Supplementary Presentation Material of FY2026 Second Quarter Financial Results

ANEST IWATA Corporation

November 10, 2026

Tokyo Stock Exchange Prime Market - Machinery

Securities Code 6381

ANEST IWATA Active with Newest Technology 100th Anniversary

Key Points of the Material

FY2026 2Q Summary

*1 SANWA Co., Ltd., a Japanese manufacturer and distributor of high-pressure air compressors. For details, refer to the press release issued on May 8 (Japanese only).

- Net sales of 31,478 million yen (+19.6% year-on-year)
  - ✓ Air energy business achieved higher sales and higher profit. Higher sales of oil-free compressors in the United States, India and other markets, the consolidation of a Japanese compressor manufacturer and distributor (hereafter “SANWA”)*1, and price increases contributed to sales growth.
  - ✓ Coating business achieved higher sales and higher profit. Revenue was recognized in Japan from large-scale coating systems for automotive parts manufacturers. Sales of spray guns remained firm in Europe and the U.S.
- Operating profit of 3,623 million yen (+44.3% year-on-year)
  - ✓ In addition to an increase in gross profit, the operating income ratio improved significantly to 11.5%, driven by strengthened cost management and other measures associated with the transition to an area-based management structure
    (+ 2.0 pts year-on-year)
- Interim dividend per share was 43 yen as planned (including a commemorative dividend of 2 yen per share to mark the company's founding anniversary)
- The full-year forecast for FY2026 (revised on August 10) and the year-end dividend remain unchanged

Topics

- Advancing initiatives to meet growing AI and semiconductor demand
- Developing painting systems that reduce energy consumption and processing time in the drying stage of painting and coating processes, directly supporting customers’ decarbonization efforts.
- Areas of Synergy Between the 17 Growth Strategy Fields and Our Businesses:
  - ✓ All four businesses—air compressors, vacuum equipment, coating equipment and coating systems—are relevant primarily to 12 sectors covered by the government’s growth strategy. Sales efforts targeting equipment manufacturers have generated orders in the “AI and semiconductors” sector, with post-delivery follow-up leading to repeat orders.

Financial Highlights

Both sales and profit increased, driven by expanded sales of air compressors in the Americas and India and coating systems in Japan, as well as strengthened cost management across regions

- The impact of foreign exchange: net sales +1,886 million yen, operating profit +103 million yen, ordinary profit -120 million yen, and profit -107 million yen
- Compared to the first-half forecast (revised August 10): Net sales +3.2%, operating profit +20.8%, ordinary profit +11.6%, net income +15.1%

		FY2025 2Q		FY2026 2Q		Year-on-year			Full-year forecast (revised on August 10)	
		Actual (million yen)	Profit ratio (%)	Actual (million yen)	Profit ratio (%)	Increase/ decrease amount (million yen)	Increase/ decrease rate (%)	Profit ratio change (Point)	Forecast (million yen)	Progress rate (%)
Net sales		**26,325**	**—**	**31,478**	**—**	**+5,153**	**+19.6**	**—**	**60,700**	**51.9**
Operating profit		**2,511**	**9.5**	**3,623**	**11.5**	**+1,111**	**+44.3**	**+2.0**	**5,400**	**67.1**

Profit attributable to owners of parent		**2,160**	**8.2**	**2,647**	**8.4**	**+487**	**+22.5**	**+0.2**	**3,950**	**67.0**
Average exchange rate of yen to	USD	**148.60** yen		**158.18** yen		**Depreciated by 9.58 yen**			151.50 yen	
	EUR	**162.15** yen		**184.52** yen		**Depreciated by 22.37 yen**			175.00 yen	
	CNY	**20.47** yen		**23.05** yen		**Depreciated by 2.58 yen**			21.00 yen	

[Foreign exchange sensitivity] Trend value based on net sales and operating profit (**The currency ratio is not reflected in the following**)

- Net sales: For each 1 yen depreciation against other currencies, sales increase by approximately 50 million yen for the USD, 50 million yen for the EUR, and 600 million yen for the CNY annually, respectively.
- Operating profit: For each 1 yen depreciation against other currencies, operating profit increases by approximately 10 million yen for the USD, 10 million yen for the EUR, and 30 million yen for the CNY annually, respectively.

