings report, Semiannual report	IFRS
	Year-end	Earnings report, Securities report, Consolidated financial statements	

## FY2026 Full-Year Earnings Forecast: Net Sales and Profit by Stage

IFRS will be voluntarily adopted from FY2026. Under both IFRS and JGAAP, net sales are projected at 18.20 billion yen and operating income at 1.71 billion yen. Compared with FY2025 results under JGAAP, the FY2026 forecast indicates +22.7% growth in net sales and +39.6% growth in operating income.

Unit: million yen	JGAAP	JGAAP (Reference)	Change (%)
	FY2025 Results	FY2026 Forecast	
Net sales	14,835	18,201	+22.7%
Gross profit	7,189	9,113	+26.8%
Gross profit margin	48.5%	50.1%	—
EBITDA <sup>(1)</sup>	1,262	1,849	+46.5%
Operating income	1,052	1,469	+39.6%
Operating margin	7.1%	8.1%	—
Ordinary income	998	1,655	+65.8%
Net income attributable to owners of parent	476	1,144	+140.2%

	IFRS
	FY2026 Forecast
Revenue	18,201
Gross profit	9,113
Gross profit margin	50.1%
EBITDA <sup>(2)</sup>	1,849
Operating income	1,714
Operating margin	9.4%
Profit before tax	1,900
Profit for the year	1,389

Average exchange rate  
(per 1 Vietnamese Dong)

0.00570yen

0.00590yen

0.00590yen

(1) Operating income + depreciation + goodwill amortization, etc.  
(2) Operating income + depreciation

## FY2026 Full-Year Earnings Forecast: SG&A Expenses

SG&A expenses for FY2026 are projected at 7.39 billion yen under IFRS.

Compared with JGAAP, SG&A expenses are expected to increase by 24.6% YoY due to higher hiring, increased headcount, and higher advertising and promotion expenses associated with business expansion.

Breakdown of SG&A Expenses	JGAAP		JGAAP (Reference)		YoY Change	Point	IFRS	
	FY2025		FY2026				FY2026	
	Result	Composition ratio	Result	Composition ratio			Forecast	Composition ratio
Personnel expense	4,303	70.1%	4,671	61.1%	+8.6%	Increase in headcount	4,668	63.1%
Recruiting expenses	272	4.4%	542	7.1%	+99.1%	Increase in hiring	542	7.3%
Outsourcing expenses	408	6.7%	625	8.2%	+53.1%	Increase due to external sales support and use of professional services	625	8.5%
Sales activity expenses (excluding recruiting expenses)	279	4.6%	601	7.9%	+115.6%	Increase in advertising and promotion expenses	601	8.1%
Facility expenses	638	10.4%	816	10.7%	+27.8%	Increase in system-related expenses due to higher headcount	816	11.0%
Other SG&A	234	3.8%	386	5.1%	+64.8%	Increase in goodwill amortization	141	1.9%
Total	6,136	100.0%	7,644	100.0%	+24.6%		7,396	100.0%

## FY2026 Full-Year Earnings Forecast: Net Sales

FY2026 Net Sales

**18.20** Billion yen  
 (+22.7% YoY)

**Creative & Engineering**  
 +22.4% YoY

Revenue growth planned through acquisition of new clients—primarily enterprise companies—and new projects.

MIXSENSE, newly joining the Group, will be consolidated from the 1st quarter of FY2026.

