# Notice Concerning Reclassification of a Consolidated Subsidiary (to an Equity-Method Affiliate)

The Company hereby announces that it has resolved, at a meeting of the Board of Directors held today, to reclassify FORMOSA SUMCO TECHNOLOGY CORPORATION (hereinafter referred to as “FST”), a consolidated subsidiary of the Company, from a consolidated subsidiary to an equity-method affiliate by selling a portion of shares in FST held by the Company Group on the securities market. The effective date of the reclassification will be the date on which the share sale has been completed, and the shareholding ratio is such that FST is classified as an equity-method affiliate. The Company will promptly announce the effective date once it has been determined.

## 1. Reason for the Reclassification

FST is currently a consolidated subsidiary of the Company and plays an important role as a production and sales base for 300 mm and 200 mm wafers in Taiwan. FST is a listed company and a joint venture with Formosa Plastics Group (hereinafter referred to as “FPG”) in Taiwan, with the Company and FPG currently participating as equal partners. The Company has been studying the most appropriate form of this capital relationship, and as a result, has decided to reduce its voting rights ratio by selling a portion of the FST shares held by the Company Group, thereby reclassifying FST from a consolidated subsidiary to an equity-method affiliate.

## 2. Method of the Reclassification

Of the FST shares currently held by the Company Group (voting rights ratio: 43.2%), the Company plans to gradually sell shares equivalent to 5.2% on the Taiwan securities market, reducing the voting rights ratio held by the Company Group to 38.0% after completion of the sale. Following completion of the sale, the Company Group will maintain a voting rights ratio of 38.0% and a strong cooperative relationship with FST.