Factors affecting net sales (by business) (year-on-year)

Sales were driven by air compressors in the Americas and India, as well as coating systems in Japan

		FY2026 2Q	Year-on-year	
		(million yen)	(million yen)	(%)
Net sales		**31,478**	**+5,153**	**+19.6**
Air energy	Air compressors	16,609	+2,032	**+13.9**
	Vacuum equipment	1,502	+268	**+21.8**
	Subtotal	**18,111**	**+2,300**	**+14.5**
Coating	Coating equipment	9,967	+1,195	**+13.6**
	Coating systems	3,084	+1,773	**+135.3**
	Subtotal	**13,052**	**+2,969**	**+29.5**
Others	Subtotal	**315**	**-116**	**-27.0**

Note: The “others" business includes earnings from a consolidated subsidiary in Japan that sells consumer products and provides mobility after-sales services.

Main factors for increase/decrease

■ Air compressors

- Japan: Sales increased, driven by the consolidation of SANWA, strong sales of oil-free compressors and price increases.
- Americas: Sales of air compressors for data centers increased. Sales of vehicle-mounted air compressors also remained strong in North and South America.
- India: Demand for small-sized air compressors in the general-purpose market recovered. Operations at the medium-sized assembly plant are also proceeding smoothly.
- China: While the domestic Chinese market faced challenges due to price competition, a surge in demand arose specifically for lithium-ion battery manufacturing. Exports from China remained strong.

■ Vacuum equipment

- Japan, Taiwan, and the U.S.: Sales of vacuum pumps to semiconductor manufacturing-related equipment manufacturers remained strong.
- U.S.: Progress made in acquiring new customers, including those in the space-related fields

■ Coating equipment

- Europe: Sales increased due to improvements in mainstay spray gun models for the car repair market.
- Americas: Sales of coating equipment for industrial coating markets—such as woodworking and leather—remained strong in North and South America.
- China: Sales increased as proposal-based selling targeting the industrial coating market proved successful.

■ Coating systems

- Japan: Sales increased significantly due to the recognition of revenue from large-scale coating systems for automotive parts manufacturers.

■ Others

- Mobility After-sales Services: Business transactions with general and corporate customers expanded at the automotive body repair shops opened in the previous fiscal year.
- Consumer Business: Sales declined, partly due to the discontinuation of sales of certain products to home improvement retailers.

Factors affecting profit (year-on-year)

Profits increased as a result of increased gross profit from sales expansion and progress in expense control

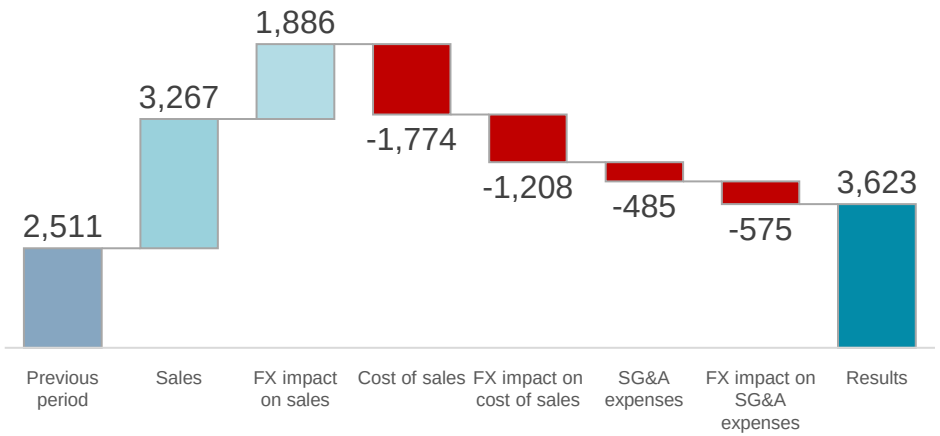

Operating profit by business *1

(million yen)	FY2025 2Q		FY2026 2Q	
	Operating profit	Profit ratio*1	Operating profit	profit ratio
Air Energy	**1,409**	**8.9**	**1,965**	**10.9**
Coating	**1,237**	**12.3**	**1,776**	**13.6**
Others	**-134**	**—**	**-118**	**—**

Air Energy	• Sales of high-margin oil-free air compressors and vacuum pumps are expanding
Coating	• The profitability of coating systems improved mainly in Japan
Others	• Although expenses were incurred for the launch of the mobility after-sales service business, the operating loss narrowed

*1 (Image of product-wise profit ratio) Vacuum equipment > Coating equipment > Air compressors > Coating systems

Total operating profit (impact of exchange rates)

Cost of sales	• Cost of sales ratio increased to 54.3% (up 0.8 pt year-on-year) due to factors such as rise in raw material prices
SG&A expenses	• Although labor costs and commission expenses increased, the selling, general, and administrative expenses ratio improved: 34.2% (down 2.7 pt year-on-year) - Labor costs (up 678 million yen year-on-year): Mainly increased in Europe, the US, and Japan - Commission expenses (up 159 million yen year-on-year): M&A fees, 100th anniversary project-related expenses, etc.