**Talent Platform**  
 +17.8% YoY

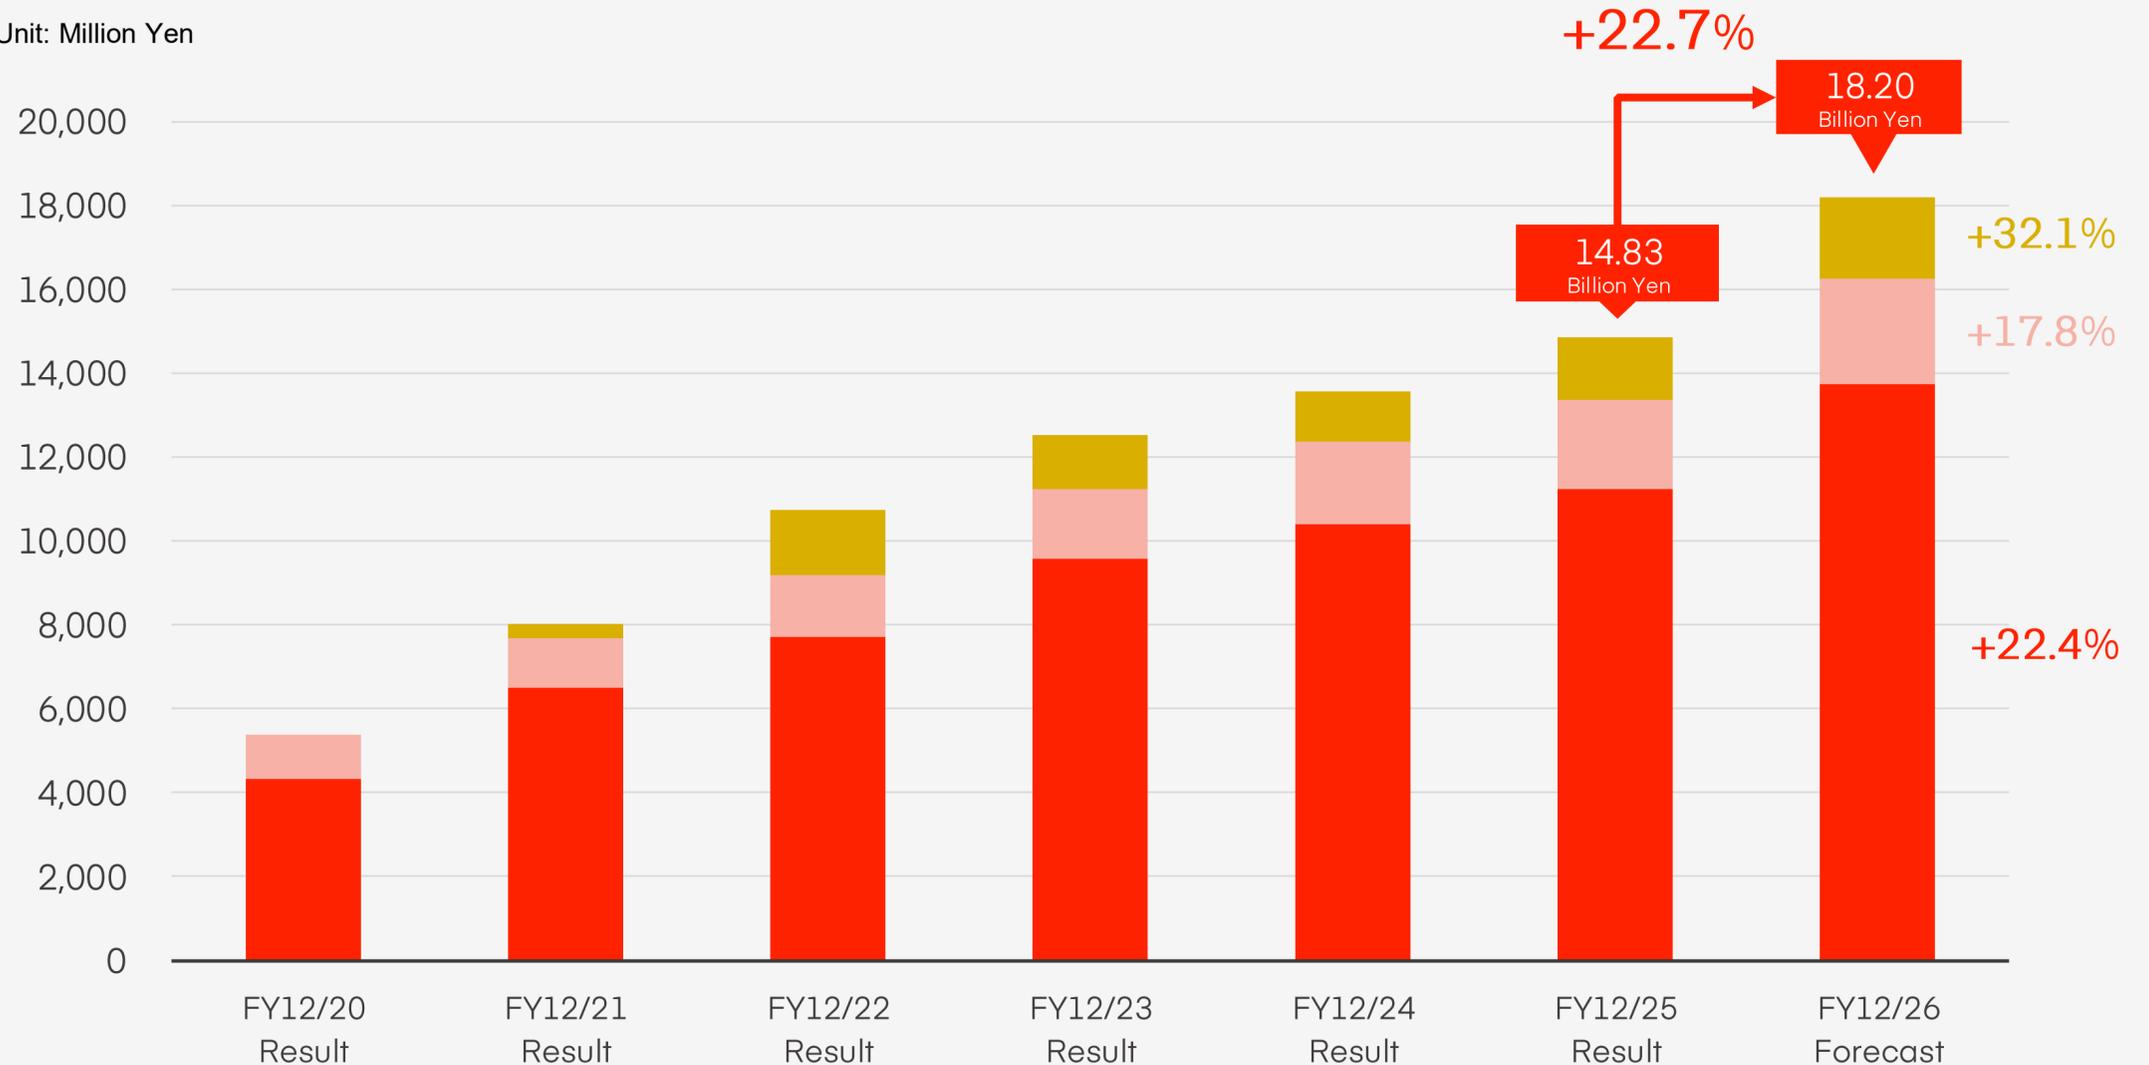

Steady growth is planned, centered on the SES business (Sun Terras).

**Incubation**  
 +32.1% YoY

Growth is planned across games, illustrations, webcomics, and fan community platforms.

