Notice Regarding Conclusion of a Multi-Launch Agreement with Firefly Aerospace for Up to 10 Dedicated Alpha Launches

Synspective Inc. (the "Company") hereby announces that, at a meeting of its Board of Directors held on November 10, 2026 (Japan Standard Time, "JST"), the Company resolved to conclude a multi-launch agreement with Firefly Aerospace (headquarters: Texas, USA; CEO: Jason Kim; hereinafter "Firefly") for up to 10 dedicated launches aboard Firefly's Alpha rocket through 2030, and executed the agreement on the same day. Each Alpha mission will carry two StriX satellites, for a total of up to 20 satellites expected to be deployed over the course of the agreement. Launching two satellites per mission doubles the number of satellites the Company places in orbit per launch compared to single-satellite missions. It also gives the Company an efficient path to scale its StriX constellation.

Firefly will launch the Company's satellites from both Pad-0A at Wallops Flight Facility in Virginia and Space Launch Complex 2 (SLC-2) at Vandenberg Space Force Base in California. This dual-coast capability gives the Company flexible access to a range of orbital inclinations as it builds out the constellation, complementing its existing launch arrangements.

This notice is being disclosed following the publication of a press release on the Company's website on November 10, 2026 (JST). For more information, please visit:

Synspective Selects Firefly Aerospace for Up to 10 Dedicated Alpha Launches Carrying Up to 20 StriX Satellites Through 2030

(Future Outlook)
This agreement relates to future satellite launches and has no impact on the full-year earnings forecast for the fiscal year ending December 31, 2026, announced on February 13, 2026.
The Company will provide updates on launches through press releases and financial results materials as they become available.

END