(million yen)	FY2025 2Q		FY2026 2Q	
	Amount	profit ratio	Amount	profit ratio
Ordinary profit	**3,296**	**12.5**	**4,241**	**13.5**
Profit*2	**2,160**	**8.2**	**2,647**	**8.4**

Non-operating expenses	• Foreign exchange losses of 96 million yen
Extraordinary losses	• Loss due to fraudulent activities at an overseas subsidiary(1Q): 132 million yen

*2 Profit attributable to owners of parent

Capital Investment Plan and R&D Cost Status

Through the establishment of the Manufacturing Innovation Center (MIC)*1 and production facility expansions, we are accelerating development speed, reducing prototyping costs, and optimizing production processes

Full-year forecast unchanged	FY2025	FY2026		
	2Q actual (million yen)	2Q actual (million yen)	Full year plan (million yen)	Progress rate (%)
Capital investment	**1,873**	**1,494**	**3,910**	**38.2**
Depreciation	**1,114**	**1,147**	**2,580**	**44.5**
R&D cost*2	**794**	**992**	**2,360**	**42.0**

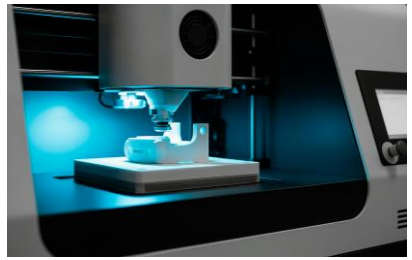

Major capital investments

Actual

- Japan：Establishment of the MIC on the headquarters premises (June 2026) as a "Production Technology Development Center" dedicated to "creating manufacturing," acceleration of new product development and the creation of new manufacturing processes
- Europe: Expansion of production facilities for the manufacture of coating equipment

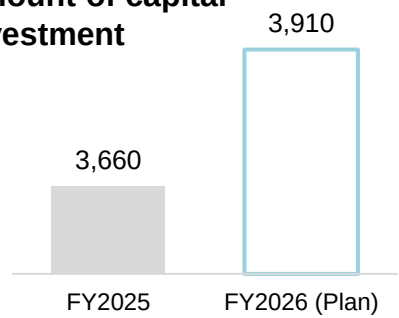

Plan

- Japan: ✓ Development of digital infrastructure, including the digital transformation (DX) of factories, to facilitate the transfer of technical expertise and reduce design man-hours. In-house shift of core processes and key components
  - ✓ Began exploring broader use of AI to further enhance design and development processes in the Development Division and improve operational efficiency and productivity in the Corporate Planning Division.
- Expansion of production facilities across each region

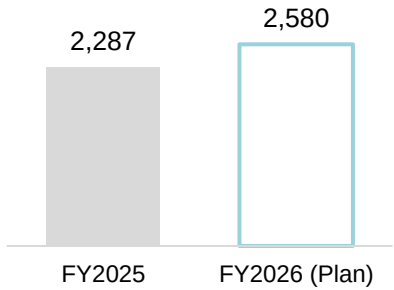

(million yen)

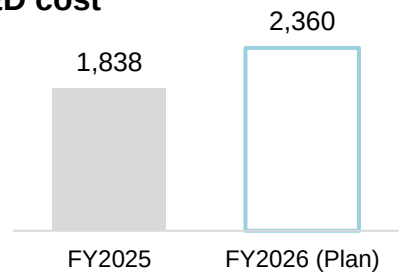

Amount of capital investment

Depreciation

R&D cost

*1 MIC (Manufacturing Innovation Center). Former name: Prototype Building. For details, refer to the press release issued on June 26 (Japanese only, linked to external site).

*2 R&D cost: Total of general and administrative expenses related to research and development and manufacturing costs

Shareholder Return Measures

Interim dividend of 43 yen per share, including a JPY 2 commemorative dividend marking the 100th anniversary of the company's founding.