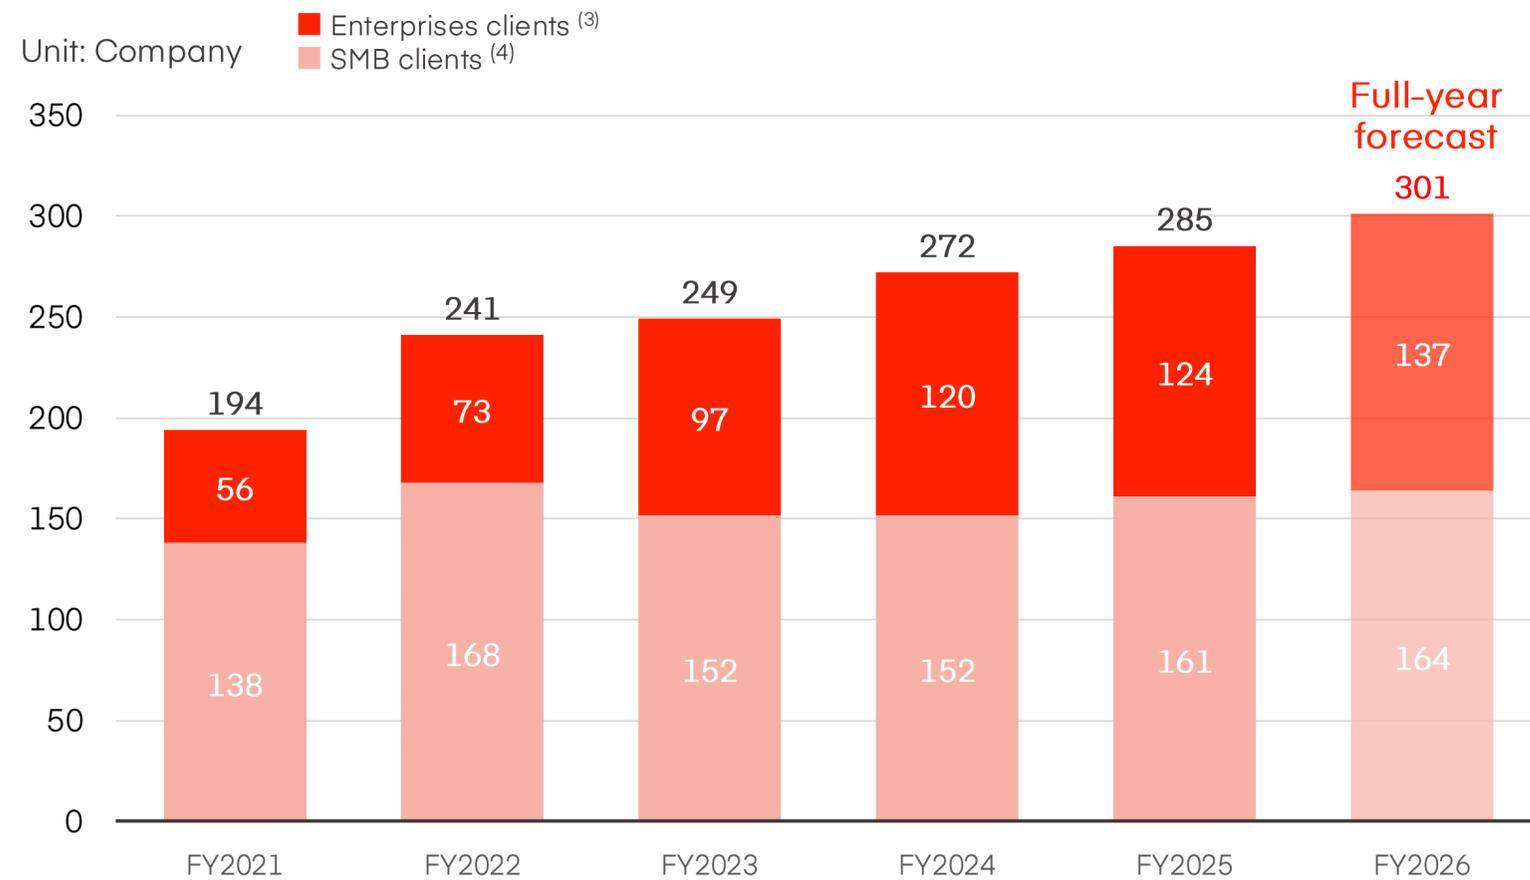

Unit: Million Yen

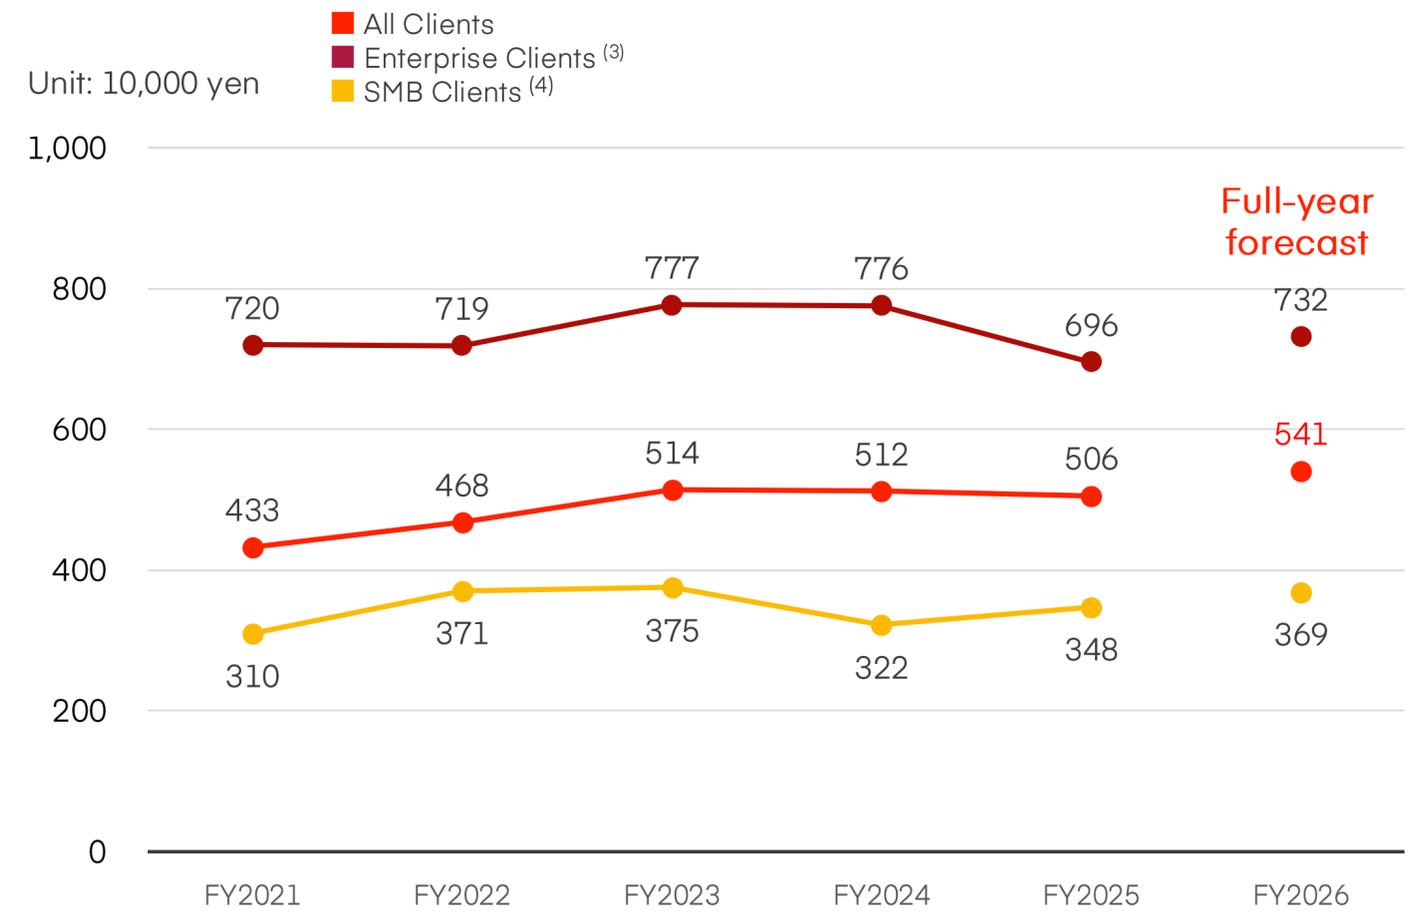

## FY2026 Full-Year Earnings Forecast: Key KPIs

The number of unique clients is projected to increase by 16 year on year to 301, and ARPU is projected to rise by 0.35 million yen to 5.41 million yen.

### Trends in the Number of Unique clients <sup>(1)</sup>

### Monthly ARPU Trends <sup>(2)</sup>

(1) The actual number of clients that conducted transactions during the period

(2) Total net sales for the period ÷ cumulative number of transacting clients during the same period

(3) Enterprise: Listed companies included in the Nikkei 225, Nikkei 400, or Nikkei 500 indices, as well as their group companies, or companies of comparable market capitalization, revenue scale, or employee size

(4) SMB: Abbreviation for Small and Medium-sized Business; all companies other than those defined as Enterprise by the Company

## Review of FY2025 and Actions for FY2026

Key Issues	Review of FY2025	Actions for FY2026
Acquisition of new clients and new projects from existing clients	<ul style="list-style-type: none"> <li>• Although sufficient resources could not be allocated to new sales activities due to responses to a specific unprofitable project, the organization normalized after the project ended in the 3rd quarter.</li> <li>• Net sales for FY2025 fell short of the initial forecast but exceeded the revised forecast.</li> <li>• Recent sales KPIs remained solid.</li> </ul>	<ul style="list-style-type: none"> <li>• Strengthen new enterprise client acquisition (promotion of account-based marketing)</li> <li>• Deepen engagement with existing clients (maximize LTV through upselling and cross-selling)</li> <li>• Prevent churn and generate additional orders through enhanced customer success</li> </ul>
<p><b>Creative &amp; Engineering</b></p> <p>Strengthening of the sales organization</p>	<ul style="list-style-type: none"> <li>• Hiring, including senior talent, was largely completed in line with the plan.</li> <li>• The marketing and sales organizations were integrated to begin unified planning and operational improvements, and a department responsible for utilization in Vietnam was established.</li> </ul>	<ul style="list-style-type: none"> <li>• Establish 4 solution business lines (expand solution development and presales capabilities)</li> <li>• Develop an account information infrastructure and standardize account planning</li> <li>• Strengthen hiring and development of Principal Directors (client executives), Account Program Managers (project leads), and Customer Success personnel</li> </ul>
Improvement in utilization rate	<ul style="list-style-type: none"> <li>• In the first half, the use of external partners increased due to the impact of the specific unprofitable project, but normalized in the second half.</li> <li>• Compared with FY2024, utilization rates increased in both Japan and Vietnam.</li> </ul>	<ul style="list-style-type: none"> <li>• Focus on winning projects aligned with internal resources</li> <li>• Enhance utilization monitoring</li> <li>• Reskill talent in line with market needs</li> <li>• Recruit in technical domains where internal talent is insufficient</li> </ul>

