# FY2026 3Q Executive Summary

## FY2026 3Q Consolidated Results

Net sales, gross profit, EBITDA (Non-GAAP), and operating profit all remained on track against the full-year plan.

|                     |                                                       |
|---------------------|-------------------------------------------------------|
| • Net sales         | 16,374 million yen (YoY -3.5%): <b>81.9%</b> progress |
| • Gross profit      | 6,782 million yen (YoY -5.5%): <b>80.7%</b> progress  |
| • EBITDA (Non-GAAP) | 658 million yen (YoY -63.8%): <b>81.3%</b> progress   |
| • Operating income  | 264 million yen (YoY -79.0%): <b>88.1%</b> progress   |

### Topics: Upward Revision to Consolidated Financial Results Forecasts (July 13, 2026)

The consolidated financial results forecasts were revised upward as follows, reflecting the revised timing of certain investments in consultant hiring and the decision not to implement marketing and branding investments during FY26.

|                   |   |                       |   |                     |
|-------------------|---|-----------------------|---|---------------------|
| EBITDA (Non-GAAP) | : | -350~650 million yen  | → | 510~810 million yen |
| Operating income  | : | -1,000~ 0 million yen | → | 0~300 million yen   |

## FY2026 3Q Highlight

### Progress in AI Business Launch and Development of a Scalable DX Consulting Model

- AI CrowdWorks **10,000+ workers pre-registered** — official launch scheduled for August 20
- AI-BPO Accelerating clients' AI implementation through a talent network of over 7.9 million and more than 250 AI use cases annually
- DX/AX consulting
  - Standardized** our business process redesign approach **into a scalable DX support model**
  - Hiring investment: On-site engineer hires **reached 123% of the full-year plan**

• Figures are rounded down to the nearest million yen.  
• Year-on-year comparisons and progress rates are calculated in accordance with the values for financial statements, taking into account figures less than one million yen.

• EBITDA (Non-GAAP): Operating income + Depreciation and amortization + Amortization of goodwill + Share-based payment expenses.  
• The EBITDA (Non-GAAP) and operating profit forecasts reflect the upward revision. The percentages of achievement for EBITDA (Non-GAAP) and operating profit are calculated against the upper end of each forecast range.

# 1. FY2026 3Q Results

## FY2026 3Q Consolidated Results

The consolidated financial results forecasts were revised upward on July 13. Net sales, gross profit, EBITDA (Non-GAAP), and operating profit all remained on track against the full-year plan.

| [million yen]        | FY25 3Q |   | FY26 3Q | YoY    |  | FY26 Forecast<br>(Revised Upward) | % of<br>achievement |
|----------------------|---------|---|---------|--------|--|-----------------------------------|---------------------|
| Net Sales            | 16,975  | ▶ | 16,374  | -3.5%  |  | 20,000                            | 81.9%               |
| Gross Profit         | 7,177   | ▶ | 6,782   | -5.5%  |  | 8,400                             | 80.7%               |
| EBITDA<br>(Non-GAAP) | 1,816   | ▶ | 658     | -63.8% |  | 510 - 810                         | 81.3%               |
| Operating<br>Income  | 1,260   | ▶ | 264     | -79.0% |  | 0 - 300                           | 88.1%               |

- Figures are rounded down to the nearest million yen.
- Year-on-year comparisons and achievement percentages are calculated in accordance with the rules for financial statements, taking into account figures less than one million yen.

- EBITDA(Non-GAAP): Operating income + Depreciation and amortization + Amortization of goodwill + Share-based payment expenses.
- The percentages of achievement for EBITDA (Non-GAAP) and operating profit are calculated against the upper end of each forecast range.

## Consolidated Net Sales & Gross Profit Quarterly Trend

Growth slowed due to the impact of AI on the Platform business and limited growth in Engineer Matching during its transition to a model centered on five-day-a-week freelance engineers. We aim for an early performance turnaround by expanding five-day-a-week, on-site engineer staffing through increased hiring.

## Consolidated EBITDA (Non-GAAP) & Operating Income Quarterly Trend

EBITDA and operating income returned to the FY26 1Q level, reflecting investment in hiring on-site engineers and lower gross profit.

