2. Reason for revision

For the full fiscal year, consolidated net sales are expected to exceed the previously announced forecast, driven by strong demand anticipated in the electronics and semiconductor industries as well as the machinery industry, which is expected to boost sales of related tools.

In terms of profits, in addition to increased sales, earnings are expected to exceed the previously announced forecast due to factors such as improved factory utilization rates and revenue improvements resulting from adjustments to sales prices in response to rising raw material costs.

3. Dividend Forecast

There are no changes to the dividend forecast.

Note: The above forecasts are based on information currently available to the Company and certain assumptions that the Company believes are reasonable. Actual results may differ from these forecasts due to various factors.