# Sun\* Releases "MoMorph," Enabling Design-Driven, AI-Powered Development

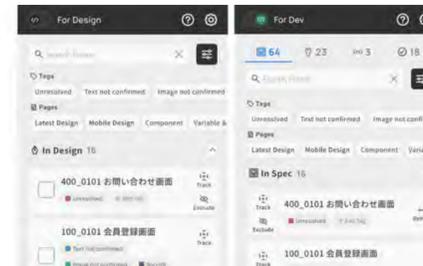

**A new development experience that seamlessly connects specifications, testing, and implementation through AI.**

“MoMorph” is an enterprise-grade collaborative software development platform that connects the entire development process around UI design by leveraging AI. Compliant with the Model Context Protocol (MCP), it integrates with multiple AI agents—including Codex CLI/Claude, Claude Code, and Gemini CLI—enabling flexible and continuous automation of the “Design → AI → Specification → Testing → Implementation” loop. With multilingual support, the platform can also be used by multinational development teams.

<https://app.sun-asterisk.com/momorph/>

## Key Features and Functions of MoMorph

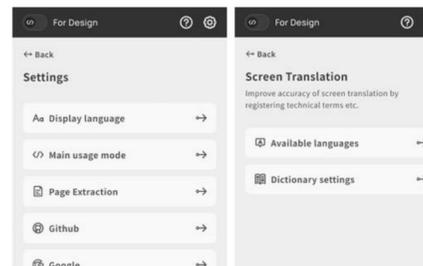

### Unified Management of Design and Development

By integrating Figma and GitHub, MoMorph automates issue creation and status updates. It visualizes progress and specifications, promoting shared understanding across the team.

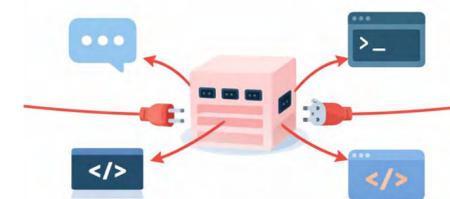

### AI-Generated Documentation

Through integration with Google Sheets, AI automatically generates specification documents and test cases, reducing manual work and freeing up time for review.

### Accelerating Global Development with AI Translation

AI automatically generates multilingual (i18n) dictionaries, enabling efficient collaboration among global teams through shared specifications and designs.

### MCP Server Compatibility

Secure and flexible integration with external AI tools such as Claude and various CLIs allows AI utilization across the development lifecycle—from design and implementation to verification.

# Sun\* Launches Beta Version of “Ailla,” an AI Partner that Visualizes Key Validation Points in New Business Development

**Automatically structures business hypotheses and extracts key issues using AI trained on experience from over 1,000 new business support projects.**

Ailla is a service that accelerates the hypothesis validation cycle by structuring business hypotheses and automatically identifying key issues through AI—simply by inputting a business idea and its assumptions. It is built on Sun\*’s proprietary new business framework, VALUE DESIGN SYNTAX, developed from experience supporting more than 1,000 initiatives.

By organizing ideas from three professional perspectives—Business, Technology, and Creative—Ailla helps identify critical considerations and enables faster launch of new businesses.

## Key Features of Ailla

### 1. Automatic Generation of Business Hypotheses

AI support that replicates the thinking process of new business development professionals.

Based on VALUE DESIGN SYNTAX, AI agents generate business hypotheses and key issues from the three perspectives of Business, Technology, and Creative, ensuring that important considerations are comprehensively addressed—even those difficult to identify independently.

### 2. Identification and Prioritization of Key Issues Enables an efficient business validation cycle.

Ailla structures the overall hypothesis from an initial idea and automatically proposes validation points, priorities, and verification methods. This shortens the hypothesis design phase prior to testing, enabling a greater number of validation cycles.

### 3. Idea Discussion and Refinement

#### Consult instantly and create a working draft.

By simply entering an idea at the moment it arises, AI organizes assumptions and visualizes key issues. Even early-stage or not-yet-verbalized ideas can be used as a draft for discussion with stakeholders. Based on validation results, the business concept can be refined, and pivot proposals can also be generated as needed.

## Topics Related to Growth Strategy & Sustainability

# Sun\* Begins Free Beta Offering of "BeCraft," a Content Management System Empowering Frontline Teams to Operate Independently

## A headless CMS that separates management from presentation and expands distribution channels.

BeCraft is a packaged headless CMS that enables simple yet advanced content management.

Without relying on engineers, frontline staff can input content directly through the admin interface and distribute it via APIs to various channels, including websites and applications.

During the beta period, licenses will be provided free of charge to stabilize and expand functionality based on client feedback. From short-term implementation to design and feature development and the establishment of operational workflows, Sun\* will provide hands-on support throughout the process.

<https://www.becraft.jp/>

**Sun\***

## What is a Headless CMS?

A content management system that separates content management functions from presentation (front-end) functions.

Through a decoupled architecture in which each function operates independently, BeCraft allows customization according to client requirements while retaining core content management capabilities. It ensures flexibility in delivery channels and front-end technologies, while providing high scalability and performance.

## Use Cases for a Headless CMS

In any content creation scenario, even non-engineers can easily create, update, and publish content.

### Articles such as news and blogs

Non-engineers can edit and publish content, making it ideal for environments requiring speed.

### Case study pages for services and businesses

Page layouts can be adjusted to match the content of implementation cases and customer interviews.

### Data management for products and people

Structured registration of product and profile information enables searchable displays and content reuse within articles.

### FAQ content management

Information can be organized and delivered by category, making it easier for users to find what they need.