## Consolidated SG&A Quarterly Trend

Personnel expenses rose 11.1% YoY and recruitment and training expenses doubled as we accelerated on-site engineer hiring. Productivity improvements reduced other expenses by 7.3% QoQ, while SG&A increased 6.4% YoY. In FY26 4Q, we will continue hiring and invest while maintaining profitability.

SG&A  
3Q YoY  
**+6.4%**

- Figures are rounded down to the nearest million yen.
- Year-on-year comparisons are calculated in accordance with the rules for financial statements, taking into account figures less than one million yen.
- In FY25 4Q, a 185 million yen reversal of share-based payment expenses related to stock options was recognized, resulting in negative goodwill/depreciation and share-based payment expenses.

## CrowdWorks Performance Growth Cycle

Since our founding, we have fueled operating profit growth and margin improvement through a repeating cycle of:

(1) **Investment** and (2) **Productivity Improvements**. Leveraging this proven growth cycle, we will execute investments in FY26 to expand performance and target a 10%+ operating profit margin from FY27 onward, in the medium to long term.

**FY 26**  
Execute investment

**FY27 & beyond**  
Expanding business performance

Following the achievement of YOSHIDA300, we will focus on the following mid- to long-term priorities.

- Net sales 100 billion yen
- Operating income 10 billion yen
- Operating income margin 10%

## 2. FY2026 3Q Highlight

# Talent infrastructure

With the evolution of technology, a society where individuals can showcase their talents and experiences, no matter who they are or where they are, is just around the corner.

There are those who help others with their strengths, those who bring smiles to people around them through their passions and joys, and those who believe in themselves and take on challenges.

Your talent will surely be of help to someone.  
By leveraging technology, we can face the infinite and diverse possibilities of individuals.

We create a future where everyone can thrive in their own way, becoming the infrastructure for individuals.  
That is the purpose of our existence.

# Creating a future where people and technology are in harmony and contributing to the happiness of individuals and the development of society

With the advancement of technology, industrial society is maturing and is in the process of transforming into a society where humans and technology coexists.

Technology has surpassed the stage of being merely a “tool”; it now responds in place of humans and performs tasks.

People have come to enjoy the images and characters created by technology, sometimes becoming enthusiastic fans.

The line between humans and technology is rapidly disappearing, giving rise to new choices that have never existed before, leading to a future where optimal solutions are selected.

In this context, we aim to create a future where people and technology are in harmony and contributing to the happiness of individuals and the development of society.

## Progress in AI Business Launch and Development of a Scalable DX Consulting Model

### AI CrowdWorks

**10,000+ workers pre-registered** — official launch scheduled for August 20

### AI-BPO

Accelerating clients' AI implementation through a talent network of over 7.9 million and more than 250 AI use cases annually

### DX/AX consulting

1. **Standardized** our business process redesign approach **into a scalable DX support model**
2. Hiring investment: On-site engineer hires **reached 123% of the full-year plan**

## ■ Addressing DX/AX Needs Across All Stages of Small and Mid-sized Enterprises (SMEs)

Leveraging our AI-focused matching platform and Japan's largest talent network, we provide support from AI-BPO to DX/AX consulting based on each client's scale and challenges.

# AI CrowdWorks Exceeds 10,000 Pre-registered Workers

## — Official Launch Scheduled for August 20

The number of pre-registered workers on AI CrowdWorks, one of Japan's largest job-matching services for AI talent and experts, exceeded **10,000 by the end of July\***. The pre-registered talent pool includes AI specialists and AI utilization professionals, as well as AI engineers and other talent with development and implementation skills.

### Key Features of AI CrowdWorks

1. Over 27,000 skill registrations across 9 categories, addressing a wide range of AI utilization needs across business functions
2. Simply register what you want to achieve with AI —from needs assessment to introductions to AI talent and experts.
3. Get the support you need, when you need it —CrowdWorks Concierge quickly addresses your needs.

### Business Model

\* Click [here](#) for the press release on AI CrowdWorks exceeding 10,000 pre-registered workers.

