Notice Regarding the Signing of a Memorandum of Understanding with OHB

Astroscale Holdings Inc. (the "Company") hereby announces that it has entered into a Memorandum of Understanding ("MoU") with OHB SE ("OHB"), one of Germany's leading space systems and satellite manufacturers and a key player in the European space industry, to explore potential cooperation on capabilities for the protection of critical infrastructure in space.

1. Overview of the MoU

   This MoU establishes a framework for the Company and OHB to explore potential cooperation by leveraging their respective technologies and expertise in on-orbit servicing, in-space assembly and manufacturing (ISAM), space domain awareness (SDA), and related space security fields. The MoU places particular emphasis on strengthening collaboration between the Company's UK subsidiary and OHB. Building on the strategic partnership between the United Kingdom and Germany, which has been deepened through the UK-Germany Trinity House Agreement on Defence (2024) and the UK-Germany Kensington Treaty (2025), the parties aim to support enhanced cooperation among the governmental, commercial, and security sectors as set out in the UK-Germany Joint Declaration announced on October 8, 2026, while pursuing growth opportunities for both the Company and OHB.

2. Objectives of the Initiative

   Under this MoU, the Company and OHB will place particular emphasis on strengthening collaboration between OHB and the Company's UK subsidiary. By exporting technologies developed in the United Kingdom, the parties aim to address emerging customer needs and create new opportunities for growth.

   The MoU is also expected to provide a foundation for exploring potential collaboration in the Company's business activities in Japan. Through this cooperation, the parties aim to translate relationships among like-minded nations into opportunities that promote innovation, trade, and enhanced resilience in space.

3. Outlook

   This MoU represents the signing of a memorandum of understanding, and the Company does not expect it to have any impact on its financial results at this time.