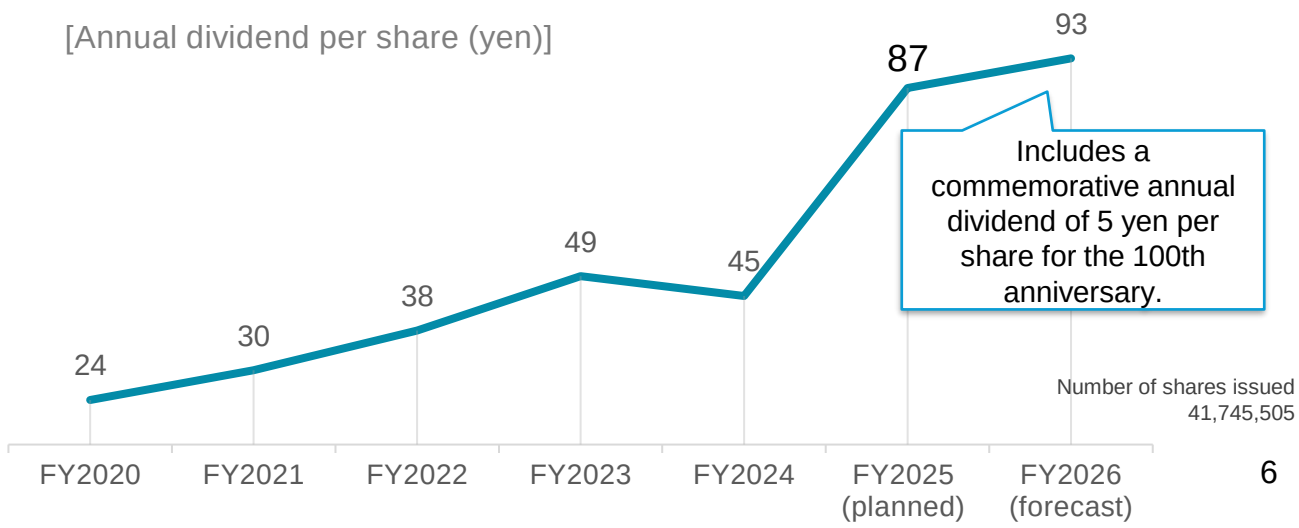

- Year-end dividend unchanged.

Shareholder return policy

- In order to realize stable and greater returns to shareholders, we have newly adopted the **dividend on equity ratio (DOE)** as a return indicator, replacing the previous dividend payout ratio.
  - ✓ **During the current Medium-Term Business Plan period (FY2025 to FY2027)**
    - Setting the **DOE** during the period at **7.0-7.5%**
    - Progressively increasing annual dividend per share with FY2025 as the lower limit

      *Excludes special factors such as the 100th anniversary commemorative dividend and special dividends.
- Purchase of treasury shares of **3 to 3.5 billion yen** during the current Medium-Term Business Plan period (Approximately 1.5 billion yen completed to date.)

Dividend (yen)	Interim	Year-end	Annual
FY2025	41	46	87
FY2026 (Actual)	43		
(Forecast)		50	93

Performance Forecasts for FY2026 (unchanged)

Full-year earnings forecasts remain unchanged from the August 10 revision.

(Unit: million yen)		FY2025	FY2026					
		Actual value	Initial forecast	Revised forecast	Initial forecast comparison		Year-on-year	
					Variance	Increase/ decrease rate (%)	Variance	Increase/ decrease rate (%)
Net sales	**Total**	**55,909**	**60,000**	**60,700**	**+700**	**+1.2**	**+4,790**	**+8.6**
	Air Energy	33,683	35,650	36,350	+700	+2.0	+2,666	+7.9
	Coating	21,491	23,350	23,350	+0	+0.0	+1,858	+8.6
	Others	734	1000	1,000	+0	+0.0	+265	+36.2
Operating profit	**Total**	**5,563**	**5,200**	**5,400**	**+200**	**+3.8**	**-163**	**-2.9**
	Air Energy	3,313	2,950	3,150	+200	+6.8	-163	-4.9

	Others	-291	-180	-180	+0	+0.0	+111	-38.3
Ordinary profit		**7,718**	**6,460**	**6,460**	**+0**	**+0.0**	**-1,258**	**-16.3**
Profit		**5,356**	**3,950**	**3,950**	**+0**	**+0.0**	**-1,406**	**-26.3**

Note: Average exchange rates: JPY 151.50/USD, JPY 175.00/EUR and JPY 21.00/CNY (unchanged from the beginning of the fiscal year).

Premises for Performance Forecasts

- **New product development:** The new oil-free medium-sized air compressor is scheduled to be launched in FY2026. The contribution to earnings is expected from the next fiscal year onward
- **Materials and Components Procurement:** The impact of rising component prices due to the prolonged situation in the Middle East, as well as increased procurement costs and extended lead times for semiconductors and electronic components, has not been factored into the business outlook
- **Foreign exchange movements:** The earnings forecast does not incorporate foreign exchange gains or losses
- **Selling, general, and administrative expenses:** Expenses related to the 100th-anniversary initiatives will be recorded as planned for the full year

Topics: Capturing AI and Semiconductor Demand and Piloting a Next-Generation Painting Line

① Growing Semiconductor Demand Drives Higher Sales

Sales are expanding, driven by data center and semiconductor demand, primarily in the United States and Taiwan. Post-delivery follow-up is generating repeat orders.