# AI-BPO: Supporting Organizational AI Implementation that Delivers Business Outcomes Based on Each Client's AI Adoption Stage

Leveraging **7.9 million users with diverse skills** and **250 internal AI implementation cases annually**, we identify adoption bottlenecks and provide the support needed to deliver business outcomes.

| AI Adoption Stage                                    | Client Challenges                                                                                                                                                        | Target State                                            |
|------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------|
| <b>Lv. 1</b><br><b>No AI Adoption</b>                | <ul style="list-style-type: none"> <li>Interested in AI but unsure what it can do</li> <li>Cannot envision how to apply AI to their operations</li> </ul>                | Define where to apply AI                                |
| <b>Lv. 2</b><br><b>Individual Use</b>                | <ul style="list-style-type: none"> <li>AI chat tools are used only by individuals</li> <li>Internal usage policies and guidelines are not yet established</li> </ul>     | Establish internal AI usage rules                       |
| <b>Lv. 3</b><br><b>Business Process Adoption</b>     | <ul style="list-style-type: none"> <li>Unclear which business processes should be prioritized for AI adoption</li> <li>Different teams use different AI tools</li> </ul> | Implement AI-powered workflow automation and operations |
| <b>Lv. 4</b><br><b>Organizational Implementation</b> | <ul style="list-style-type: none"> <li>Difficult to integrate AI with existing business systems</li> <li>Lack the talent needed to implement AI agents</li> </ul>        | Embed AI across the organization                        |

# AI-BPO Case 1: Automating Paper-Based Workflows with AI to Strengthen Operations for Business Growth

Addressing strong demand in the **Lv. 1: No AI Adoption** segment, we digitized and automated paper-based workflows, creating a highly replicable support model for expansion across a wide range of industries.

## Company A: Architectural design firm

|                  |                                                                                                                                                                                                                                                                                                   |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Project overview | Automated repair data entry and transfer, enabling high productivity with a lean team                                                                                                                                                                                                             |
| Contract value   | 500 thousand yen                                                                                                                                                                                                                                                                                  |
| Challenge        | <ul style="list-style-type: none"> <li>Burdened by classifying, reconciling, and entering data from large volumes of paper records, including past general meeting proposals, repair histories, and quotations.</li> <li>Repair plan preparation required significant time and effort.</li> </ul> |
| Solution         | <ul style="list-style-type: none"> <li>Digitized paper documents, extracted information using AI, and developed a record-matching engine.</li> <li>Automated data entry into preliminary construction cost breakdowns and repair histories.</li> </ul>                                            |

### Lv. 1 No AI Adoption → Lv. 2 Individual Use

## AI-BPO Case 2: AI-Powered Attorney Assignment and Scheduling Automation Project for a Law Firm with Stringent Security Requirements

Secured an AI-powered automation project in an area where AI can achieve high accuracy, aiming for a quick win and upselling by advancing the client from **Lv. 2: Individual Use** to **Lv. 3: Business Process Adoption**.

### Company B: Law firm with approximately 100 attorneys

|                  |                                                                                                                                                                                                                                                                                                                                |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Project overview | Developing an AI-BPO solution to automate court appearance scheduling for attorneys                                                                                                                                                                                                                                            |
| Contract value   | 1.6 million yen                                                                                                                                                                                                                                                                                                                |
| Challenge        | <ul style="list-style-type: none"> <li>Manual attorney assignment and scheduling for hundreds of court appearances each month required significant time and effort.</li> <li>Automation was challenging due to the need to balance multiple factors, including case priority and court appearances among attorneys.</li> </ul> |
| Solution         | <ul style="list-style-type: none"> <li>Implementing AI logic to automatically identify the attorney best matched to each court appearance.</li> <li>Developing a solution that meets the law firm's stringent security requirements.</li> </ul>                                                                                |

### Lv. 2 Individual Use → Lv. 3 Business Process Adoption

#### AI-Powered Scheduling Automation Workflow

##### 1. Rank attorney candidates

Automatically score and rank attorneys based on multiple assignment factors

AI

##### 2. Place tentative holds

Add tentative holds to the candidates' Outlook calendars

Automated

##### 3. Final review by an assistant

Review and approve the recommended assignment

Human Review

##### 4. Confirm the assignment and remove other holds

Confirm the selected assignment and automatically remove the other tentative holds

Automated

## AI CrowdWorks Client Acquisition Initiatives: AI Training and Free Webinars

Provide introductory AI training and webinars for SMEs and prospective clients struggling to use AI effectively, helping build AI literacy and generate leads for AI CrowdWorks.

