(2) Reason for revision

Regarding the consolidated earnings forecast for the fiscal year ending March 31, 2027, we expect sales volume of resins for electronic materials to increase in the chemical products business, driven by strong demand for semiconductors. Furthermore, as we anticipate being able to appropriately adjust prices in response to fluctuations in raw material prices, we now expect both net sales and profits to exceed the previously announced forecast.

Based on the above circumstances, we have revised the consolidated earnings forecast for the fiscal year ending March 31, 2027 as stated above.

(Note) The above forecasts are based on information available as of the date of announcement of this document. Actual results may differ from the forecast figures due to various factors in the future.