Our Products Support AI and Semiconductor Production

AI・data centers/manufacturing equipment for semiconductors and electronic components

Servers | AI semiconductors | Wafers | Manufacturing and inspection equipment

supporting production

Our products	Air compressors	Vacuum pumps	Coating equipment	Coating systems

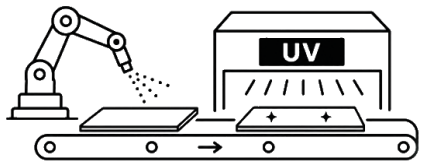

② CUBIC LINE × Solvent-Free UV Coating

We are piloting a combination of CUBIC LINE and solvent-free UV coating in the metal coating process at our own factory.

Pilot line at our factory

×

CUBIC LINE
・Cubic-layout painting process
・Conveyor-free operation

Solvent-Free UV Coating
Replaces drying ovens; cures coatings in seconds

Lower Environmental Impact
Virtually zero VOC emissions
UV

Energy Savings
・Compressor waste heat recirculation
・Reduced drying time
CUBIC+UV

Space Savings
・Conveyor-free operation
・No drying oven required
CUBIC+UV

Shorter Installation Time
Approximately 50% reduction
CUBIC

“Liquid atomization (coating)” + “Gas compression (compressed air supply)” + “Coating system expertise”

Solvent-free UV coating shortens the drying process, reducing the space and energy required for coating lines.

Topics: Japan's 17 Strategic Growth Sectors and Our Businesses

Our four businesses—air compressors, vacuum equipment, painting equipment and painting systems—have connections primarily with 11 of Japan's 17 strategic growth sectors.*1 Sales efforts targeting equipment manufacturers have generated increased orders in the "AI and semiconductors" sector.

Our four businesses
- Comp. (air compressors)
- Vacuum (vacuum equipment)
- Coating (coating equipment)
- Systems (coating systems)

AI and semiconductors (currently strong) — **Comp. Vacuum Coating** Systems	Digital and cybersecurity — Comp. Vacuum Coating Systems	Information and communications — Comp. Vacuum Coating Systems
Quantum technology — **Comp. Vacuum** Coating Systems	**Defense industry** — **Comp.** Vacuum **Coating Systems**	**Aerospace** — **Comp. Vacuum Coating Systems**
Marine industries — Comp. Vacuum Coating Systems	**Shipbuilding** — **Comp.** Vacuum **Coating Systems**	**Materials (critical minerals and components)** — **Comp. Vacuum** Coating Systems
Synthetic biology and biotechnology — **Comp. Vacuum** Coating Systems	**Drug discovery and advanced healthcare** — **Comp. Vacuum** Coating Systems	**Resource and energy security and GX** — **Comp. Vacuum** Coating Systems
Fusion energy — Comp. Vacuum Coating Systems	**Food technology** — **Comp. Vacuum** Coating Systems	Disaster prevention and national resilience — Comp. Vacuum Coating Systems
Port logistics — Comp. Vacuum **Coating** Systems	**Content industries** — Comp. Vacuum **Coating** Systems	

- Related businesses
- Currently strong
- Closely related
- No direct relationship

Note: Relationships reflect the company's assessment based on product applications and do not indicate sales scale.

<Reference Information> Our Company's Origins and Current Business Overview

Starting with the manufacture of spray guns for painting and the compressors that power them, we have continued to expand our business by diversifying our products and developing new applications.

Founded in 1926 (Former company name: Iwata Seisakusho)

Started manufacturing of spray guns using an American-made spray gun as a model

Spray gun

Coating hand gun

Atomizing paint with compressed air

Air compressor

Compressor

Started manufacturing of air compressors as power for spray guns

Product differentiation concept

- Environment-friendly
- Ability to present proposals for coating surface creation

- Oil-free
- Energy-saving

Diversification of products Development of new applications

Coating robot

Airbrush

Oil-free scroll vacuum pump

Oil-free scroll air compressor

Coating business

Coating equipment

- ✓ Tools for atomizing paint and other liquids or machinery for conveying liquids
- ✓ Equipment units such as spray guns and paint supply pumps

Coating systems

- ✓ Equipment comprising a series of pre- and post-coating processes
