2. Reasons

It is the Company's policy to pay appropriate dividends to our shareholders, based on the results of operations and payout ratio, and to maintain a stable and sustainable level of dividend in overall consideration of the internal reserve for future business development, expansion of research and development, strengthening of business foundations and response to changes in the business environment.

Despite uncertainties, such as the impact of U.S. tariff policies and concerns about rising geopolitical risks in the Middle East, the Company achieved growth in both sales and income due to a recovery in automobile demand, increased demand for ships and data centers, enhanced profitability management, and progress in price pass-through. Therefore, the Company will set the dividend at 19.00 yen per share. As a result, the Company's annual dividend for the fiscal year under review, including the year-end dividend of 12.00 yen for the second quarter, will be 31.00 yen.

In accordance with Article 459 of the Companies Act, the Company's articles of incorporation stipulate that dividends of surplus may be paid by resolution of the Board of Directors on September 30 and March 31 as record dates.