## “In-House Development Enablement Solution with Agile and DevOps” Achieves AWS Foundational Technical Review (FTR) Certification

### Recognized as a high-quality and secure AWS service offering supporting companies in transforming into self-sustaining organizations.

This solution is an enablement service designed to help organizations build the capability to continuously grow their own products in-house. It approaches transformation across three dimensions—organization, process, and technology—to address key barriers to internal development, including development culture, talent shortages, and development speed.

The offering packages support ranging from recruitment assistance for CTOs and lead engineers to the establishment of agile development processes and the construction of automated DevOps infrastructure. Beyond simple development outsourcing, Sun\* supports the transition to a sustainable development organization capable of repeatedly creating value at speed under its own initiative, without reliance on external vendors.

#### About the AWS Foundational Technical Review (FTR) for Service Offerings

AWS FTR for Service Offerings is a technical review program for professional and consulting services provided by AWS Partners. Passing the review certifies that the service reduces risks in the cloud environment and delivers stable value to customers.

## Certified as a Microsoft “Data & AI (Azure) Solutions Partner”

**Leveraging global AI engineering resources to accelerate data and AI utilization and real-world implementation on Azure.**

### About the “Data & AI (Azure) Solutions Partner” Designation

This designation is part of the Microsoft AI Cloud Partner Program. Among its six solution areas, it recognizes partners with extensive capabilities and proven track records, particularly in managing data across multiple systems, analytics, and the development of AI solutions.

Companies holding this designation are recognized for advanced skills and expertise in specialized domains such as data analytics, AI, and machine learning on Microsoft Azure, enabling them to meet specific customer needs and support business outcomes.

Sun\* has built a strong track record in application development using Microsoft Azure and in cloud-native business development. This certification demonstrates that Sun\*’s technical expertise and project experience meet Microsoft’s standards and enables Sun\* to provide clients with a broader range of implementation options.

Through this certification, Sun\* has established a delivery framework that combines implementation methodologies utilizing advanced technologies such as Azure OpenAI Service with its global AI engineering resources. As a result, Sun\* can deliver high-quality and efficient implementation of advanced AI solutions centered on data utilization, from solution development through application integration.

# Official Fan Club App for “ONE OR EIGHT” Launches in Three South American Countries and Thailand

## The global boy group “ONE OR EIGHT,” produced by Avex Music Creative Inc., accelerates its international expansion

Through the professional artist fan community platform ALLLY, the official fan club app “1DERZ” for ONE OR EIGHT has launched in Argentina, Brazil, Mexico, and Thailand. The app is powered by Sun\*’s proprietary fan community system ALLLY. Previously available in Japan and the United States, the service is now expanding to four additional countries.

Additional regions will be rolled out in line with the group’s expanding activities. Further global expansion of ONE OR EIGHT and its official fan club app “1DERZ” is planned.

# Sun\* Concludes Business Matching Agreement with Hokuriku Bank

## Contributing to strengthened international competitiveness through xseeds Hub

Sun\* announces that it has entered into a business matching agreement with Hokuriku Bank, a member of the HokuHoku Financial Group.

Sun\* operates xseeds Hub, a global IT talent recruitment platform. The platform maintains a database of IT talent from leading overseas universities, enabling efficient matching between highly skilled international candidates and companies in Japan. This marks the first initiative to establish a collaboration framework between xseeds Hub and a financial institution.

Through this business matching arrangement, Sun\* will provide Hokuriku Bank's corporate clients with new options for recruiting global IT talent, supporting digital transformation (DX) initiatives and strengthening international competitiveness.

### About xseeds Hub

xseeds Hub is an engineering recruitment platform bringing together top students from leading universities overseas. More than 2,000 computer science students are registered in Sun\*'s proprietary database, enabling companies to connect with next-generation engineers through a new recruitment approach.

Registered students receive practical IT training based on Sun\*'s experience from over 400 product development projects, along with Japanese language education throughout their four years at university, for a total curriculum of up to 1,200 hours.

## MIXENSE, a Software Contract Development Company, Joins the Sun\* Group

Adding a software development company to the group to accelerate growth in the digitalization domain.

MIXENSE provides an environment that enables customers to focus on their own businesses. The company develops a wide range of systems tailored to client needs, including business application systems and control systems. It has earned strong evaluations for its proposal capabilities, technical expertise, and flexibility, and maintains long-term relationships with clients, including major telecommunications carriers.

Through the acquisition of shares and the addition of MIXENSE to the group, Sun\* will expand its value offering in the digitalization domain and create synergies through customer base collaboration and the mutual utilization of management resources. This will further strengthen DX support and contribute to realizing Sun\*'s vision of "a world where everyone can be absorbed in value creation".

# Sun\* Acquires Shares of BABELMETHOD, a Corporate Online Japanese Language Education Provider

## Integrating industry-academia Japanese language assessment technology to further differentiate the talent platform.

BABELMETHOD operates services such as Japrise, providing a highly accurate Japanese speaking test aligned with the CEFR and developed through industry-academia collaboration with Tokyo University of Foreign Studies, along with conversation training linked to the results. This enables quantitative assessment of overseas talent's speaking ability—previously difficult to measure with conventional tests—and delivers cost-effective education solutions.

Since 2022, Sun\* has adopted BABELMETHOD's services to measure the effectiveness of Japanese language education on its IT engineer recruitment platform xseeds Hub, building a close relationship as both a major client and sales agent. Through this share acquisition, Sun\* will integrate BABELMETHOD's solutions for overseas IT talent supported through its training and recruitment programs, establishing a talent supply framework equipped with advanced communication skills suited for Japanese companies.

