3. Reason for Revision

The Company emphasizes continued and stable dividends, and has adopted a dividend policy of providing dividends with a DOE (dividends on consolidated equity ratio) of about 3.0%.

While comprehensively considering factors including the forecast of business results for the current fiscal year and the management environment, and with the aim of further enriching shareholder returns, the Company has decided to revise the annual dividend forecast per share for the fiscal year ending March 31, 2027 from the previous forecast of 140 yen to 150 yen (an increase of 10 yen).

Accordingly, the year-end dividend forecast for the fiscal year ending March 31, 2027 will be 80 yen per share, calculated as the annual dividend forecast of 150 yen less the interim dividend of 70 yen.