### Client AI adoption stage

## DX/AX Consulting Case 2: Expanded On-Site Engineer Support into a 10 Million Yen Infrastructure Contract

Ongoing on-site support helped identify a new project opportunity and expand the engagement into a higher-value infrastructure contract.

**Company D:**  
Major ICT infrastructure services company

### How the contract was secured

|                  |                                                                                                                                         |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Company overview | Annual net sales: 192.7 billion yen<br>Number of employees: 2,788                                                                       |
| Project overview | Replacement of network equipment<br>At a medical institution<br>(Design and installation)                                               |
| Contract value   | FY26 3Q - FY27 2Q <b>10 million yen</b>                                                                                                 |
| Significance     | <b>An on-site engineer</b> with direct access to the end client <b>identified the opportunity</b> , leading to a higher-value contract. |

#### Ongoing support by an on-site engineer

On-site technical support and end-client coordination

#### Identified project opportunities

Identified network replacement needs

#### Secured an infrastructure contract

**Contributed to a 10 million yen contract**

# DX/AX Consulting Results: DX Consulting and Engineer Staffing Remained Solid

3Q net sales reached 1.67 billion yen, +3.1% YoY. The QoQ decline reflected structural reforms to shift the engineer staffing business model.

## DX/AX Consulting Net Sales

## DX/AX Consulting KPI

### Number of companies [companies]

### Unit price per company [thousand yen]

- Net sales figures are rounded down to the nearest million yen.
- Net sales year-on-year comparisons are calculated in accordance with the rules for financial statements, taking into account figures less than one million yen.
- DX consulting business includes CrowdWorks Consulting, CrowdLog, sonicmoov, and skyny.

- The number of companies has been retrospectively adjusted from FY25 1Q to eliminate duplicate clients across CrowdWorks Consulting, the former CLOCK · IT, and Peaceful Morning.
- Figures for unit price per company are rounded down to the nearest thousand yen.
- Unit price per company YoY/QoQ comparisons are calculated taking into account figures less than one thousand yen.

## DX Consulting Hiring Investment:

### On-site engineer hiring reached 123% of the full-year plan, with 84 hires in total through 3Q

Focused investment in hiring on-site engineers based on client demand and investment returns, achieving the full-year plan ahead of schedule.

#### Hiring progress: consultants and on-site engineers

On-site engineer hires reached 74 through 3Q, exceeding the full-year plan of 60.

|                                         | 3Q Results<br>/FY26 Plan | Progress |
|-----------------------------------------|--------------------------|----------|
| Consultants<br>(Hiring suspended in 2Q) | 10 / 40                  | 25%      |
| On-site engineers                       | 74 / 60                  | 123%     |
| Total                                   | 84 / 100                 | 84%      |

#### On-site engineers: average utilization rate

The average utilization rate remained high at 94.8%, with a temporary decline in 3Q due to training and onboarding of new hires, including new graduates.

- Figures of gross profit, ARR, Expansion MRR are rounded down to the nearest million yen.
- Gross profit margin is calculated in accordance with the rules for financial statements, taking into account figures less than one million yen.
- ARR (Annual Recurring Revenue): calculated by multiplying the monthly recurring revenue from subscription customers at the end of each month by 12.
- Expansion MRR (Monthly Recurring Revenue): recorded at the end of each month from existing users who upgraded from a lower to a higher plan, resulting in increased monthly sales.
- Churn Rate (Average churn rate for the last 12 months): The 12-month average of the ratio of monthly subscription value lost due to churn.