This initiative will accelerate the competitiveness and differentiation of the talent platform and contribute to realizing Sun\*'s vision of "a world where everyone can be absorbed in value creation".

**Sun\*'s Value Proposition to Customers in the AI Era**  
**— Empowering Value Creation with AI —**

The strength of Sun\* is the ability to think together about "what to create" and accompany business growth.

With AI, technology shifts from "advantage" to "prerequisite."

Before  
Advantage

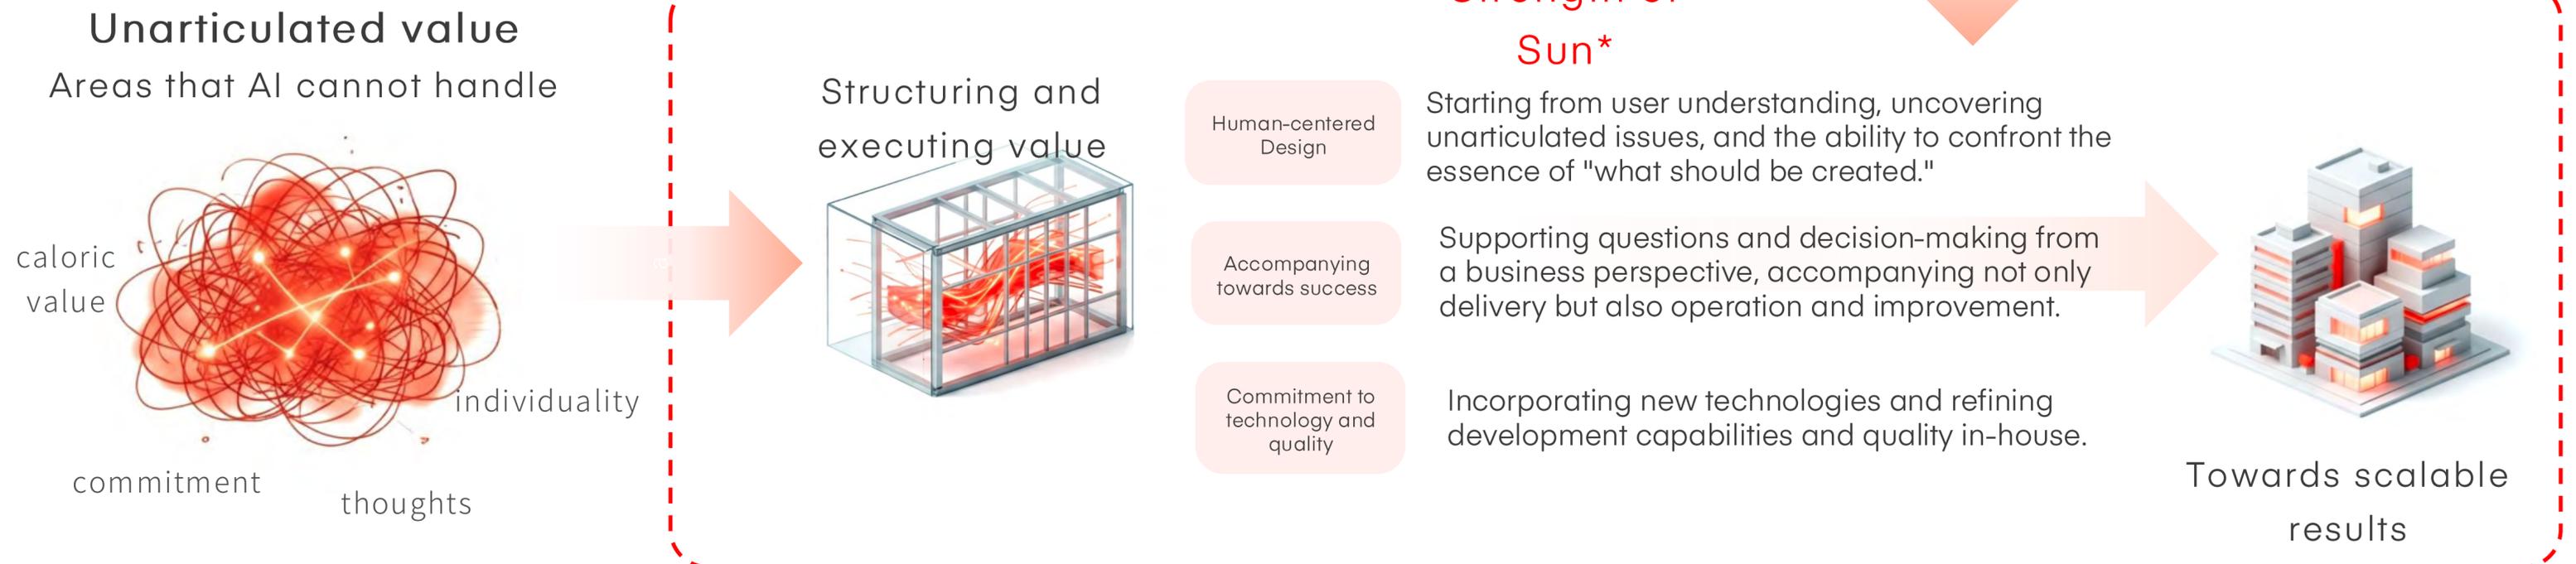

Until now, technology was something that only "a few people with special skills" could handle.

