RIX CORPORATION Announces Revisions to Forecasted Business Results and Dividends

In light of the recent performance trends, RIX CORPORATION (the "Company") has revised its forecasted business results and dividends, originally announced on May 15, 2026, as follows:

- **Revised Business Results Forecast**

Updated consolidated financial results forecast for the fiscal year ending March 31, 2027 (April 1, 2026–March 31, 2027)

	Net sales	Operating profit	Ordinary profit	Profit attributable to owners of parent	Basic earnings per share
	Million yen	Million yen	Million yen	Million yen	Yen
Previous forecast (A)	58,000	4,220	4,360	3,000	369.80
Revised forecast (B)	59,400	4,700	4,930	3,270	403.08
Change (B-A)	1,400	480	570	270	
Change (%)	2.4	11.4	13.1	9.0	
(For reference) Previous fiscal year results (Fiscal year ended March 31, 2026)	55,827	3,537	3,897	3,180	392.47

Reason for revision:

With regard to operating results for the six months ended September 30, 2026, the Group recorded net sales totaling ¥28,964 million (up 10.6% year on year) and operating profit totaling ¥2,297 million (up 37.1% year on year), achieving a significant increase in both sales and profit. The primary factor for the strong business performance was significant growth in sales of our proprietary products such as rotary joints, a strength of the Group, against the backdrop of increased demand for semiconductors accompanying the global expansion of AI investment and needs for five-axis machine tools and integration of machine tools. In terms of operating results by segment, the electronics and semiconductor industry and the machine tools industry drove overall performance. As these segments are expected to continue boosting overall performance in the second half of the fiscal year, we have revised upward our full-year consolidated financial results forecast.

* These forecasts are based on information available as of the date of this notice, and actual results may differ due to a wide range of factors.

- **Revised Dividends Forecast**

	Annual dividends		
	2nd quarter-end	Year-end	Total
	Yen	Yen	Yen
Previous forecast (Announced on May 15, 2026)	79.00	83.00	162.00
Revised forecast		86.00	165.00
Actual results	79.00		
Previous fiscal year results (Fiscal year ended March 31, 2026)	64.00	93.00	157.00

Reason for revision:

The Company's basic policy targets a consolidated dividend on equity (DOE) ratio of 4.5% or higher and a consolidated dividend payout ratio of 40% or higher in line with business performance.

Following the upward revision of our financial results forecast, we have also revised upward our year-end ordinary dividend forecast by ¥3 to ¥86 per share. As a result, the annual dividend is expected to be ¥165 per share.