## Consolidated BS Summary FY26 3Q

Repayments of borrowings reduced liabilities, improving the equity ratio and strengthening financial soundness.

[million yen]

# CW Growth Driver: CrowdWorks 5 Core Assets

~Gross profit CAGR 20% or more for 10 years~

- |                                     |                                                                           |
|-------------------------------------|---------------------------------------------------------------------------|
| 1. Japanese Largest Database        | : Over 60,000 companies & over 800,000 people register annually           |
| 2. Products Culture                 | : Product & engineering drives consecutives increase in revenue & profit  |
| 3. CW Sales Model                   | : Boosting sales capability & unit price per company                      |
| 4. Productivity Improvement Culture | : Systematizing Gross Profit Margin & Operating Income Margin Improvement |
| 5. CW Management Policy             | : Management know-how developed into a policy and expanded to the Group   |

# 1. Japanese Largest Database: Over 60,000 Companies & over 800,000 People Register Annually

One of the largest platforms in Japan, with approx. over 60,000 companies and over 800,000 people organically registering annually.

## 2. Product Culture: Product & Engineering Contribute to Business Growth

(1) New Product Creation, (2) Policy-based Reproducible Growth, and (3) Productivity Improvements using DX & AI contributed to our growth.

### (1) New Product Creation

Based on **CrowdWorks.jp**, which handles matching, search, job management, & payment all in one, we operate 8 products.

### (2) Policy-based Reproducible Growth

CrowdLog proceeds with development in order to respond requirement levels of large enterprises & solve client issues. As a result, it achieved **10x ARR & 600 million yen** in 6 years after joining the Group.

### (3) Productivity Improvements using DX & AI

We integrated 5 services & 7 client's siloed customer databases into a single database **through fully in-house development**.

- CrowdLog exceeded ARR 600 million yen in 2024 3Q.
- PARK is scheduled to be integrated into MemberPay at the end of September 2026.
- Human & Human is scheduled to be discontinued at the end of September 2026.

### 3. CW Sales Model: Boosting Sales Capability & Unit Price per Company

We standardized sales know-how as the "CW Sales Model" to enhance sales capabilities and improve unit price per client.

#### Example of Improvement in unit price per company

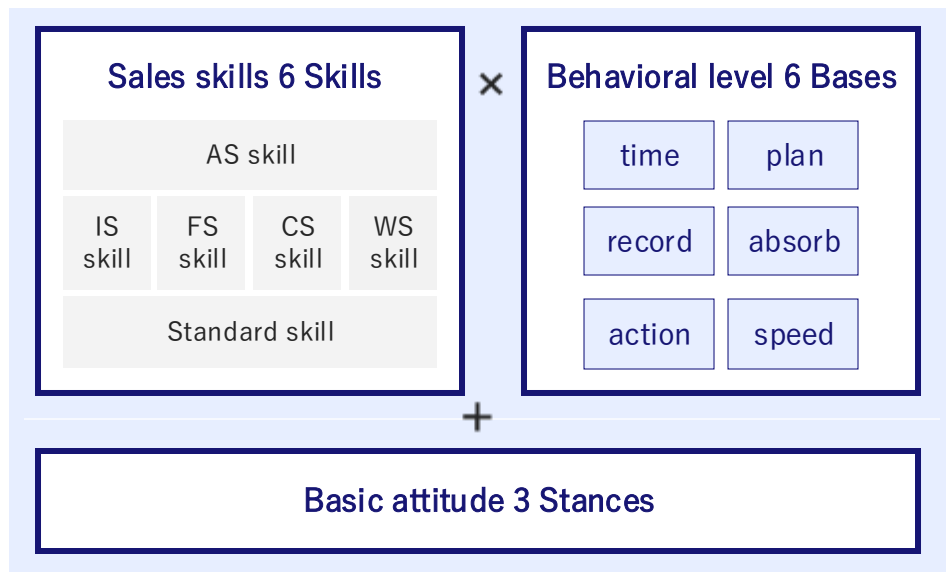

<Case> AI Tool Developer and Provider

|              | FY25 3Q             |   | FY26 3Q                       | YoY           |
|--------------|---------------------|---|-------------------------------|---------------|
| Net Sales    | 128<br>thousand yen | ▶ | <b>15,577</b><br>thousand yen | <b>121.7x</b> |
| Participants | 1                   | ▶ | <b>7</b>                      | <b>7.0x</b>   |

Issue Limited in-house AI development expertise and experience created a need for external talent.