After  
Democratization

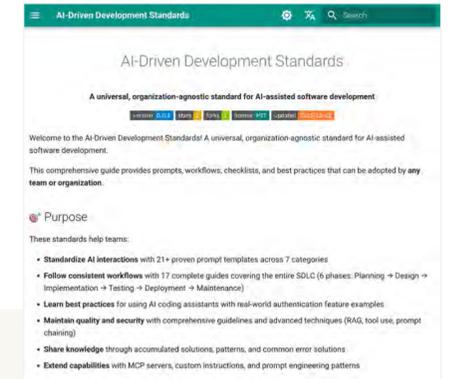

With AI, technology becomes a "prerequisite" that anyone can use.

The very ability to "implement" is diminishing competitive advantage.

As "creation" becomes commoditized and everyone has the same tools, what will be the difference?

# Standardization of Sun\*'s AI infrastructure that creates reproducibility

Development Standard (Flow)

## AI-Driven SDLC

Integrating ADD (AI-Driven Development) into the Software Development Life Cycle (SDLC)

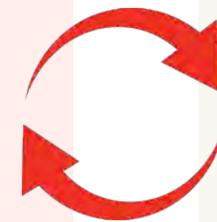

Standardizing the AI-driven development process

Organizational Standard (Knowledge)

## ADD Organizational Knowledge Platform

and tools developed in-house

# Organizational Knowledge Platform to Scale AI-Driven SDLC

The screenshot shows the GitHub repository page for 'AI-Driven Development Standards'. The header includes a search bar and navigation icons. The main content area features the repository title, a subtitle 'A universal, organization-agnostic standard for AI-assisted software development', and metadata such as version (0.0.1), stars (1), forks (1), license (MIT), and update date (2025-10-13). Below this, there is a welcome message and a list of bullet points under the 'Purpose' section.

**AI-Driven Development Standards**

A universal, organization-agnostic standard for AI-assisted software development

version 0.0.1 stars 1 forks 1 license MIT updated 2025-10-13

Welcome to the AI-Driven Development Standards! A universal, organization-agnostic standard for AI-assisted software development.

This comprehensive guide provides prompts, workflows, checklists, and best practices that can be adopted by **any team or organization**.

### Purpose

These standards help teams:

- **Standardize AI interactions** with 21+ proven prompt templates across 7 categories
- **Follow consistent workflows** with 17 complete guides covering the entire SDLC (6 phases: Planning → Design → Implementation → Testing → Deployment → Maintenance)
- **Learn best practices** for using AI coding assistants with real-world authentication feature examples
- **Maintain quality and security** with comprehensive guidelines and advanced techniques (RAG, tool use, prompt chaining)
- **Share knowledge** through accumulated solutions, patterns, and common error solutions
- **Extend capabilities** with MCP servers, custom instructions, and prompt engineering patterns

## Centralizing and standardizing knowledge and guidelines for AI-driven development

- ✓ Ensures repeatability
- ✓ Improves productivity
- ✓ Complies with AI governance

Prompt templates

Standard workflows

Risk assessment processes

AI usage policies

AI whitelist operations

Feedback loops

Meets the requirements of enterprise-level organizations

# Impact of AI-Driven SDLC × ADD Organizational Knowledge Platform

Revenue Growth

Embedding AI governance into the SDLC strengthens alignment with enterprise requirements

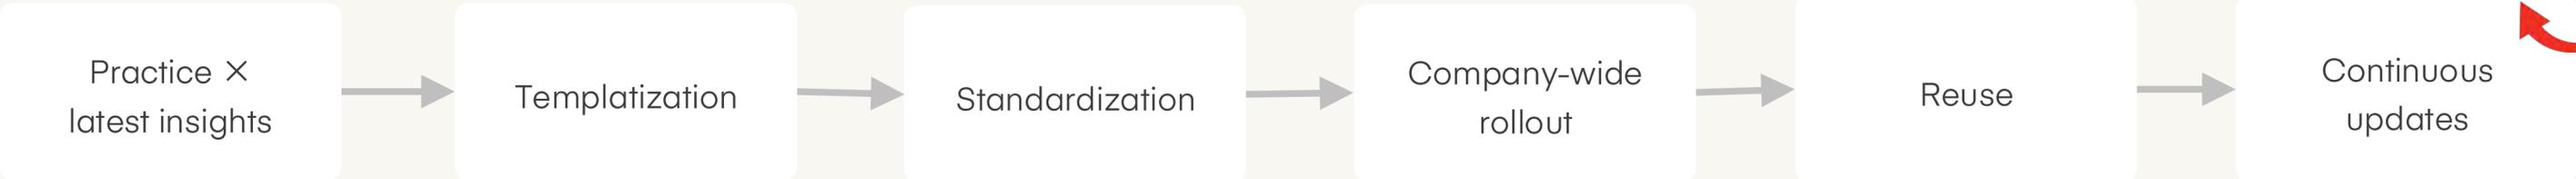

- ✓ Expansion of revenue from enterprise clients
- ✓ Increase in high-value project ratio
- ✓ Improved win rate

Margin Improvement

Standardizing the AI-driven SDLC stabilizes quality, reduces effort, and minimizes rework

- ✓ Higher revenue per employee
- ✓ Shorter development lead time
- ✓ Lower cost ratio

## ADD Knowledge Loop

A structure that strengthens with each project

# Create a world where everyone has the freedom to make awesome things that matter.

Sun\* aims for world peace.

Looking around the world, there are a variety of issues ranging from the major social issues that are mentioned in the SDGs to the issues of everyday life.

We will use digital technology and creativity to solve these problems.

We aim to realize a future where solutions can be made, and a world where people can freely create the values they envision.

World peace for us is like everyone's childhood, excited about creating new value and looking forward to a new morning.

Sun\* will build the infrastructure to realize such a "world where everyone has the freedom to make awesome things that matter".
