KLab's Investment Decision

There are many different views on the market, not just BTC, and we believe it is best to avoid relying on just one view or one analyst. Therefore, at KLab, we have built a system that uses AI to comprehensively aggregate, scrutinize, and analyze opinions from around the world, and will use this information to make purchase decisions.

Reports created using AI are available to the public as the "KLab with AI BTC Report" and "KLab with AI GOLD Report."

Please refer to these reports concerning our purchase decisions.

Purchase and operation policy

Basic strategy	☐ Based on the premise of mid- to long-term holding ☐ Based on dollar-cost averaging approach, the basic principle is to continuously purchase small amounts in a diversified manner ☐ To avoid relying on a single perspective or the views of a specific analyst, a system is built using AI to comprehensively collect, scrutinize, and analyze opinions from around the world, and investment decisions are made based on this system ☐ Reports created using AI are publicly released as "KLab with AI BTC Report" and "KLab with AI GOLD Report"
Rebalancing policy	☐ If the ratio is significantly disrupted due to price drops or other factors, adjust the purchase ratio to return to the target ratio (6:4)
Risk management	☐ As a general rule, continue buying even during market declines ☐ If market volatility is extremely high, temporarily adjust or suspend purchases to assess the situation