Measure Introduced multiple AI developers from our platform with relevant expertise and experience.

#### CW Sales Model

## 4. Productivity Improvement Culture: Systematizing Gross Profit Margin & Operating Income Margin Improvement

The productivity improvement culture implemented since FY20 is the driving force behind our performance expansion. We can achieve sustainable revenue & profit growth through the "Productivity Improvement Policy" and "PPP (Productivity Improvement Knowledge Sharing Contest)."

### Productivity Improvement Policy

Define goals and internal rules for productivity improvement

Productivity Improvement  
= Issue Discovery + Process Change

### PPP

(Productivity Improvement Policy)

Share and expand productivity improvement success experiences across the company

FY20 3Q~FY26 3Q

Total knowledge

**760** cases

AI utilization cases

**257** cases

Corporate culture that can reproducibly achieve  
revenue & profit growth

## Internal AI Utilization Enabling AI-BPO: 257 AI Use Cases, 25,727 Hours of Annual Time Savings

We accumulated 257 AI use cases and exceeded 25,000 hours of annual time savings. Leveraging proven cases refined through our internal AI utilization contest (AI-PPP), we developed AI-BPO solutions that ensure business-grade quality.

- Time saved through AI use is a theoretical value calculated as (time saved per initiative × number of executions per year).
- Labor cost impact is calculated as (annual time saved through AI use × ¥3,229/hour), where the hourly rate is derived from an average annual salary of ¥6.2 million ÷ 12 months ÷ 160 hours.

## 5. CW Management Policy: Management Know-how Developed into a Policy and Expanded to the Group

We expanded our management policy across the Group, as a standardized offering, and deliver it to client companies through consulting services.

## 5. CW Management Policy: Develop Group-in Policy

CrowdWorks provides five management assets (5 Drivers) that drive revenue and profit growth to Group companies, generating four synergies (4 Synergies) in customer referrals, cost, operations, and finance.

| 5 Drivers |                                                                                                                      | Reason                                                                                                                                              |
|-----------|----------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| 1         | One of the largest platforms in Japan with over 60,000 companies and 800,000 people organically registering annually | Drive cost structure change and generate profits by providing platform client and worker data                                                       |
| 2         | Products culture                                                                                                     | Product Engineering drives Consecutive Increase in Revenue & Profit                                                                                 |
| 3         | CW Sales Model to increase unit price per company                                                                    | Based on the 'CW Sales Model,' which brings reproducibility to sales, we propose solutions using group services and improve unit price per company. |
| 4         | Productivity improvement culture<br>Establish a framework to improve profit margins                                  | Provide productivity improvement know-how to enhance gross and operating profit margins and drive growth through reinvestment.                      |
| 5         | CW Management Policy                                                                                                 | "By providing the 'CW Management Policy = Human Capital Management + Business Growth,' we enable reproducible management."                          |

| 4 Synergies |                           | Effect                                | Examples                                                                                |
|-------------|---------------------------|---------------------------------------|-----------------------------------------------------------------------------------------|
| 1           | Customer Referral Synergy | Revenue Growth Effect                 | Client cross-referrals and worker referrals                                             |
| 2           | Cost Synergy              | Cost Reduction Effect                 | Improving profitability of Group companies through involvement in CW management         |
| 3           | Management Synergy        | Improved Management Capability Effect | Horizontal development of productivity improvement culture (YU-CRE, ingate, CLOCK · IT) |
| 4           | Financial Synergy         | Reduced Fundraising Cost Effect       | Efficiency of group funds through intra-group financing                                 |

# Company Profile

## Company Profile

CrowdWorks Inc.

President and CEO: Koichiro Yoshida  
Capital: 2,817,763,756 JPY
