Notice Regarding Capital Investment at Indian Subsidiary

NISSEI ASB MACHINE CO., LTD. (the "Company") hereby announces that, at the Board of Directors meeting held today, the Company resolved to execute a capital investment for the addition of processing machinery and automation equipment, mainly for mold manufacturing, at its wholly owned Indian manufacturing subsidiary, ASB INTERNATIONAL PVT. LTD. ("ASBI"). Details are as follows:

1. Reasons for the Capital Investment

The Company operates globally, with the manufacture and sale of injection stretch blow molding machines and molds as its core business. Currently, demand for the Company's products is expanding, resulting in very strong order intake.

In light of this business environment, and to establish a stable supply structure capable of meeting expected future demand growth, the Company has decided to execute a major capital investment. This will involve refurbishing an acquired factory building at ASBI—one of its key manufacturing bases—to bring it into full-scale operation as the 4th Plant, primarily focusing on mold manufacturing processes. Through this investment, the Company aims to significantly expand its production capacity while enhancing efficiency and productivity across its manufacturing processes.

2. Overview of the Capital Investment

- **Details of Investment:** Addition of processing machinery, introduction of automation equipment mainly for mold manufacturing, and associated facility refurbishment
- **Total Investment Amount:** Approximately JPY 5.6 billion
- **Funding Plan:** To be financed by internal funds
- **Investment Period:** FY2027

3. Future Outlook

The impact of this investment on the Company's consolidated financial results for the fiscal year ending September 2026 is expected to be negligible.
