Notice Concerning Selection as Loan Margin Trading Issue

We are pleased to announce that our stock, which is currently selected as a standardized margin trading issue on the Tokyo Stock Exchange Standard Market, has been newly selected as a loan margin trading issue.

The date of selection is May 28, 2026 and the selection will be effective from the trading on the same day.

Previously, securities companies were only able to borrow funds in standardized margin trading. However, effective from the trading on May 28, 2026, they will be able to borrow both funds and shares. We believe that this will enable the market to incorporate the supply and demand of investors who do not hold shares for sale, thereby further promoting liquidity and contributing to stable and fair price formation.

We believe that this selection of our stock as a loan margin trading issue will increase the liquidity and improve supply-demand balance of the stock as well as contribute to active trading and fair price formation.
